

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

Application ID: 107412072023152543
Application Status: Pending
Program Name: Virginia Telecommunication Initiative 2024
Organization Name: Spotsylvania County
Organization Address: PO Box 215
Spotsylvania, VA 22553
Profile Manager Name: Annette D'alessandro
Profile Manager Phone: (540) 507-7595
Profile Manager Email: adalessandro@spotsylvania.va.us

Project Name: Spotsylvania County's FY 2024 VATI Request for Universal Coverage
Project Contact Name: Annette D'alessandro
Project Contact Phone: (540) 507-7595
Project Contact Email: adalessandro@spotsylvania.va.us
Project Location: PO BOX 215
SPOTSYLVANIA, VA 22553-0215
Project Service Area: Spotsylvania County

Total Requested Amount: \$12,732,903.00
Required Annual Audit Status: Pending Review

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

Budget Information:

Cost/Activity Category	DHCD Request	Other Funding	Total
Telecommunications	\$12,732,903.00	\$16,070,215.89	\$28,803,118.89
Construction	\$12,732,903.00	\$14,368,499.22	\$27,101,402.22
Other: In kind Contributions	\$0.00	\$1,701,716.67	\$1,701,716.67
Total:	\$12,732,903.00	\$16,070,215.89	\$28,803,118.89

Budget Narrative:

Spotsylvania County, as the lead applicant, will partner with Port 80 Internet Services, LLC (Port 80), as the co-applicant, to deploy a Fiber to the Premise (FTTP) broadband system that will offer internet service to those areas that are currently unserved and underserved in the primarily rural districts of Berkeley and Livingston. Upon completion, this project will provide for universal coverage in Spotsylvania County. Port 80, as the private internet service provider, will offer customers a variety of internet service packages ranging from 25/25 Mbps (for Affordable Connectivity Program subscribers) up to 10/10 Gbps. The proposed project will pass over 13,000 addresses of which 4,540 are unserved by VATI's definition. Spotsylvania County is respectfully requesting \$12,732,903.00 in VATI funds. The County will contribute \$8,850,000 in local and federal funds received through its American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF) allocation while Port 80 will contribute \$5,518,499.22 in cash. Additionally, Port 80 will provide \$1,701,716.67 as an in-kind contribution for staffing, marketing, vehicles, and equipment for a total project cost of \$28,803,118.89. If awarded, VATI will contribute 44.21% in cash, Spotsylvania County will contribute 30.73% in cash, and Port 80 will contribute 19.16% in cash and 5.90% in in-kind contributions. Funding of Spotsylvania County's proposed universal broadband project will simultaneously further VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing communities to build, utilize, and capitalize on a fiber infrastructure while also significantly advancing the County's goal of extending affordable broadband internet service access to every resident in Spotsylvania County.

Questions and Responses:

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

1. Project Description and Need

Describe why and how the project area(s) was selected. Describe the proposed geographic area including specific boundaries of the project area (e.g. street names, local and regional boundaries, etc.). Attach a copy of the map of your project area(s). Label map: Attachment 1 – Project Area Map.

Answer:

Spotsylvania County is located in Northern Virginia, midway between the nation's capital of Washington D.C. and the State's capital of Richmond. The County covers over 413 square miles and has a 2022 population estimate of 146,688 according to the U.S. Census Bureau. In the past, the County's growth rate has resulted in the County being included in the rankings of the hundred fastest growing counties in the nation. The County's growth can be attributed to several factors. The County is located along the I-95 interstate corridor with close proximity to businesses, industries, military installations, as well as federal and state governmental offices. Affordable housing, relative to the surrounding areas, has led many individuals and families to migrate to Spotsylvania County. Over half of the County's employed residents commute to work in the Northern Virginia, Washington D.C. or Richmond area. Within its boundaries, the County possesses the scenic beauty of Lake Anna, rural landscape, suburban amenities and a wealth of historical attractions from the Colonial and Civil War eras. These resources also make the County a favorite tourist destination.

With a total population of nearly 147,000, nearly two-thirds of the County's land is predominantly rural. The suburban areas of the County are concentrated in and along the I-95/Route 1/Route 3 major highways. The rural community has a heavy presence of Revolutionary and Civil War preserved areas, and multiple lakes, creeks and rivers providing breathtaking views, bountiful agricultural lands and long winding country lanes and driveways. The spacious and sprawling topography creates a challenge for each of the County's cable television/internet providers. Accessibility to broadband is restricted to cluster developments and commercial zones in the suburban parts of the County, and clustered in rural areas where premise densities can be justified with expansion of high speed broadband. The homes and businesses that don't have broadband service available are more rural and agricultural or are homes or businesses with long driveways that will incur special construction costs at the owner's expense as their driveways exceed the limits which existing internet service providers will serve for free.

The County has spent hundreds of hours and resources evaluating needs, communicating with residents, identifying public assets and unserved locations, which has resulted in a Broadband Mapping Solution that easily allows evaluation of each broadband solution and determine the best course of action. The selected sites for the proposed project are shown on Attachment 1 – Project Area Map. The primary project areas are identified as the Berkeley and Livingston voting districts; however, there are also other unserved areas throughout the County. This project area includes 4,540 unserved addresses as defined in the VATI guidance. The project area consists of 4,228 residential units, 185 non-home based businesses, 109 home-based businesses, seventeen community anchors, and one private school. Included in the 4,540 unserved passings are 855 homes and businesses that have driveway lengths exceeding 400 feet. These homes and businesses are subject to special construction costs from existing internet service providers as their driveways exceed the 250 to 300 feet that existing internet service providers will provide. Although each provider and circumstance is different, special construction costs typically range from \$12 to \$40 per foot.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

2. List existing providers in the proposed project area and the speeds offered. Describe your outreach efforts to identify existing providers and how this information was compiled with source(s).

Answer:

In the fall of 2023, Spotsylvania County issued a Request for Proposal seeking one or more internet service providers to partner on a VATI grant application and to provide a plan for universal coverage for the County. Seven bids were received in response to this solicitation ranging from \$21,962,970 to \$66,284,232. While each proposal offered the minimum 25/3 Mbps, and up to 1/1 Gbps, only one provider, Port 80, offered the best solution to address how to cover the broadest range of unserved and underserved premises, with the resources, skills and experience to implement a FTTP solution within the established time frame of the VATI grant requirements.

Other broadband internet services providers in the County include Verizon FIOS, Comcast, Cox, and FiberLync; however, each of these providers have either 1) opted to not participate in any type of expansion beyond their own internal business decisions; and/or 2) scoped out a number of opportunities to expand coverage and capacity, at costs per home that are simply unreasonable and exorbitant; and/or 3) expanded service into greenfield sites, primarily in existing coverage footprints and in high density areas of the County. The County has existing cable television franchise agreements with some of these service providers and would leverage them to promote Broadband service buildout however any average passing per mile requirements in the respective cable television franchise agreements have not been able to be obtained due to lack of density of passings.

There is also an existing fixed wireless access (FWA) provider in the Lake Anna area of the County but they are not able to provide service that meets the minimum 25/3 mbps requirement or able to maintain a sustainable solution for their customers.

3. Describe if any areas near the project have received funding from federal grant programs, including but not limited to Connect America Funds II (CAF II), ACAM, ReConnect, Community Connect, and Rural Digital Opportunity Funds (RDOF). If there have been federal funds awarded near the project area(s), provide a map showing these areas, verifying the proposed project area does not conflict with these areas. Label Map: Attachment 2 – Documentation on Federal Funding Area.

Answer:

The County has identified RDOF areas within the County that have been federally awarded to Starlink; however, VATI guidelines do not recognize satellite broadband as a viable solution at this time. Attachment 2 shows a map of the CAF II awards with no funding granted in Spotsylvania County.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

4. Overlap: To be eligible for VATI, applicants must demonstrate that the proposed project area(s) is unserved. An unserved area is defined as an area with speeds below 100/20 Mbps and with less than 25% service overlap within the project area for wireless projects and 20% for wireline projects. Describe any anticipated service overlap with current providers within the project area. Provide a detailed explanation as to how you determined the percentage overlap. Label Attachment: Attachment 3 – Documentation Unserved Area VATI Criteria.

Answer:

Comcast, Verizon FIOS, and FiberLync provided serviceable locations to Spotsylvania indicating which locations they claim to currently serve or can serve without special construction cost. The County's GIS staff has been able to utilize those service line maps and provide an accurate picture of where service is and is not. Note that Verizon will not provide service line maps at this time; however, their FIOS coverage is primarily in the remaining five districts of the County. According to Verizon, they are unable to expand FIOS past areas where Comcast is also providing coverage due to a lack of proper facilities in those parts of the County. According to them, their central office is not adequately sized to house the necessary equipment. It is important to note on the attached map for unserved areas that there are hundreds of homes in the Livingston and Berkeley districts that are unable to receive Comcast service without significant special construction costs due to their distance from the road. Those passings that exceed 400 feet have been included in this grant application. While a significant amount of middle mile fiber will overlap existing providers, those passings are not included in this grant application unless the passing is more than 400 feet from the centerline of the road. With the provided information overlap is estimated to be less than 10%.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

5. Total Passings: Provide the number of total serviceable units in the project area. Applicants are encouraged to prioritize areas lacking 25 Megabits per second download and 3 Megabits per second upload speeds, as they will receive priority in application scoring. For projects with more than one service area, each service area must have delineated passing information. Label Attachment: Attachment 4 – Passings Form.
- a. Of the total number of VATI passings, provide the number of residential, business, non-residential, and community anchors in the proposed project area.
 - b. If applicable, of the total number of RDOF passings, provide the number of residential, business, non-residential, and community anchors in the proposed project area.
 - c. If applicable, provide the number of passings that will require special construction costs, defined as a one-time fee above normal service connection fees required to provide broadband access to a premise . Describe the methodology used for these projections.
 - d. If applicable, provide the number of passings included in the application that will receive broadband access because special construction costs have been budgeted in the VATI application. Describe the methodology used for determining which passings with special construction costs were budgeted in the application.
 - e. Provide the number of passings in the project area that have 25/3 Mbps or less. Describe the methodology used for these projections. (up to 15 points)

Answer:

Out of the 4,540 passes in the project area, 4,228, or 93.13%, are residential structures. There are also 185, or 4.07%, non-home based businesses; 109, or 2.40%, home-based businesses; 17, or 0.37%, community anchors to include fourteen public County owned parks, an Izaak Walton League site, a YMCA, the Belmont Ruritan Center, and American Legion Post 320; and one, or 0.03%, non-residential private school. Included in the 4,540 unserved passings are 855 homes and businesses that have driveway lengths exceeding 400 feet. These homes and businesses are subject to special construction costs from existing internet service providers and will not incur any additional special construction costs as part of this VATI project.

The residential sites are popular with people who want larger lots, to live in a more country setting or along the shores of lakes, rivers, and creeks. There are also a number of farms that at the current time do not have addresses. Farmers are increasingly utilizing cellular data for their equipment but the need for farms to be connected to broadband is a critical consideration.

Although not currently tracked, since the pandemic there has been an increased rise in full and part time telework opportunities. Those individuals that do telework from home are not required to obtain a business license and so are difficult to count for purposes of the VATI passings form. Spotsylvania County, pre-pandemic, was known as a bedroom community to the Washington DC, Northern Virginia, and Richmond areas. As a result of the pandemic, remote telework was a primary way of working for many federal, state, local, and corporate employees while virtual learning was the primary means of instruction for many students from kindergarten up to and including college. Post-pandemic, it is anticipated that remote telework options will only continue to expand while school systems are also adopting virtual learning in lieu of weather cancellations. Every home is vital and could potentially be considered a place of work or education. All of the unserved areas are assumed to have internet services of less than 25/3 Mbps as they do not currently receive service.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

6. Describe if any blocks awarded in Rural Digital Opportunity Fund (RDOF) are included in the VATI application area. If RDOF areas are included in the VATI application, provide a map of these areas and include information on number of passings in RDOF awarded areas within the VATI application area, and Census Block Group ID number for each block group in the project area. Label Attachment: Attachment 5 – RDOF Awarded Areas Form in VATI Area

Answer:

The County has not been able to identify any RDOF awards within the County to terrestrial internet service providers. The County has identified RDOF areas within the County that have been federally awarded to Starlink; however VATI guidelines do not recognize satellite broadband as a viable solution at this time.

7. **For wireless projects only:** Please explain the ownership of the proposed wireless infrastructure. Please describe if the private co-applicant will own or lease the radio mast, tower, or other vertical structure onto which the wireless infrastructure will be installed.

Answer:

This question is not applicable as the proposed universal coverage project is a fiber to the premise solution.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

8. Network Design: Provide a description of the network system design used to deliver broadband service from the network's primary internet point(s) of presence to end users, including the network components that already exist and the ones that would be added by the proposed project. Provide a detailed explanation of how this information was determined with sources. Provide information on how capacity for scalability, or expansion, of how the network can adapt to future needs. If using a technology with shared bandwidth, describe how the equipment will handle capacity during peak intervals. For wireless projects, provide a propagation map for the proposed project area with a clearly defined legend for scale of map. Label Map: Attachment 6 – Propagation Map Wireless Project.

Answer:

Port 80 and its affiliates operate a statewide fiber optic backbone network with multiple major hubs throughout Virginia. For this project, long-haul hubs will be established as shown on Port 80's mapping in the Leavells and Thornburg areas. These long-haul hubs will have fiber routing north to their existing Ashburn POP as well as routing south to their existing Richmond POP. This dual fiber path will provide redundancy in the event of a failure or outage in either POP. Additionally, Port 80 has eight (8) local nodes planned throughout the County. Each local node will have a diverse fiber path back to their long-haul hubs to provide multi path redundancy. Port 80's backbone network equipment is 100% comprised of Cisco equipment and offers the highest level of resiliency possible. With their planned redundant fiber paths as well as dual equipment, single points of failure are eliminated. Fiber links between hubs and nodes are a minimum of 10 Gbps and fiber links between their long-haul hubs and POP's are a minimum of 100 Gbps. The Long-haul to POP fiber paths are scalable as necessary using additional channels.

As an established fiber ISP, Port 80 leverages their years' worth of generalized usage history for capacity planning. Additional capacity is added when 30% utilization, measured at peak utilization, is reached. This utilization is measured and compiled through their monitoring package (referenced elsewhere). Port 80's bandwidth augmentation schedule is very aggressive and ensures proper network capacity in the event of maintenance or link failure. Bandwidth is dedicated to each subscriber using industry standard oversubscription practices. Keeping subscribers online during peak times while maintaining the speed they purchased. Port 80's fiber optic backbone and network equipment will be able to support every resident with headroom to add additional future subscribers, future increased bandwidth speeds with the exact same reliability as the very first subscriber.

The map submitted under Port 80's granted FOIA exemption depicts their long-haul routes that pertain to this project and is considered highly confidential.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

9. Speeds: Describe the internet service offerings, including download and upload speeds, to be provided after completion of the proposed project. Detail whether that speed is based on dedicated or shared bandwidth, and detail the technology that will be used. This description can be illustrated by a map or schematic diagram, as appropriate. List the private co-applicant's tiered price structure for all speed offerings in the proposed project area, including the lowest tiered speed offering at or above 100/20 Mbps. (up to 10 points)

Answer:

Port 80's network relies on GPON and XGPON technologies. Both are deployed in parallel to enable service up to 10 Gbps at passings. Bandwidth is shared within the backbone but speed is guaranteed to each customer and measured against a publicly available speed test server within Port 80's network.

Port 80 offers various service plans for residential service. Prices shown below include a \$10 monthly discount for customers who enroll in Port 80's autopay service. For residential customers who opt not to, the prices would be \$10 higher per month.

100/100Mbps - \$79.99/month

200/200Mbps - \$99.99/month

500/500Mbps - \$139.99/month

1/1Gbps - \$169.99/month

10/10Gbps - \$319.99/month

For homes qualifying for the Affordable Connectivity Program (ACP), 25/25 Mbps service will be available for \$30/month which will be fully covered by the ACP.

For businesses, a single plan is offered. 100/100 Mbps service is available for \$139.99/month without the autopay requirement. Higher speeds from 200Mbps up to 100 Gbps are available but are priced on an individual case basis.

There are no data caps on any plans.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

10. Explain how the proposed project achieves universal broadband coverage for the locality or fits into a larger plan to achieve universal broadband coverage for the locality. If applicable, explain the remaining areas of need in the locality and a brief description of the plan to achieve universal broadband coverage. (up to 50 points)

Answer:

If 2020 has taught us anything, it is that access to and use of high-speed internet is critical for education, employment, economic development, governmental services, entrepreneurship, tourism, tele-health services, communication, commerce, entertainment, public safety, and other essential services. While high-density population areas often have multiple internet service providers that drive competition resulting in lowered pricing and increased service delivery, rural communities are coping with no, or limited internet service options further compounding the digital divide. It is anticipated that if awarded this VATI grant, Spotsylvania County will have substantially covered the entire County with high-speed broadband coverage at the completion of the implementation resulting in universal coverage. Additionally, there are an estimated 855 homes and/or businesses with driveway lengths exceeding 400 feet that will be included in this VATI project that will not incur special construction costs.

In addition to serving the 4,540 unserved passings, Port 80 has agreed to provide free public wi-fi internet access at all of the fourteen County owned public parks that are currently unserved. From July 2022 through June 2023, the estimated park attendance for these fourteen parks was 1,194,494 visitors. The County's Parks and Recreation Department runs a robust sports program and numerous special events. Having free public wi-fi internet access available at these sites will provide those individuals that cannot afford services a location that is closer to their homes with free internet access. The County and Port 80 have also had numerous discussions with personnel at Lake Anna State Park. If the Department of Conservation and Recreation provides their approval, Port 80 is willing to provide free public wi-fi internet access at the state park. In calendar year 2022, an estimated 184,223 visitors went to the state park. Finally, the County and Port 80 have had several discussions with the Spotsylvania County Schools as Port 80 is also willing to provide free public wi-fi internet access at the schools.- If approved by the newly elected Spotsylvania County School Board, this would provide an additional thirty locations within the County for free public wi-fi internet access. The total estimated student population for these thirty schools for the 2023-2024 school year is 24,456.

Another element of Port 80's robust plan is its ability to grow as the County's population increases with residential and commercial growth. By 2040, the Spotsylvania County Planning Department estimates that the County's population will be between 173,576 and 209,309 at an estimated 1% to 2% growth rate. As of May 2023, there were 11,156 housing units that were approved by the Board of Supervisors but have not yet been built. Although this future development cannot be counted in the County's current passings form, it is critical to plan for the future so that these future residents can receive internet service.

Funding of Spotsylvania County's proposed project will simultaneously further VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing communities to build, utilize, and capitalize on telecommunications infrastructure while also significantly advancing the County's goal of extending affordable broadband internet service access to every resident in Spotsylvania County.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

11. Project Readiness

Describe the current state of project development, including but not limited to: planning, preliminary engineering, identifying easements/permits, status of MOU or MOA, and final design. Prepare a detailed project timeline or construction schedule, identifying specific tasks, staff, contractor(s) responsible, collection of data, etc., and estimated start and completion dates. Applicants are encouraged to extensively discuss, where applicable, easements relating to railroad crossings, federally-owned lands and parks, partnerships with the Virginia Department of Transportation, and mobile home parks. Applicants must include Memorandums of Understanding (MOUs) or Memorandums of Agreement (MOAs) between applicants (drafts are allowable). Label Attachments: Attachment 7 – Timeline/Project Management Plan; Attachment 8 – MOU/MOA between Applicant/Co-Applicant; (up to 10 points)

Answer:

Project readiness has been ongoing for months, culminating in a notice of intent to award to Port 80 and a draft MOU. The co-applicant, Port 80, is registered with the State Corporation Commission to be able to conduct business in Virginia and is ready to proceed with this project. Port 80 is an established service provider in Virginia, in coordination with several other counties, and has a proven track record of success. They regularly communicate with the County and provided all needed materials for the grant application.

This project is ready to go to internal engineering to have construction drawings (which include final design) prepared for VDOT permit. This process would take under thirty days to complete and would continue on a rolling basis as sections are completed. As construction is performed by Port 80's affiliated company, Hosted Backbone, Port 80 has direct control over the process and resources. Easements would not be required as VDOT right-of-way would be leveraged throughout this project. Permits are generally turned around once submitted to VDOT in under a week unless limited access areas are involved. Surety is maintained on file with VDOT to expedite the process as well. Port 80 is staged and ready to begin work on the project upon notification of a VATI award and anticipate timely project completion within the 18-month award period.

12. Has the applicant or co-applicant received any VATI grants? If so, provide a list of these grants, with a detailed summary of the status of each.

Answer:

Spotsylvania County, along with its project partner Comcast, was awarded a total of \$167,260 in 2018 VATI state funds to provide last-mile broadband service along Towles Mill Road. The proposed project consisted of extending Comcast infrastructure a total of 7.9 miles passing 153 homes. Upon successful project completion, 161 homes were passed with several residences contributing to the long drop fee.

Port 80 was awarded a FY 2021 VATI grant in partnership with Goochland County with \$567,557.98 in DHCD funding, a match of \$100,000 from Goochland County and \$247,707.40 in cash from Port 80. The project had 238 grant-funded passings (plus an additional 145 non-grant funded passings) and consisted of over twenty-nine (29) miles of backbone and service drops. The project is preparing to close out as all construction activities are completed.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

13. Matching funds: Complete the funding sources table indicating the cash match and in-kind resources from the applicant, co-applicant, and any other partners investing in the proposed project (VATI funding cannot exceed 80 percent of total project cost). In-kind resources include, but are not limited to: grant management, acquisition of rights of way or easements, waiving permit fees, force account labor, etc. Please note that a minimum 20% match is required to be eligible for VATI, the private sector provider must provide 10% of the required match. If the private co-applicant cash match is below 10% of total project cost, applicants must provide financial details demonstrating appropriate private investment. If applicants and co-applicants are seeking to include prior expended funds as matching funds, Attachment 11 must be completed. Label Attachments: Attachment 9 - Funding Sources Table; Attachment 10 – Documentation of Match Funding; Attachment 11 - Prior Expended Match Form

Answer:

Spotsylvania County, as the lead applicant, will partner with Port 80 Internet Services, LLC (Port 80), as the co-applicant, to deploy a Fiber to the Premise (FTTP) broadband system that will offer internet service to those areas that are currently unserved and underserved in the primarily rural districts of Berkeley and Livingston. Upon completion, this project will provide for universal coverage in Spotsylvania County. Port 80, as the private internet service provider, will offer customers a variety of internet service packages ranging from 25/25 Mbps (for Affordable Connectivity Program subscribers) up to 10/10 Gbps. The proposed project will pass over 13,000 addresses of which 4,540 are unserved by VATI's definition. Spotsylvania County is respectfully requesting \$12,732,903.00 in VATI funds. The County will contribute \$8,850,000 in local and federal funds received through its American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF) allocation while Port 80 will contribute \$5,518,499.22 in cash. Additionally, Port 80 will provide \$1,701,716.67 as an in-kind contribution for staffing, marketing, vehicles, and equipment for a total project cost of \$28,803,118.89. If awarded, VATI will contribute 44.21% in cash, Spotsylvania County will contribute 30.73% in cash, and Port 80 will contribute 19.16% in cash and 5.90% in in-kind contributions. Funding of Spotsylvania County's proposed universal broadband project will simultaneously further VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing communities to build, utilize, and capitalize on a fiber infrastructure while also significantly advancing the County's goal of extending affordable broadband internet service access to every resident in Spotsylvania County. Please see attachments 9 and 10 for additional information.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

14. Leverage: Describe any leverage being provided by the applicant, co-applicant, and partner(s) in support of the proposed project. (up to 10 points)

Answer:

There are several areas of leverage that are not included in the proposed project budget consisting of the following:

- Multiple citizen groups will play a key role for driving the expansion of broadband and will help to disseminate information and act as resources for the public who may have questions about the project. Port 80 will register for the FCC's Affordable Connectivity Program (ACP) that will help citizens afford the monthly connection fee. The County's public libraries will conduct programs and activities that will help people to be able to utilize the internet and reduce the digital divide, and currently provide these services at sites where the County and the public sector have collaborated to provide these services. Spotsylvania County staff have spoken with representatives of the Rappahannock Health District, Spotsylvania Regional Medical Center, Mary Washington Healthcare and the upcoming VA clinic under construction in Spotsylvania County about supporting telemedicine programs once service is established.
 - This grant, when combined with the County's previous VATI grant for the Towles Mill Road, will bring universal coverage to Spotsylvania County.
 - The County has spent significant local funds in making sure that all County owned buildings to include schools, governmental buildings, fire and rescue stations, courts, community centers, and utilities are connected via high speed broadband connection which aids in achieving universal coverage.
 - The County is also providing their conduit infrastructure to reduce the total project costs associated with this VATI request.
 - The Virginia Department of Transportation (VDOT)'s right-of-way (ROW) will be leveraged for placement of new fiber assets.
 - The County will also provide in-kind project management and grant administration services. The County will provide staff to assist with items such as creating GIS maps, updating websites to promote information on broadband availability, making social media posts and creating materials for public education and marketing, and other administrative duties as needed. The Spotsylvania County Department of Community Engagement and Public Information assist with marketing.
 - All students in Spotsylvania County Public Schools have either a Chromebook or laptop. For middle and high school students, these laptops combined with universal coverage will enable them to complete their schoolwork.
 - Assuming the newly elected School Board approves the request, there will be thirty schools that will be able to host free public wi-fi access. Combined with the fourteen County owned parks that will also be equipped with this service, there will be a total of forty-four locations across the County that residents can go to to access free public wi-fi.
15. Communications Plan: Describe efforts to keep the public informed of project progress and the broadband adoption plan.
- a. Explain how you plan on communicating the project status to stakeholders, including but not limited to County leadership, project areas residents, etc. (Up to 10 points)
 - b. Explain how you plan to promote customer take rate, including marketing activities, outreach plan, and other actions to reach the identified serviceable units within the project area. Provide the anticipated take rate and describe the basis for the estimate. (up to 10 points)
 - c. Describe any digital literacy efforts to ensure residents and businesses in the proposed project area sufficiently utilize broadband. Please list any partnering organizations for digital literacy, such as the local library or cooperative extension office.

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

Answer:

As noted in the map in Attachment 1, the suburban part of the County is substantially covered with high-speed broadband, and in many cases, offers opportunity for competition among internet service providers. The lack of coverage in the rural areas of the County, primarily Livingston and Berkeley, highlights the digital inequity for rural premises, and also highlights the disadvantages of rural living that allows telework, remote schooling, small business entrepreneurship, lack of access to telehealth and telemedicine capabilities, etc.

Promotion of the potential project is ready to begin. The goal is to make members of the public aware of the initiative by having as many public presentations as possible, such as discussions and presentations held at the broadband committee meetings and at the Board of Supervisors meetings. Outreach will also be done to the local media in an attempt to produce regular articles about the plans to expand broadband in the region. The publicity should generate interest from citizens and it is expected that citizens will be emailing and calling to inquire if they will receive service if the grant is awarded.

The Spotsylvania Department of Community Engagement and Public Information will assist in coordinating the marketing effort to share on websites and with media sources. They will work with Port 80 to establish a marketing plan with target dates for social media blasts, press releases, radio interviews, public speaking engagements, public forums, etc. The County will conduct public outreach including citizen surveys to promote the proliferation of broadband and to help project take rates. An anticipated minimum take rate of 60% is predicted, based on citizen and community feedback and demand for high-speed broadband service. The affordability of the service along with an ever growing need for broadband, especially due to COVID-19, could mean a much higher rate may be possible.

For those individuals interested in improving their education and digital skills for free the local regional library is an excellent resource. The Central Rappahannock Regional Library (CRRL), which serves the City of Fredericksburg, and the Counties of Stafford, Spotsylvania, and Westmoreland, has ten library branches with two located in Spotsylvania County, two satellite locations, and a creative maker facility. CRRL offers a broad spectrum of technology based classes. A sample of some of their classes include:

- Computers for Beginners
- eBooks/eAudio Downloading
- Email and Internet
- Social Networking
- Google Tips: Search like a Wizard
- Job Searching and Resumes Online
- Medical Resources Online
- Smartphones and Table Computers

CRRL also provides Universal Online Classes covering over 600 topics. For library patrons, all of these services are free. Areas of study within the Universal Online Classes include Accounting, Business, Entrepreneurship, Health and Medicine, How to Do It, Alternative Medicine, Career Training, Finance, History, Language Arts, Crafts and Hobbies, Computer Training, General Education, Homeschooling, Law/Legal/Criminal. Mathematics, Personal Development, Science, Spiritual Studies, Web Development, Office Skills, Pet and Animal Care, Self-Help, Teacher Resources, Parenting and Family, Psychology, Special Education, Test Preparation, and Writing Skills. Patrons can go at their own pace while earning CEUs and certificates.

CRRL's IdeaSpace also provides equipment such as an AV Booth, 3D Printers, 3D Scanner, Laser Cutter, Drawing

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

Tablet, and a Video Conversion Station for those interested in working with this technology based equipment. Once again, all of this equipment can be reserved for free by library patrons upon completion of a 2 hour training program. Although this equipment can only be utilized at the IdeaSpace location, CRRL also has laptop computers that can be signed out for two weeks at a time.

The County is concerned about digital literacy and will be addressing the issue individually and collectively. County libraries have already teamed up for programs that will help the people who will gain access to broadband via the grant. The schools will be assisting in programs that will also help people gain access to broadband via the grant, and ensure those who cannot afford the service are offered programs for support. Port 80 is registered for the Affordable Connectivity Program funding program for relief to citizens with the monthly service fee. Initial discussions with providers of medical services in the region were held to talk about how important training will be to advance the use of Telemedicine. The County will continue to explore federal, state and private grants to help obtain equipment for those who cannot afford it and to train people how to use computers for telehealth services. The County seeks to achieve the highest take rates possible and does not want lack of funding to be a stumbling block for County citizens once internet access is available.

16. Project Management: Identify key individuals who will be responsible for the management of the project and provide a brief description of their role and responsibilities for the project. Present this information in table format. Provide a brief description of the applicant and co applicant's history and experience with managing grants and constructing broadband communication facilities.

Answer:

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

Spotsylvania County has received and managed numerous federal, state, and corporate grants as well as funds from non-profit organizations. The Spotsylvania County Board of Supervisors has a Grants Management Policies and Procedures document that must be followed.

On the County side, there will be two key positions. The first position is the newly created Broadband Manager. This position will support the expansion of broadband internet services for Spotsylvania County. The Broadband Manager will be responsible for providing management support to include planning, installation, configuration, operations, project management and maintenance of systems and applications. Work involves hands-on skills in systems administration and strong project management skills to lead project teams from kickoff to launch for broadband solutions, both cabled and wireless. This position will provide long term continuity support for the County after the implementation period.

The second position is the Grants Manager. This position is responsible for research development, review, and editing of grant proposals as well as assists in the acceptance, administration, close out, and retention of grant awards. This position is also responsible for understanding the County's financial system as well as State, Federal and other foundation grant requirements. This position is currently filled by Annette D'Alessandro who has over twenty-two years of experience working with various institutions to include international, federal, state, and local agencies, as well as corporations, universities, foundations, and non-profits in the application, negotiation, and administration of over \$164 million in grants and sub-awards.

For Port 80 Internet Services, two key individuals will be intimately involved with the project. Evan Weiner has been in the technology industry for his entire professional career, spanning a period of nearly twenty five years. He has experience and has worked with or for virtually every type of business including local and state government, military, large enterprise, and small businesses. He specializes in architecting high availability networks in mission critical networks. He is responsible for construction and technical aspects of the firm.

Keith McMichael has over 30 years experience in the consumer electronics design and installation industry. Experienced in every aspect from design, installation, service & maintenance, growing multiple companies to multi million dollar organizations. Specializing in technical operations, he is responsible for daily operation, installations and customer service for all Port 80 clients.

Both Mr. Weiner and Mr. McMichael have extensive experience with managing grants and constructing broadband communication facilities through their involvement in Port 80 since its inception. The two have been instrumental in delivering on-time and on-budget grant projects during the COVID-19 pandemic with CARES funding through DHCD as well as a FY21 VATI grant in partnership with Goochland County.

As previously mentioned, Spotsylvania County, along with its project partner Comcast, was awarded a total of \$167,260 in 2018 VATI state funds to provide last-mile broadband service along Towles Mill Road. The proposed project consisted of extending Comcast infrastructure a total of 7.9 miles passing 153 homes. Upon successful project completion, 161 homes were passed with several residences contributing to the long drop fee. Spotsylvania County also partnered with DataStream on a CARES Act Broadband Initiative. The project cost was \$822,360. The grant award notification was received on December 4, 2020 and the project was completed on December 23, 2020. The funding was used for broadband infrastructure for the Belmont and Wilderness Towers.

Port 80 was awarded a FY 2021 VATI grant in partnership with Goochland County with \$567,557.98 in DHCD funding, a match of \$100,000 from Goochland County and \$247,707.40 in cash from Port 80. The project is preparing to close out as all construction activities are completed

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

17. Project Budget and Cost Appropriateness

Budget: Applicants must provide a detailed budget that outlines how the grant funds will be utilized, including an itemization of equipment, construction costs, and a justification of proposed expenses. If designating more than one service area in a single application, each service area must have delineated budget information. For wireless projects, please include delineated budget information by each tower. Expenses should be substantiated by clear cost estimates. Include copies of vendor quotes or documented cost estimates supporting the proposed budget. Label Attachments: Attachment 12 – Derivation of Costs; Attachment 13 - Documentation of Supporting Cost Estimates. (up to 10 points)

Answer:

Please see attachments 12 and 13 for the requested information regarding project budget and cost appropriateness.

18. The cost benefit index is comprised of state cost per unit passed. Individual cost benefit scores are calculated and averaged together to create a point scale for a composite score. Provide the following:
- Total VATI funding request

- Number of serviceable units
(up to 125 points)

Answer:

Total VATI Funding Request: \$12,732,903.00

Number of serviceable units: 4,540

19. Commonwealth Priorities (Up to 50 points)

Additional points will be awarded to proposed projects that reflect Commonwealth priorities. If applicable, describe the following:

- Businesses, community anchors, or other passings in the proposed project area that will have a significant impact on the locality or region because of access to broadband.

- Unique partnerships involved in the proposed project. Examples include electric utilities, universities, and federal/state agencies.

- Digital equity efforts to ensure low to moderate income households in the proposed project area will have affordable access to speeds at or above 100/20 mbps, include information regarding the internet service provider's participation in the Affordable Connectivity Program

- The co-applicant's efforts to mitigate supply chain constraints, including labor shortages and order-to-delivery delays on telecommunications materials required to construct broadband networks.

- The applicant's and co-applicant's efforts to promote broadband adoption, including, but not limited to: telehealth, smart farming, e-entrepreneurship, and distance learning.

Answer:

- In addition to serving the 4,540 unserved passings, Port 80 has agreed to provide free public wi-fi internet access at all of the fourteen County owned public parks that are currently unserved. From July 2022 through June 2023, the estimated park attendance for these fourteen parks was 1,194,494 visitors. The County's Parks and Recreation Department runs a robust sports program and numerous special events. Having free public wi-fi internet access available at these sites will provide those individuals that cannot afford services a location that is closer to their homes with free internet access. The County and Port 80 have also had several discussions with the Spotsylvania County Schools as Port 80 is also willing to provide free public wi-fi

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

internet access at the schools.- If approved by the newly elected Spotsylvania County School Board, this would provide an additional thirty locations within the County for free public wi-fi internet access. The total estimated student population for these thirty schools for the 2023-2024 school year is 24,456.

b. The County and Port 80 have also had numerous discussions with personnel at Lake Anna State Park. If the Department of Conservation and Recreation provides their approval, Port 80 is willing to provide free public wi-fi internet access at the state park. In calendar year 2022, an estimated 184,223 visitors went to the state park.

c. If the proposed project is funded, and the newly elected School Board approves the request, it is likely that there will be an additional forty-four free public wi-fi sites located throughout the County. For those that are unable to afford a monthly internet service connection, this will provide them with opportunity to access the internet at a location close to their home. Additionally, Port 80 has agreed to provide a monthly service package of 25/25 Mbps for those clients that are eligible for the Affordable Connectivity Program. The cost of this package will be the equivalent to what the recipient will receive as part of the Affordable Connectivity Program. This will essentially provide for free monthly internet service for qualified participants. In partnership with Port 80 and other regional non-profits, the County will advertise this program and seek other funding opportunities to address digital equity efforts.

d. As detailed in other areas regarding Port 80's previous projects, they delivered on time and on budget during the height of the COVID pandemic with labor shortages, shutdowns, material scarcity, and other challenges. Port 80 also maintains a sufficient supply of material in stock to construct approximately twenty miles of new backbone and distribution at any given time. Further, by performing construction work in-house and/or by Port 80's affiliated companies, and with Port 80's standard stock of material, Port 80 is able to mitigate supply chain constraints and address labor shortages. Port 80 also has agreements in place with their suppliers for standing deliveries of material that could be directed to this project if needed.

e. The proposed project is seen as the final step towards universal coverage for Spotsylvania County. The County is a large locality, with a substantial portion of its acreage unable to receive access to high speed broadband. It is the desire of the County to partner with a provider who desires to serve our area and grow their business in a sustainable and customer-service oriented manner. Staff has completed exhaustive assessments of addresses to know exactly who has coverage and who does not. The new and strengthened relationships between the County and other county and community boards has provided better communication and will facilitate planning in the future. It is anticipated that if awarded this VATI grant, Spotsylvania County will have substantially covered the entire County with high-speed broadband coverage at the completion of the implementation. This also opens the door to assign adjoining localities on future grants for expansion of broadband services, where needed. Again, sharing resources and working collectively on plans is crucial.

While the number of businesses may be small, the impact on home-based operations will be significant. Owners will have opportunities that are severely restricted by access to only cellular data or in some cases nonexistent access. It's anticipated that the County will see a growth in home-based business based on new access to the internet. This could provide new revenues to the County and benefit everyone as the areas sees economic improvements. As mentioned before, the Covid-19 Pandemic has highlighted the significant need for access to high speed internet. Every home that houses employees could be seen as a potential business location. The need for broadband to every home has never been more important. Access to and use of high- speed internet is critical for education, employment, economic development, governmental services, entrepreneurship, tourism, telehealth services, communication, commerce, entertainment, public

Application to DHCD Submitted through CAMS

Spotsylvania County

Spotsylvania County's FY 2024 VATI Request for Universal Coverage

safety, and other essential services.

The County is in a unique position to be able to work with a single service provider for a fiber to the premise internet services that will blend in well with the existing cable service franchisees in the County. The success of Port 80 will rely on connectivity and the customer base, not only in Spotsylvania County but in other localities as well.

Broadband adoption for our citizens starts with everyone having the service available to their home. This project will address the most remote homes and greatly reduce the geographic digital divide. The citizen's groups are excited about entering into the next phase of resolving inequities by helping to make sure people know how to use the internet, have proper training and access to equipment. The County and Port 80 will be exploring multiple funding options including telemedicine grants, promoting the FCC Affordable Connectivity Program, soliciting for non-profits and agencies to support the less fortunate to be able to afford the monthly service bill and possess the equipment that they need.

20. **Additional Information**

Please attach any letters of support from stakeholders. If the applicant is not a locality(s) in which the project will occur, please provide a letter of support from that locality.

Attachment 14 – Letters of Support.

Provide the two most recent Form 477 submitted to the FCC, or equivalent, as well as point, polygon, and, for wireless providers, RSSI shapefiles for the project area **in .zip file form**. With attachments 17 through 20, attach any other information that the applicant desires to include. Applicants are limited to four additional attachments.

Label Additional Attachments as:

- a. Attachment 15 – Two most recent Form 477 submitted to the FCC or equivalent
- b. Attachment 16 - Point and Polygon shapefiles, in.zip file form, showing proposed passings and project area
- c. Attachment 17 - For wireless applicants: shapefiles, in .zip file form, indicating RSSI projections in the application area
- d. Attachment 18 – XXXXXXXX
- e. Attachment 19 – XXXXXXXX
- f. Attachment 20 – XXXXXXXX

Answer:

N/A

VATI 2024
Supplemental Application Question

Applicant: Spotsylvania County

Project Name: Spotsylvania County's FY 2024 VATI Request for Universal Coverage

The question below is question e. from the Commonwealth Priorities section of the 2024 Virginia Telecommunication Initiative (VATI) Guidelines. Please answer the question using this form and email to VATI@dhcd.virginia.gov.

Commonwealth Priorities

20. Additional points will be awarded to proposed projects that reflect Commonwealth priorities. If applicable, describe the following:

e. The co-applicant's effort to mitigate costs and delays that may be associated with make-ready and other permitting requirements anticipated for network deployment.

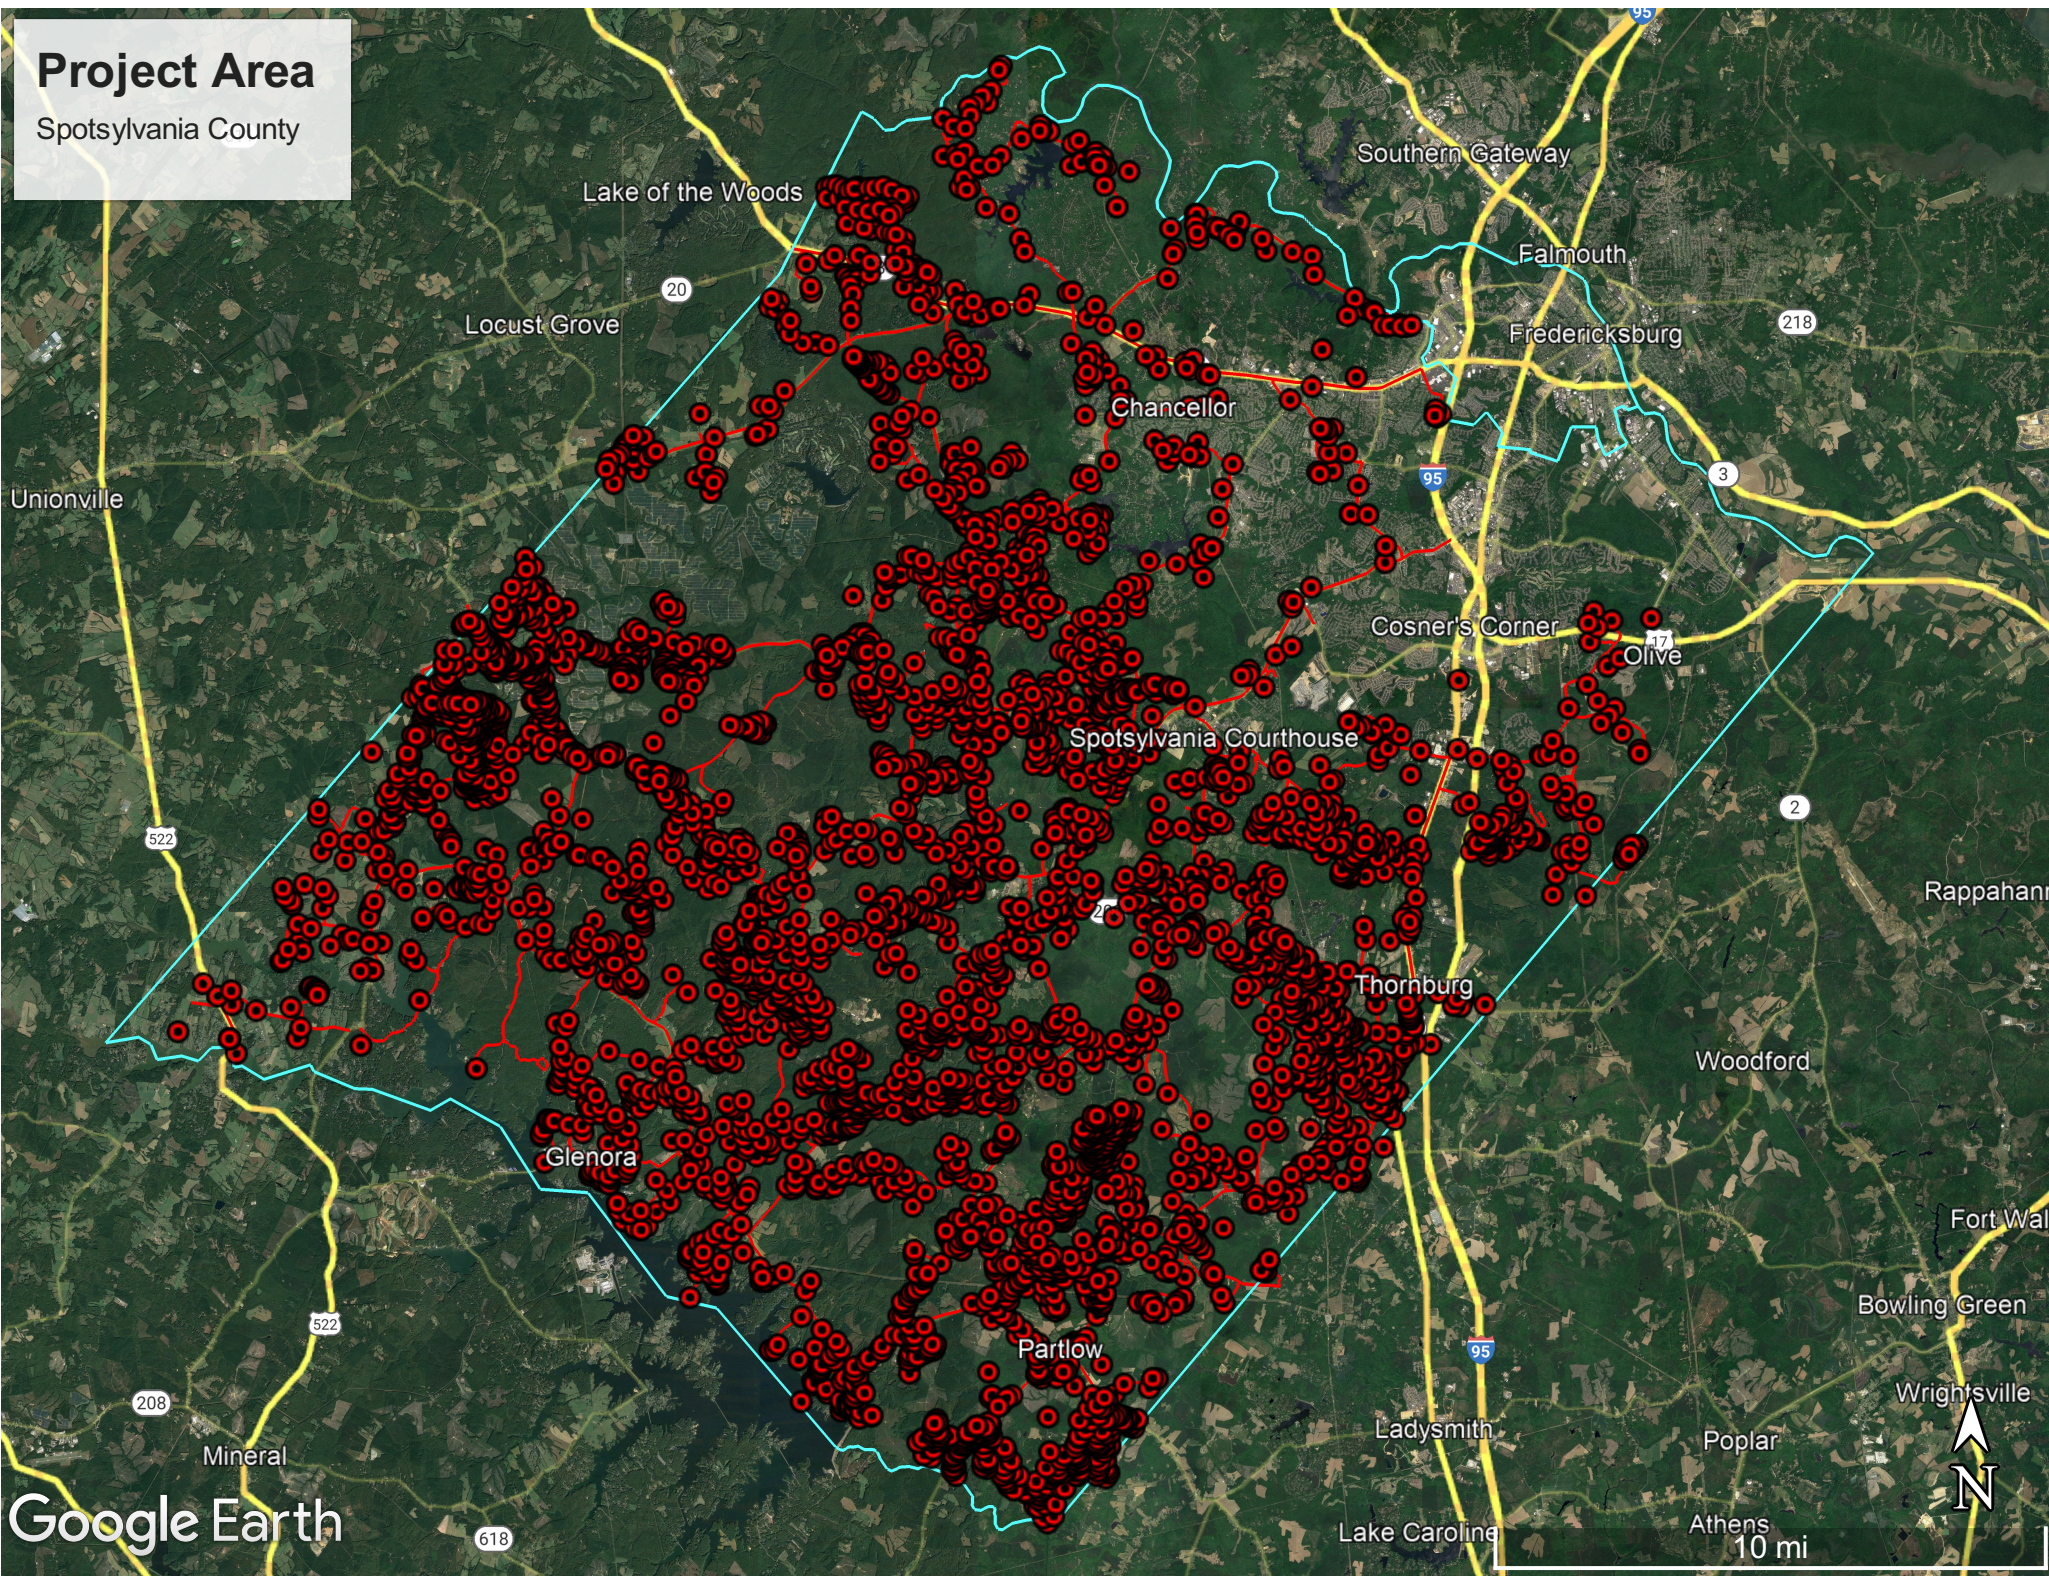

Port 80 Internet Services, LLC has extensive experience navigating supply chain and permitting issues. Port 80 has firm quotes for services and material, with guaranteed delivery times, that are not subject to change and also has standing material orders in place with distribution channels as well as manufacturers. These standing orders as well as Port 80's stock material can be allocated to this project the moment Port 80 is approved to work. Port 80's staff has been working with distributors to ensure additional material orders can be supported and delivered in the timelines required for the project. Even in the height of material shortages Port 80 has been able to supply new fiber builds and network expansion when others have fallen short.

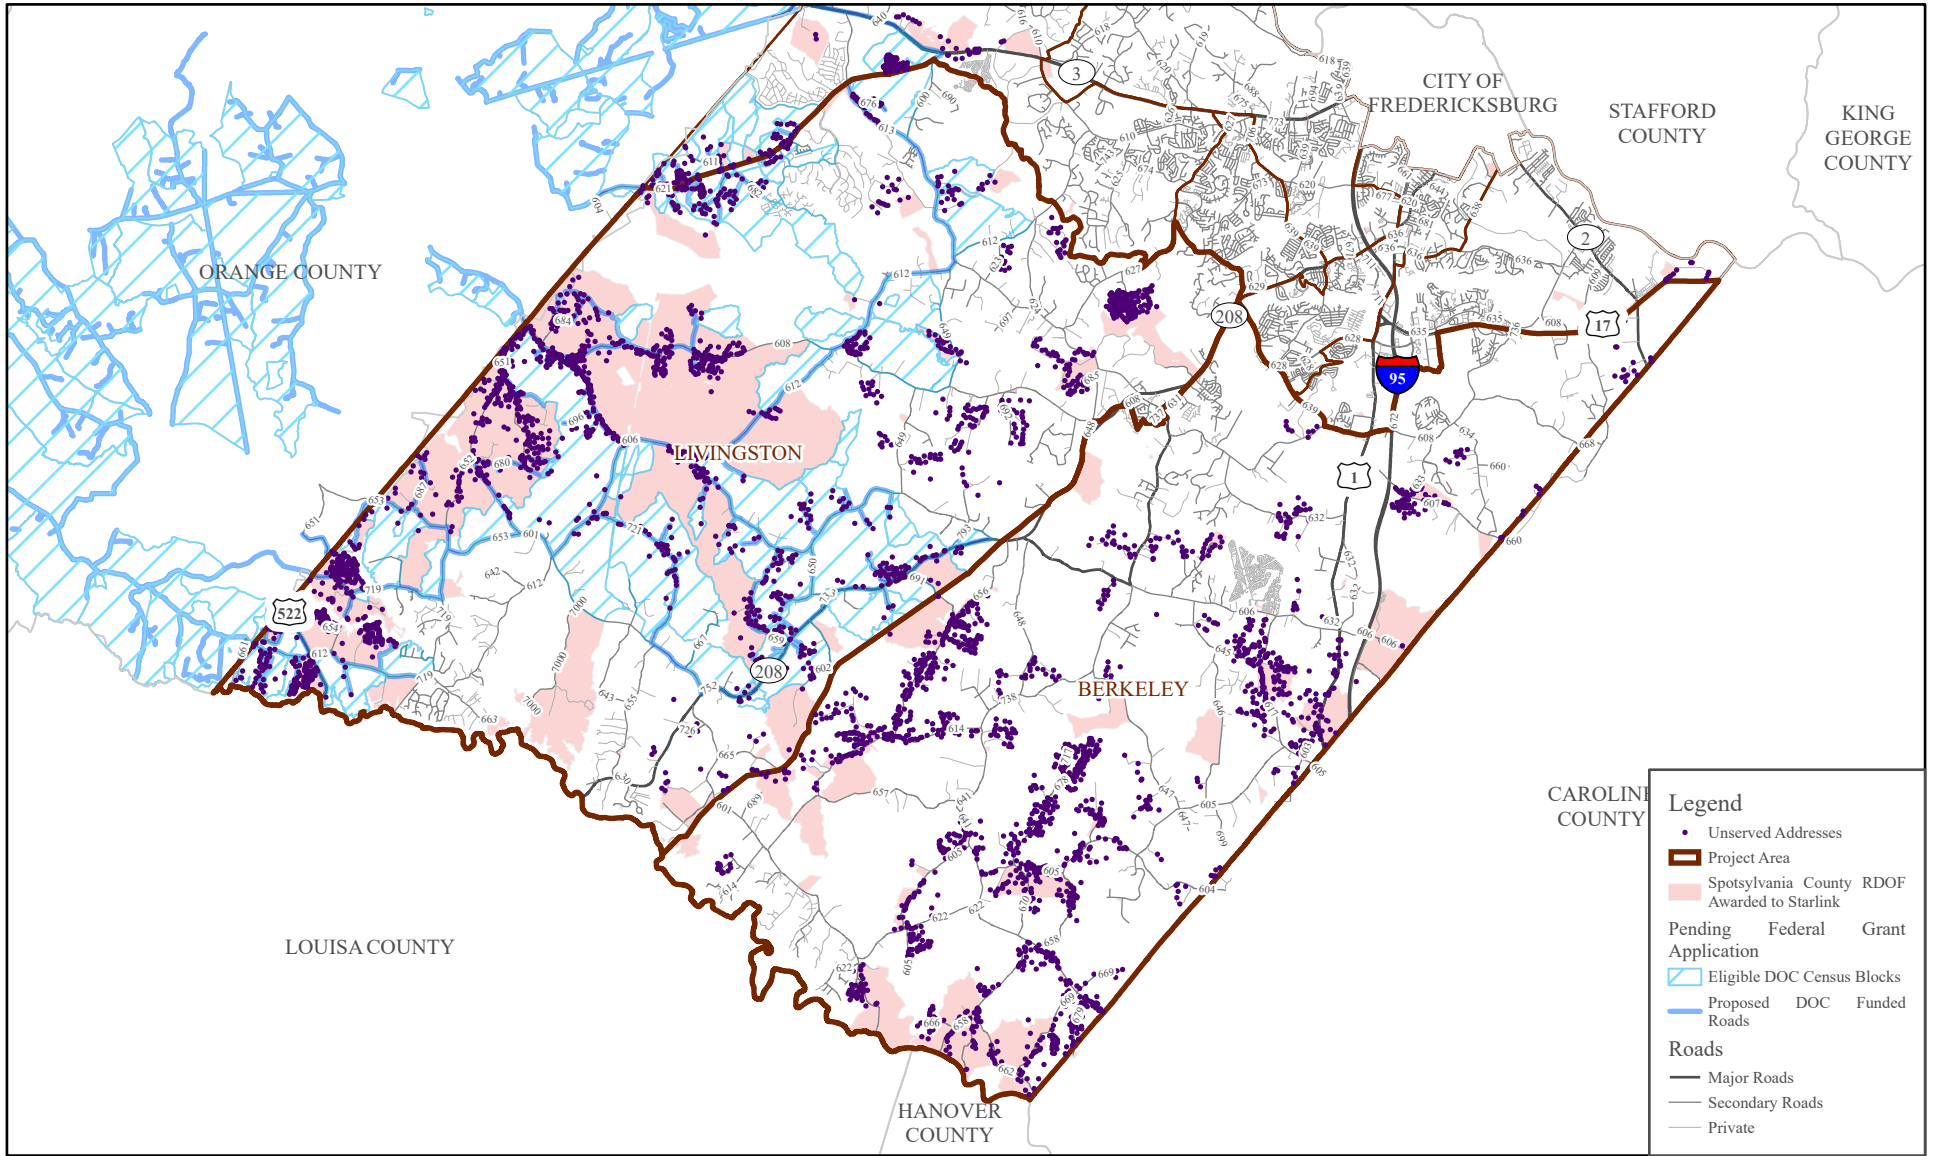

In addition to the information on the material above, Port 80's affiliated company, Hosted Backbone, LLC, handles the design, engineering, permitting, and construction processes in-house. Hosted Backbone has strong relationships with VDOT and other applicable permitting agencies. Hosted Backbone routinely permits projects throughout the Commonwealth and maintains a surety on file with VDOT to expedite permit issuance. The project does have two (2) railroad crossings planned as part of this project. While railroad crossing permits can take extra time, these two (2) crossings only affect a small number of passings. Port 80 plans to apply for these railroad crossing permits very early to allow time for railroad review and processes to take place. Concurrently the build will continue in other areas of the project.

There is no make-ready associated with this project as Port 80 operates an underground network.

2023 Virginia Telecommunication Initiative (VATI) Passing Form

Type of Passings	Total Number of Passings in the Project Area ¹	Passings in the Project Area, without Special Construction Costs Required ²	Passings with Special Construction Costs budgeted in the Application ³	Number of Passings with Speeds at 25/3 or below in Project Area ⁴
Residential	4228	4228		4228
Businesses (non-home based)	185	185		185
Businesses (home-based)	109	109		109
Community Anchors	17	17		17
Non-residential	1	1		1
Total	4540	4540		4540

Note: The Total Number of Passings **MUST** be equal to the Residential, Business (non-home based), Non-residential and Community Anchors sum.

Note: Do not include passings in RDOF awarded areas that were awarded to the co-applicant; these passings should be included in the RDOF Passings Form. Passings included in this application in RDOF awarded areas that were not awarded to the co-applicant, unless successfully challenged, are considered unserved and should be counted as passings in this form.

¹The total number of structures in the project area that can receive service. See definition of passing below for more detail.

²The number of structures in the project area that will not require special construction costs to provide service to. These passings fall within the broadband provider's standard service connection drop length and do not require nonstandard equipment or any additional fees above normal service connection fees required to provide broadband access to a premise.

³The number of structures in the project area with all construction costs budgeted in the application. These passings will not require any additional special construction costs beyond those budgeted for in the VATI application.

⁴The number of structures in the project area that do not have access to internet at speeds of at least 25 mbps download and 3 mbps upload.

Definitions

Passing – any structure that can receive service. Multi-unit structures may be counted as more than 1 passing, provided individual connections and account are planned at that structure.

Business – An organization or entity that provides goods or services in order to generate profit. Businesses based in residential homes can count if they are a registered business (BPOL, LLC, etc.).

Community Anchor - schools, libraries, medical and health care providers, public safety entities, community colleges and other institutions of higher education, and other community support organizations and agencies that provide outreach, access, equipment, and support services to facilitate greater use of broadband service by vulnerable populations, including low-income, unemployed, and the aged.

Non-Residential Passing – places of worship, federal, state, or local facilities or other potential customers that are neither a residence, business or a community anchor as defined above.

2023 Virginia Telecommunication Initiative (VATI) RDOF Passings Form

Type of Passings	Total Number of Passings in the Project Area that lie within Preliminarily Awarded RDOF Areas ¹
Residential	0
Businesses (non-home based)	0
Businesses (home-based)	0
Community Anchors	0
Non-residential	0
Total Number of RDOF Passings	0

*Note: The Total Number of RDOF Passings **MUST** be equal to the Residential, Business (non-home based), Non-residential and Community Anchors sum.*

Definitions

Passing – any structure that can receive service. Multi-unit structures may be counted as more than 1 passing, provided individual connections and account are planned at that structure.

Business – An organization or entity that provides goods or services in order to generate profit. Businesses based in residential homes can count if they are a registered business (BPOL, LLC, etc.).

Community Anchor - schools, libraries, medical and health care providers, public safety entities, community colleges and other institutions of higher education, and other community support organizations and agencies that provide outreach, access, equipment, and support services to facilitate greater use of broadband service by vulnerable populations, including low-income, unemployed, and the aged.

Non-Residential Passing – places of worship, federal, state, or local facilities or other potential customers that are neither a residence, business or a community anchor as defined above.

ATTACHMENT SIX – PROPAGATION MAP AND HEAT MAP IF WIRELESS PROJECT

As the proposed project for universal coverage in Spotsylvania County is a Fiber to the Premise (FTTP) broadband system, the propagation map and heat map are not required.

**MEMORANDUM OF AGREEMENT BETWEEN THE COUNTY OF SPOTSYLVANIA
AND PORT 80 INTERNET SERVICES, LLC**

**FOR BROADBAND EXPANSION PROJECT UNDER VIRGINIA
TELECOMMUNICATION INITIATIVE**

This Memorandum of Agreement (this “Agreement”) is entered into as of the date last set forth below, by and between Spotsylvania County, Virginia (“County”) and Port 80 Internet Services, LLC, a Virginia Limited Liability Company (“Port 80”). County and Port 80 are each a “Party” and are, collectively, the “Parties.”

WHEREAS, the Commonwealth of Virginia has been authorized to distribute and administer the Virginia Telecommunication Initiative (VATI), and the Department of Housing and Economic Development (DHCD) has been authorized to distribute and administer funds awarded through the VATI grant-making process; and

WHEREAS, pursuant to the VATI program guidelines and statutory authority, the primary objective of VATI is to provide financial contribution to supplement construction costs by private sector broadband providers in partnership with local units of government to extend broadband internet service to areas presently unserved by any broadband provider.

WHEREAS, the County issued RFP 24-07-TV, seeking an Internet Service Provider as a co-applicant with the County for the 2024 VATI Grant applications and Port 80 was selected as co-applicant.

WHEREAS, the County filed an application dated December __, 2023, proposing a partnership with Port 80 to deploy broadband within the County (“Project”); and

WHEREAS, DHCD has agreed to award the County a VATI grant in the amount of [INSERT NUMBER (\$)] (“VATI Grant”) to partner with Port 80 to deploy broadband in portions of the County; and

WHEREAS, County and Port 80 intend to commit matching funds to the VATI Project with the County contributing an amount of **Eight Million Eight Hundred Fifty Thousand dollars \$8,850,000.00** (“County VATI Match”) and Port 80 contributing **Seven Million Two Hundred Twenty Thousand One Hundred Sixty-Five Dollars and Eighty-Nine Cents. \$7,220,165.89** (“Port 80 VATI Match”), subject to the terms of this Agreement intend to commit matching funds to the Project in local contributions designated as match for the VATI Project (the “County VATI Match”);

WHEREAS, pursuant to Resolution R24- , the Spotsylvania County Board of Supervisors authorized the County to enter into this Agreement and expend the grant funds awarded by DHCD and matching County funds to Port 80 for the Project subject to the terms and conditions herein; and

NOW, THEREFORE, in consideration of the mutual covenants, terms, and conditions set forth herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows.

1) Definitions.

- a) "Broadband Service" means high speed internet service that meets or exceeds 100Mbps download and at least 20 Mbps upload speeds and be scalable to a minimum of 100 Mbps symmetrical for download and upload speeds based on future technology advances.
- b) "Final Completion" means the date of approval by DHCD of the final Post Conditional closeout reports by Port 80 that construction of the Network has been completed by Port 80 and the Project locations are Serviceable. Final Completion of the Project shall not release Port 80 from any warranty or guarantee of its work of materials contained herein, or any Post-Conditional Closeout reporting requirements of this Agreement.

2) Term and Termination

- a) This Agreement shall commence on June 1, 2024 (the "Effective Date") and shall expire upon the date of Final Completion, unless terminated sooner in accordance with the provisions of this Agreement.
- b) In the event Port 80 breaches any term of this Agreement, the County may provide written notice of such breach to Port 80. Unless otherwise provided Port 80 shall have ten (10) days from the date of such notice to cure the breach. Upon failure of Port 80 to cure the Breach, the County may immediately terminate the contract.
- c) Any funds for payments by the County to Port 80 pursuant to this Agreement are subject to the availability of an annual appropriation for this purpose by the Spotsylvania County Board of Supervisors and the Virginia General Assembly. If Grant Funds (as defined below) are not appropriated for any fiscal year subsequent to the one in which the Agreement is entered into, the Agreement shall terminate effective at the end of the fiscal year for which funds were appropriated. The County will not be obligated to make any payments under the Agreement beyond the amount appropriated for payment obligations under the Agreement. The County will provide Port 80 with written notice 30 calendar days prior to the date of termination, but failure to give such notice shall be of no effect and the County shall not be obligated under this Agreement beyond the date of non-appropriation.
- d) Termination of this Agreement as permitted herein shall not limit the legal rights

and remedies otherwise available to the terminating Party.

3) Project Description.

- a) Port 80 shall construct a plant capable of delivering Broadband Service to certain unserved premises in Spotsylvania County as set forth in Exhibit A ("Project Area"). The Project Area includes 3,725 passings that are unserved or underserved. This includes approximately 522 miles of new backbone and distribution fiber construction throughout the County.
- b) Exhibit A to this Agreement contains a list of addresses included in the Project Area.

4) Performance Bond

- a) Port 80 shall furnish the County a Performance Bond (the "Performance Bond") in the sum of the [INSERT NUMBER] that shall be equal to the Grant Funds (defined below) allocated for this Project, conditioned upon the faithful performance of this Agreement.
- b) The Performance Bond shall be executed by one or more surety companies selected by Port 80 that are authorized to do business in Virginia.
- c) Port 80 shall pay the cost of the Performance Bond. This cost amount is an additional cost that shall not be included in amount pledged by Port 80 in the Port 80 VATI Match.
- d) Upon Final Completion, the County shall pay Port 80 the Performance Bond Reimbursement (defined below) the stated amount in Section 10. This stated amount shall be the full amount County will reimburse Port 80 for obtaining the Performance Bond section regardless of the actual cost Port 80 incurs. The Performance Bond Reimbursement is an additional cost and shall not be included in the amount pledged by the County in the County VATI Match.
 - i) In the event Port 80 fails to achieve Final Completion, Port 80 shall not be entitled to the Performance Bond Reimbursement or set offs

5) Performance.

- a) The Parties mutually agree and acknowledge that this Agreement is principally intended to address access to and provision of Broadband Service to the Project Areas as provided in Exhibit A. In consideration of the Project funds and in accordance with the terms of this Agreement, Port 80 shall undertake and complete the Project, which shall require Port 80 to design, build, own, operate, manage and maintain the Network that will provide access to Broadband Service in the County.
- b) Port 80 shall achieve Final Completion; provided, however, that the date for Final Completion will be extended for each day of delay caused by the

occurrence of an Excusable Delay Event, if such extension is previously approved in writing by DHCD.

- c) Port 80 acknowledges that it is solely responsible for all Project decisions, the preparation of all plans and specifications, and for developing, performing, and completing the Project.
- d) Upon Final Completion, Port 80 will offer Broadband Service to the unserved locations within the Project Area, as shown on Exhibit A.

6) Project Requirements.

- a) Project Milestones. Port 80 shall prepare and provide milestones for submission to DHCD. Port 80 shall provide speed validation data to ensure that the proposed outcomes have been met and broadband speeds meet VATI criteria.
- b) Project Status Reports. Port 80 shall assist the County in providing information necessary for the County to provide monthly Project status reports to DHCD, by the [INSERT DATE] of each month until Project closeout. PORT 80 shall provide the following information by the [INSERT DATE] of each month, or next business day if the [INSERT DATE] falls on a weekend, to the County Project Manager, in the format shown on the DHCD template (**attached hereto as Exhibit C**).
- c) Remittances. Port 80 agrees to submit, or make invoices and financial information reasonably related to the Project available to the County for inspection, for reporting of remittances to DHCD not more than quarterly. Financial information shall include all Project costs including overruns. If Port 80 seeks to protect any of its information as proprietary, it must do so by written request to DHCD in accordance with the provisions of Virginia Code § 2.2-3705.6(32), prior to providing the documents to DHCD. The County reserves the right to request additional Project-related information as required by the County and DHCD.
- d) Permits. Port 80 shall be responsible to obtain, or cause others to obtain, any required permits and will endeavor to obtain the Permits, approvals, and other entitlements that are required under applicable laws for the development or construction of the Project. The County shall not be held liable for delay in any permit issued by a County agent, where Port 80 has not complied with all relevant local, state and federal codes, regulations, and laws.
- e) Post-Construction Reporting. Port 80 shall be required to report to DHCD the number of new serviceable addresses, number of new subscribers added,

broadband speeds, and total VATI and non-VATI funds expended, and actions taken on key deliverables during the 6-month and 12-month period following final Project completion referenced in Section 2(a).

- f) For a period of five years following the completion of the VATI Project, PORT 80 agrees to allow either DHCD or the County to inspect, on reasonable advance notice to PORT 80, the internal quality control/quality assurance records maintained by PORT 80 in the ordinary course of business relating to the installation and operation of the VATI Project. These documents shall be made available to the County's employees, agents, representatives, Contractors or other designees, during normal business hours at Port 80's office or place of business in Spotsylvania, Virginia. In the event that no such location is available, then these documents and records, together with the supporting or underlying documents and records, shall be made available for review at a time and location in Spotsylvania, County chosen by the County.

7) Representations and Warranties

- a) Port 80 hereby represents and warrants to County that all information and documentation submitted to County and/or DHCD by Port 80 in connection with or which accompanied the VATI Application and/or in connection with any contract or agreement that may result from the VATI Award was true and accurate in all material respects when provided.
- b) Port 80 hereby represents and warrants to County that no principal, partner, shareholder, director, officer, member, manager or other employee of PORT 80 with managerial control or responsibility over Port 80 or any significant aspect of Port 80's operations in the Commonwealth of Virginia was employed (i) by DHCD and involved in the evaluation and scoring of applications received for consideration of a VATI award during a period of one (1) year prior to the date of the announcement of VATI project awards, or (ii) by the Governor's administration during a period of two (2) years prior to the date of the execution of this Agreement.
- c) Port 80 hereby represents and warrants that the certifications set forth in subsections (a) and (b) above are true and correct in all respects and that County and DHCD may reasonably rely upon such certifications as statements of preexisting facts.

8) Project Personnel.

- a) Each Party will provide written notice to the other Party within five (5) business days of the Effective Date identifying the person serving as each Party's Project Manager to support effective communication and to report on the Project's progress. Each Party's notice will also include the address, phone numbers, and email address for the Project Manager. In the event there is a change in a Party's Project Manager, the affected Party will provide (a) prompt written notice to the other Party of the change and (b) the new Project Manager's contact information.

9) Ownership of Project and Service Requirements.

- a) Port 80 shall retain ownership in and have exclusive use of the plant constructed and all equipment used or deployed in connection with the Project.
- b) Port 80 shall operate and maintain the Network consistent with applicable industry standards and offer Broadband Service to residential premises that are Serviceable in the County under terms, conditions and prices reasonably consistent with what Port 80 offers to subscribers in the remainder of the County.

10) Payment.

- a) Grant Funds. In consideration of Port 80's agreement to complete the Project as outlined herein, County shall be responsible for distributing to Port 80 TWELVE MILLION SEVEN HUNDRED THIRTY TWO THOUSAND NINE HUNDRED FIFTY-THREE DOLLARS (\$ 12,732,953.00) in VATI Grant funds as disbursed from DHCD to the County for this Project ("VATI Grant Funds"), and EIGHT MILION EIGHT HUNDRED FIFTY THOUSAND DOLLARS (\$8,850,000) in County grant funds ("County Grant Funds"), collectively referred to as the "Grant Funds"), payable as set forth in Section 11. The amount of the Grant Funds shall not include the Payment Bond Reimbursement amount. In addition, the County agrees to pay **INSERT NUMBER ()** to Port 80 for the reimbursement the Performance Bond Port 80 must obtain pursuant to Section 3 ("Performance Bond Reimbursement"). The Performance Bond Reimbursement shall occur at Final Completion. The County hereby represents and warrants that they are authorized to expend the funds they are paying to Port 80 herein and that they shall comply with any and all applicable laws related to the expenditure of those funds.
- b) Port 80 will invest SEVEN MILLION TWO HUNDRED TWENTY THOUSAND ONE HUNDRED SIXTY-FIVE DOLLARS AND EIGHTY-NINE CENTS (\$7,220,165.89) in the Project. This stated amount will not include any cost related to Performance Bond required under Section 3.
- c) Port 80 is responsible for all other costs in excess of the Grant Funds and reasonably necessary to complete the Project and to fulfill its other obligations under this Agreement. Port 80 acknowledges that this Agreement contains a maximum amount of Grant Funds that will be provided to Port 80 for the design and construction of the Project. Port 80 shall bear all risk related to cost overruns with respect to the Project.
- d) Any Grant Funds not expended by Port 80 for construction of the Project in accordance with this Agreement shall be returned to the County. In addition,

should Port 80 fail to reach Final Completion of the Project, upon written notice and opportunity to cure, Port 80 agrees to return all Grant Funds to the County and DHCD, within thirty (30) days of receipt of written notice from the County.

11) Invoicing and Payment.

- a) Grant Allocations and Disbursements. VATI Grant Funds are disbursed to the County on a cost reimbursement basis. The County shall be required to pay Port 80 VATI Grant Funds when disbursed by DHCD to the County, and upon verification of Port 80's compliance with monthly Project progress reporting. County Grant Funds may be disbursed as detailed below, and upon verification of Port 80's compliance with monthly Project progress reporting of this Agreement. County Funds and Grant Funds may be paid in proportional allocations, as determined by the County. Grant Funds are subject to following payment schedules and requirements:
 - i) Port 80 shall submit requests for payment, which shall include invoices and receipts of construction and other approved Project costs, updated Project status report with the appropriate supporting documentation describing and certifying completion of the relevant construction work, and all supporting documentation reasonably requested by the County ("Payment Documentation"), no more frequently than quarterly.
 - ii) The County shall pay Port 80 County Grant Funds within thirty (30) business days of receipt of an approved request for payment, receipt of all Payment Documentation, and receipt of funds from DHCD.
 - iii) Port 80 shall address payment requests, monthly Project reports, and Payment Documentation to the County Project Manager.
 - iv) All payments of Grant Funds are subject to confirmation of complete and timely submission by Port 80 of all monthly Project report information to DHCD, and Port 80's completion of the Project milestones.
- b) The Parties agree that they have a shared interest in pursuing options that would expedite the construction and completion of the Project in order to accelerate access to Broadband Service in the County. In furtherance of this shared interest, the Parties shall cooperate to identify appropriate mechanisms to accelerate Project performance, including, but not limited to assisting in expediting the issuance of necessary permits, subject to all applicable laws and regulations, and approval of the Spotsylvania County Board of Supervisors and Planning Commission, when applicable.

12) DHCD Agreement.

- a) The Parties recognize that the County has executed an agreement with DHCD ("DHCD Agreement") governing the disbursement of VATI Grant Funds to the County. Port 80 acknowledges that it is subject to certain terms and conditions of the DHCD Agreement, attached hereto as **Exhibit B**, due to Port 80's receipt of federal, state and local funds. PORT 80 agrees to fully cooperate with County with respect to County's obligations under the DHCD Agreement.
 - i) PORT 80 agrees that it shall provide with any other broadband service and coverage data and information regarding the VATI Project ("Service Territory Data") in the time and formats that DHCD may require.

13) Construction of the Project and Project Schedule.

- a) Commencement of Construction. Following the Effective Date, and the receipt of all necessary Permits, Port 80 shall commence construction of the Project, and thereafter agrees to diligently prosecute the same to Final Completion, all in accordance with the Project schedule, plans, the Project budget, and the terms and conditions of this Agreement.
- b) Control of Project Sites. Port 80 shall be responsible for obtaining ownership or control of Project sites. This shall include any leases, easements, or colocation agreements needed to provide Services. To the extent that Project plans approved by the County require the construction or installation of Project facilities on real property owned by the County, the County will cooperate to grant Port 80, free of charge, such permanent easement(s) as may be necessary for Port 80 to site and operate such facilities on such County-owned property, and such temporary easement(s) as Port 80 may reasonably require to construct or install such facilities. Notwithstanding the above, all easements across County property are subject to the approval of the Spotsylvania County Board of Supervisors.
- c) Access to Sites. Port 80 shall provide the DHCD and the County, and their agents, employees, reasonable access during normal business hours to all Project sites so that the County can fulfill its obligations under this Agreement.

14) Changes.

- a) Notwithstanding any provisions of this Agreement to the contrary, Port 80 shall not undertake any of the following actions without notifying the County, so that it may obtain necessary authorization from DHCD.
 - i) Make any change to the scope or budget of the Project under this Agreement; or
 - ii) Grant time extensions, waivers, or modifications to any contractual

obligations of any agent or subcontractor of Port 80 if the time extensions, waivers, or modifications would: (i) require an extension of the Project Schedule; or (ii) require an increase in the Project Budget.

- 15) Proprietary Information/Non-Disclosure: Port 80 understands that the Virginia Freedom of Information Act (2.2-3700 et al, Code of Virginia, 1950 as amended) shall govern public inspection of all documents submitted by Port 80 to the County. Port 80 may invoke the protections given under VFOIA provided that the Port 80:
- a) Invoke the protections of under VFOIA prior to, or upon submission of, the data or other materials.
 - b) Provide a statement that identifies the data or other materials to be protected and that states the reasons why protection is necessary.
 - c) Submit proprietary or security information under separate cover in a sealed envelope clearly marked "PROPRIETARY".
 - d) An all-inclusive statement that the entire proposal is proprietary is unacceptable. It will be requested to remove any such statement(s) in order to be eligible for further consideration.
 - e) COUNTY reserves the right to submit such information to the COUNTY Attorney for concurrence of the Port 80's claim that it is in fact proprietary. Information submitted that does not meet the above requirements will be considered public information in accordance with the Virginia Freedom of Information Act.
- 16) Insurance: During the performance of this Agreement Port 80 shall have and keep current insurance whichever is greater in scope or amount as follows:
- a) Worker's Compensation Insurance in compliance with all states in which Port 80 does business, including coverage B Employer's liabilities in not less than the following amounts
 - i) Bodily Injury by accident \$ 100,000 for each accident;
 - ii) Bodily Injury by disease, \$ 500,000 policy limit;
 - iii) Bodily Injury by disease, \$ 100,000 per each employee.
 - b) General Liability insurance in amount not less than \$ 1,000,000.00 for any occurrence involving bodily injury, an not less than \$ 1,000,000.00 for any occurrence involving property damage. This coverage shall include contractual liability, broad form property damage, independent consultants, and personal injury.
 - c) Automobile liability insurance in an amount not less than \$1,000,000 combined single limit bodily injury and property damage. This coverage shall include liability for the use of hired and non-owned apparatus.
 - d) Assumption of Risk: Port 80 is responsible for its work and every part thereof, and for all materials, tools, equipment, appliances, and property of any and all description used in connection therewith. Port 80 assumes all risk of direct and indirect damage or injury to the property or persons used or employed on or in connection with the Project, and of all damage or injury to any person or

property wherever located, resulting from any action, omission, commission or operation under the Agreement.

17) Assignment; Transfer.

- a) With exception Section (b), below, neither Party may assign this Agreement in whole or in part, or delegate any of its duties or obligations thereunder, without the prior written consent of the other Party. Any purported assignment in contravention of this section shall be null and void. Subject to the foregoing, this Agreement will bind and inure to the benefit of any permitted successors or assigns. Nothing herein is intended to limit Port 80's use of third-party consultants and contractors to perform the Project.
- b) If any repayment due to the County or DHCD pursuant to Section 10 (d), above, is not made by when due, DHCD may determine that further collection action is required, and DHCD may refer the matter to the Office of the Attorney General (the "OAG") for collection pursuant to Section 2.2-518 of the Virginia Code. By execution of the agreement with DHCD, the County has assigned to the Commonwealth of Virginia all of its rights, title and interest in and to collect the Grant Funds, and all claims, the County has or may have against Port 80 for recoupment of Grant Funds. Port 80 expressly consents to this assignment, and Port 80 shall pay back all funds subject to recoupment pursuant to this Section 10(d) above. In any matter referred to the OAG for collection, Port 80 shall be liable to pay interest, administrative charges, collection costs, attorneys' fees, expert fees, consultant fees, and other applicable fees to the Commonwealth of Virginia and that interest on any outstanding repayment referred to the OAG shall accrue at the rate set forth in Section 6.2-301 A. of the Virginia Code (currently 6.0% per year) for the period from the date on which the repayment is due until paid.

18) Nondiscrimination.

- a) Port 80 agrees to comply with all applicable federal, state, and local statutes, rules and regulations promoting fair employment practices or prohibiting employment discrimination and unfair labor practices. Port 80 shall not discriminate in the hiring of any applicant for employment nor shall any qualified Port 80 employee be demoted, discharged or otherwise subject to discrimination in the tenure, position, promotional opportunities, wages benefits or terms and conditions of their employment because of race, color, national origin, ancestry, age, sex, religion, disability, handicap, sexual orientation, gender identification, or for exercising any rights afforded by law.
- b) Port 80 shall not deny benefits or services, or otherwise discriminate on the

basis of race, color, national origin (including limited English proficiency), disability, age, or sex (including sexual orientation and gender identity), in accordance with the following authorities: Title VI of the Civil Rights Act of 1964 (Title VI), 42 U.S.C. 2000d-1 et seq., and the Department's implementing regulations, 31 C.F.R. part 22; Section 504 of the Rehabilitation Act of 1973 (Section 504), 29 U.S.C. 794; Title IX of the Education Amendments of 1972 (Title IX), 20 U.S.C. 1681 et seq., and the Department's implementing regulations, 31 C.F.R. part 28; Age Discrimination Act of 1975, 42 U.S.C. 6101 et seq., and the Department implementing regulations at 31 C.F.R. part 23.

19) Compliance With Laws.

- a) The Parties agree to comply with all applicable all applicable federal laws and regulations, and with all requirements for state, local, and Tribal laws and ordinances to the extent that such requirements do not conflict with federal laws in the performance of this Agreement, to include, but not be limited to, the requirements of 2 C.F.R. §§ 200.317 - 200.326 and 2.C.F.R. Part 200, Appendix II, as amended.
 - i) The parties acknowledge and agree that PORT 80 shall be considered a contractor to County, and not a sub-recipient (each within the meaning of 2 C.F.R. § 200.23), with respect to the VATI Award and the VATI Project.

20) Modification; Amendment.

This Agreement shall not be modified or amended, in whole or in part, except by written agreement signed by the Parties.

21) Survival.

The provisions of this Agreement that, by their sense and context, are intended to survive performance by either Party or the Parties shall also survive the completion, expiration, termination, or cancellation of this Agreement.

22) Headings; Exhibits.

The headings of sections in this Agreement are for convenience only; they form no part of this Agreement and shall not affect its interpretation. All schedules, exhibits or attachments referred to in this Agreement shall be incorporated in and constitute a part of this Agreement.

23) Construction.

- a) Each party to this Agreement expressly recognizes that this Agreement resulted from the negotiation process in which each party was represented by counsel and contributed to the drafting of this Agreement. Given this fact, no legal or other presumptions against the party drafting this Agreement concerning its construction, interpretation or otherwise accrue to the benefit of any party to the Agreement, and each Party expressly waives the right to assert such a presumption in any proceedings or disputes connected with, arising out of, or involving this Agreement.

- b) In the event that any portion of this Agreement is held to be invalid or unenforceable, the Parties shall replace the invalid or unenforceable portion with another provision that, as nearly as possible, reflects the original intention of the Parties, and the remainder of this Agreement shall remain in full force and effect.

24) Attorney Fees

Port 80 agrees that in all other litigation matters arising from this Agreement not addressed in Section 17 (b), any judgement awarded to County against Port 80 shall include all litigation expenses, including actual attorney's fees, appellate attorney's fees, and court costs. Port 80 further agrees that County shall not be responsible for Port 80's litigation expenses, regardless of the outcome.

25) Applicable Law and Venue:

- a) The Agreement shall be deemed to be a Virginia contract and shall be governed as to all matters, whether of validity, interpretations, obligations, performance, or otherwise, exclusively by the laws of the Commonwealth of Virginia. Regardless of where actually delivered and accepted, the Contract shall be deemed to have been delivered and accepted by the Parties in the Commonwealth of Virginia.
- b) Any and all suits for any claims or for any and every breach or dispute arising out of the Agreement shall be maintained in the appropriate court of competent jurisdiction in the Circuit Court for the City of Richmond.

26) Counterparts.

This Agreement may be executed and delivered in counterparts, all of which taken together shall constitute a single instrument. Delivery of an executed counterpart of this Agreement electronically (including by DocuSign or similar electronic signature software) or by facsimile shall be effective as delivery of an original executed counterpart of this Agreement.

27) Entire Understanding.

This Agreement, and the Exhibits attached hereto, constitutes the entire understanding of the parties related to the subject matter hereof, and supersedes all prior agreements, proposals, representations, statements, or understandings, whether written or oral, concerning the Project or the Parties' rights or obligations relating to the Project.

28) Waivers.

Conditions, covenants, duties and obligations contained in this Agreement may be waived only by written agreement executed by the Parties. Forbearance or indulgence in any form or manner by a Party shall not be construed as a waiver, nor in any way limit the remedies available to that Party.

29) Notice.

Any notice provided in accordance with this Agreement shall be in writing and shall be sent by electronic mail, delivered by an agent, or deposited in the United States mail, postage prepaid, certified or registered, to the Project Manager with a copy to the individuals listed below.

1. For COUNTY:
Edward Petrovitch
Spotsylvania County Administrator
P.O. Box 99
Spotsylvania, VA 22553

With a copy to:

Spotsylvania County Attorney
P.O. Box 308
Spotsylvania, VA 22553

2. For Port 80
[INSERT NAME AND ADDRESSES]

Any notice shall be deemed delivered and received: (i) on the date of delivery if delivered in person or by electronic mail; (ii) on the first business day after the date of delivery if sent by same day or overnight courier service; or (iii) on the third business day after the date of mailing, if sent by certified or registered United States Mail, return receipt requested, postage and charges prepaid.

[Remainder of page intentionally left blank]

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by a duly authorized representative by their hands and seals, intending to be so bound, as of the day and year first above written.

Re: Funding Letter of Interest

Dear Mr. Weiner:

We are pleased to extend this Funding Letter of Interest in support of Port 80 Internet Services' (Port 80) response to Spotsylvania County's Request for Proposal for Broadband Expansion Services. Based on the preliminary review of submitted information, ABL Tech Consulting (ABL) would be able to consider financing up to \$5,518,499.22 (Port 80's cash match) with a maximum term of forty-eight (48) months.

Please note that this letter does not represent a financing commitment. Upon issuance of a formal contract award, ABL will conduct its standard due diligence prior to issuing a final commitment for this transaction, including review of Port 80's agreements related to the project and other appropriate information. All final commitments must be in compliance with our policies, legal and eligibility requirements.

If you have any questions about this Funding Letter of Interest, or how to work with ABL, please do not hesitate to contact me at (804) 497-9856 or tony@abltechconsulting.com. We would welcome the opportunity to discuss further details of our services in support of this transaction.

Sincerely,

Tony Leal (Oct 26, 2023 09:21 EDT)

Attachment 11 – Prior Expended Match Form

Local Government expenditures incurred after June 2, 2021, one year prior to the application open date, are eligible to be included in the application as match funds. Incurred expenses must be related to the proposed VATI project and meet VATI criteria. Expenditures incurred by internet service providers after December 13, 2021 are also eligible to be included in the application as match funds. For these match funds to be considered, the co-applicant internet service provider and local government applicant must have been unsuccessful in the FY22 round of VATI. Please complete the table below to explain any prior expended funds which have been considered as matching funds in this application. Incurred expenses must also be directly related to the proposed VATI project and meet VATI criteria. DHCD staff reserves the right to make administrative determinations on the validity of matching funds and accept a proportion of the funds when necessary.

Prior Expended Match Table				
Expense Incurred By: (Local Government or Internet Service Provider)	Source: (Local, State, Federal, Other, Loan, etc.) Please list fund source (i.e. Local Fiscal Recovery Fund)	Amount:	Brief Description: (Construction, Administration Expenses, or Other)	How is this expense directly related to the proposed VATI project? If more space is needed, please describe in detail below the table with numbered references in the cells below.

PLEASE NOTE: Spotsylvania County and its co-applicant, Port 80, are not including prior expenses in their match.

Service, Integrity, Pride

At a meeting of the Spotsylvania County Board of Supervisors held on October 10, 2023, on a motion by Supervisor Frazier and passed 6 to 0 with Supervisor McLaughlin absent, the Board adopted the following resolution:

RESOLUTION NO. 2023-104

Resolution in Support of an Application for the Virginia Department of Housing and Community Development's 2024 Virginia Telecommunication Initiative Grant and Designation of Authorized Organizational Representatives

WHEREAS, Spotsylvania County wishes to extend broadband internet service to areas of the County that presently are underserved or unserved; and

WHEREAS, Spotsylvania County recognizes that broadband availability promotes sustainability, opportunities, and growth for its citizens and community; and

WHEREAS, the Virginia Department of Housing and Community Development is accepting grant applications from units of local governments with a private sector broadband provider as a co-applicant for the FY 2024 Virginia Telecommunications Initiative (VATI) grant program through December 19, 2023; and

WHEREAS, the purpose of the VATI grant is to provide financial assistance to supplement construction costs by private broadband service providers to extend service to areas in the Commonwealth that presently are unserved by any broadband provider; and

WHEREAS, the County will partner with one or more internet service providers in submitting a VATI grant application; and

WHEREAS, the proposed grant project, if awarded, will provide for universal broadband coverage throughout the County; and

WHEREAS, Spotsylvania County and its private-sector partner are required to provide a minimum of 20% of the total project costs as a local match; and

WHEREAS, the internet service provider(s) will provide a minimum local cash match of 10% of the total project costs; and

WHEREAS, Spotsylvania County will provide \$8,850,000 as a local cash match for the project(s).

NOW, THEREFORE, BE IT RESOLVED by the Spotsylvania County Board of Supervisors, that the request to apply for the FY 2024 VATI grant application, in partnership with an internet service provider, is approved; and

BE IT FURTHER RESOLVED by the Spotsylvania County Board of Supervisors that the following individuals are hereby designated as authorized agents any of whom may act in the execution and administration of the grant application: Edward Petrovitch, County Administrator; Mark Cole, Deputy County Administrator; Beckie Forry, Chief Financial Officer; and Annette D'Alessandro, Grants Manager.

Deputy Clerk to the Board of Supervisors

United States Senate

WASHINGTON, DC 20510-4606

December 8, 2023

The Honorable Bryan Horn
Director
Virginia Department of Housing and Community Development
600 East Main Street, Suite 300
Richmond, VA 23219-2430

Dear Director Horn,

I write today in support of Spotsylvania County's grant proposal to the Virginia Department of Housing and Community Development's (DHCD) Virginia Telecommunications Initiative (VATI) to assist with providing universal broadband coverage in the community.

Broadband is a necessity in our world today. For too many Americans, particularly in rural communities, lack of access to affordable, high-speed internet is the barrier to being able to connect with health care providers online, participate in distance learning, or work from home. If funded, I understand that Spotsylvania County will partner with Port 80 Internet Services, LLC to deploy a fiber broadband system that will offer internet service to those areas that are currently unserved and underserved within the county. Through this project, approximately 3,725 passings would be served. The improvements that this project entails would increase educational opportunities and economic growth in the area. If awarded, these funds will provide the citizens of Spotsylvania County access to broadband services equal to citizens in larger cities and more populated areas.

I ask that you give this proposal every appropriate consideration. To the extent possible, please continue to update my office on the status of this grant by emailing GrantSupport_Warner@warner.senate.gov.

Thank you for your service on behalf of my constituents.

Sincerely,

MARK R. WARNER
United States Senator

December 12, 2023

Dear Director Holmes,

I am writing to request you provide full and fair consideration of the application submitted by Spotsylvania County for the Virginia Telecommunications Initiative (VATI) funding opportunity as awarded by the Virginia Department of Housing and Community Development.

As I understand it, the purpose of this program is to create strong, competitive communities throughout the Commonwealth by preparing those communities to build, utilize, and capitalize on telecommunications infrastructure.

If selected, the County will partner with broadband service provider Port 80 Internet Services, LLC (Port 80) to deploy a fiber broadband system that will offer internet service to unserved and underserved areas within the County. Port 80 will offer customers a variety of symmetrical internet service packages ranging from 100 Mbps up to 1 Gbps. Current estimates indicate that this project would allow for approximately 3,725 passings to be served within the County.

Access to high-speed internet is essential for communities in providing access to quality telehealth, increasing educational opportunities through distance learning, supporting work-from-home job opportunities, and encouraging entrepreneurial economic development where existing and start-up small businesses can compete globally. With VATI funding, Spotsylvania County believes its proposed partnership with Port 80 would significantly advance its goal of extending broadband internet service access to every resident.

I thank you for your time and attention to this grant application, as well as your service to the constituents of Virginia's Seventh Congressional District.

Kind Regards,

Abigail Spanberger
Member of Congress

Tamarah Holmes, Ph.D.
Director, Office of Broadband
Virginia Department of Housing and Community Development
600 East Main Street, Suite 300
Richmond, VA 23219

Dr. Holmes,

Please accept this letter as my strong support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) grant application to achieve functional universal coverage within the County. If awarded funding, the County will partner with Port 80 Internet Services, LLC (Port 80) as the private sector broadband service provider, to deploy a fiber broadband system that will offer internet service to those areas that are currently unserved and underserved within the County. Port 80 will offer customers a variety of symmetrical internet service packages ranging from 100 Mbps up to 1 Gbps.

If 2020 and the Covid-19 pandemic has taught us anything, it is that access to and use of high-speed internet is critical for education, employment, economic development, governmental services, entrepreneurship, tourism, telehealth services, communication, commerce, entertainment, public safety, and other essential services. While high-density population areas often have multiple internet service providers that drive competition resulting in lowered pricing and increased service delivery, rural communities or those that have significant special construction costs associated with them are coping with no, or limited internet service options further compounding the digital divide.

Funding of Spotsylvania County's proposed project will simultaneously further VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing those communities to build, utilize, and capitalize on telecommunications infrastructure while also significantly advancing the County's goal of extending broadband internet service access to every resident in Spotsylvania County. Thank you for your consideration of this request.

Yours in service,

RE: Spotsylvania's FY 2024 Virginia Telecommunication Initiative (VATI) Grant Application

Dear Dr. Holmes,

As the delegate representing parts of Spotsylvania County, I strongly support the county's FY 2024 Virginia Telecommunication Initiative (VATI) grant application to reach functional universal coverage within Spotsylvania. If awarded funding, the county will partner with Port 80 Internet Services, LLC (Port 80) as the private sector broadband service provider, and deploy a fiber broadband system that will offer internet service to those areas that are currently unserved and underserved. Port 80 will offer customers a variety of symmetrical internet service packages ranging from 100 Mbps up to 1 Gbps.

As we all experienced during the pandemic, access to high-speed internet has become crucial for education, employment, economic development, governmental services, telehealth, public safety, and other essential services. There are constituents in my district living close to I-95, not considered rural, who still have no access to internet service. Their children are at a disadvantage in academics, and their parents have difficulty working from home.

Funding Spotsylvania County's proposed project will promote VATI's goal of building strong communities throughout the Commonwealth by allowing the localities to capitalize on telecommunications infrastructure, while also significantly advancing Spotsylvania's goal of extending broadband internet service access to every resident in the county. Thank you for giving due consideration to this request.

Sincerely,

A handwritten signature in blue ink that reads "Robert D. Orrock".

RE: Letter of Support for Spotsylvania County's FY 2024 Virginia
Telecommunication Initiative (VATI) Grant Application to Achieve Functional
Universal Coverage

Dear Dr. Holmes,

Please accept this letter as my strong support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) grant application to achieve functional universal coverage within the County. If awarded funding, the County will partner with Port 80 Internet Services, LLC (Port 80) as the private sector broadband service provider, to deploy a fiber broadband system that will offer internet service to those areas that are currently unserved and underserved within the County. Port 80 will offer customers a variety of symmetrical internet service packages ranging from 100 Mbps up to 1 Gbps.

If 2020 and the Covid-19 pandemic has taught us anything, it is that access to and use of high-speed internet is critical for education, employment, economic development, governmental services, entrepreneurship, tourism, telehealth services, communication, commerce, entertainment, public safety, and other essential services. While high-density population areas often have multiple internet service providers that drive competition resulting in lowered pricing and increased service delivery, rural communities or those that have significant special construction costs associated with them are coping with no, or limited internet service options further compounding the digital divide.

Funding of Spotsylvania County's proposed project will simultaneously further VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing those communities to build, utilize, and capitalize on telecommunications

infrastructure while also significantly advancing the County's goal of extending broadband internet service access to every resident in Spotsylvania County.

The addition of internet in Spotsylvania County's rural areas will allow the Spotsylvania Sheriff's Office to accelerate communication between our officers and our communication center. It gives us the ability to upload our data quickly and most importantly, permits our deputies to have insight into a potentially volatile situation or individual instantly. In a crisis, they can request assistance and also direct our citizens to safety. Our command center will have immediate access to cameras and allow the use of technological advances in the rural areas that we are unable to access now, due to no internet coverage.

Thank you for your consideration of this request.

Sincerely,

RE: Letter of Support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) Grant Application to Achieve Functional Universal Coverage

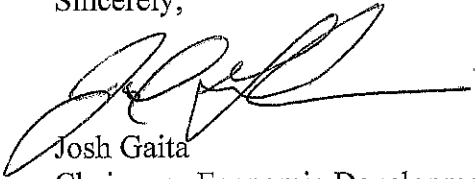

Dear Dr. Holmes,

Please accept this letter on behalf of the Spotsylvania County Economic Development Authority that strongly support the Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) grant application to achieve functional universal coverage within the County. If awarded funding, the County will partner with Port 80 Internet Services, LLC (Port 80) as the private sector broadband service provider, to deploy a fiber broadband system that will offer internet service to those areas that are currently unserved and underserved within the County. Port 80 will offer customers a variety of symmetrical internet service packages ranging from 100 Mbps up to 1 Gbps.

If 2020 and the Covid-19 pandemic has taught us anything, it is that access to and use of high-speed internet is critical for education, employment, economic development, governmental services, entrepreneurship, tourism, telehealth services, communication, commerce, entertainment, public safety, and other essential services. While high-density population areas often have multiple internet service providers that drive competition resulting in lowered pricing and increased service delivery, rural communities or those that have significant special construction costs associated with them are coping with no, or limited internet service options further compounding the digital divide.

Funding of Spotsylvania County's proposed project will simultaneously further VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing those communities to build, utilize, and capitalize on telecommunications infrastructure while also significantly advancing the County's goal of extending broadband internet service access to every resident in Spotsylvania County. Thank you for your consideration of this request.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. Gaita', with a long horizontal flourish extending to the right.

RE: Letter of Support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) Grant Application to Achieve Functional Universal Coverage

Dear Dr. Holmes,

Please accept this letter as the Bay Consortium Workforce Development Board's strong support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) grant application to achieve functional universal coverage within the County. If awarded funding, the County will partner with Port 80 Internet Services, LLC (Port 80) as the private sector broadband service provider, to deploy a fiber broadband system that will offer internet service to those areas that are currently unserved and underserved within the County. Port 80 will offer customers a variety of symmetrical internet service packages ranging from 100 Mbps up to 1 Gbps.

If 2020 and the Covid-19 pandemic has taught us anything, it is that access to and use of high-speed internet is critical for education, workforce development and employment, economic development, governmental services, entrepreneurship, tourism, telehealth services, communication, commerce, entertainment, public safety, and other essential services. While high-density population areas often have multiple internet service providers that drive competition resulting in lowered pricing and increased service delivery, rural communities or those that have significant special construction costs associated with them are coping with no, or limited internet service options further compounding the digital divide.

It is the mission of the Bay Consortium Workforce Development Board to ensure the workforce region has a viable and qualified workforce that is capable of supporting existing businesses and attracting new businesses by providing a sustainable and expanding employment base. This is achieved by providing comprehensive, customer-driven workforce services that connect employers, education providers, job seekers, workers, and youth.

Funding of Spotsylvania County's proposed project will simultaneously further our mission and VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing those communities to build, utilize, and capitalize on telecommunications infrastructure while also significantly advancing the County's goal of extending broadband internet service access to every resident in Spotsylvania County. Thank you for your consideration of this request.

Sincerely,

Jackie Davis

RE: Letter of Support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) Grant Application to Achieve Functional Universal Coverage

Dear Dr. Holmes:

Please accept this letter as Healthy Generations Area Agency on Aging's strong support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) grant application to achieve functional universal coverage within the County. If awarded funding, the County will partner with Port 80 Internet Services, LLC (Port 80) as the private sector broadband service provider, to deploy a fiber broadband system that will offer internet service to those areas that are currently unserved and underserved within the County. Port 80 will offer customers a variety of symmetrical internet service packages ranging from 100 Mbps up to 1 Gbps.

If 2020 and the Covid-19 pandemic has taught us anything, it is that access to and use of high-speed internet is critical for education, employment, economic development, governmental services, entrepreneurship, tourism, telehealth services, communication, commerce, entertainment, public safety, and other essential services. Many area older adults were completely isolated from family and friends until internet access was provided. HGAAA provided education on using the internet and available devices and was able to afford our clients the opportunity to continue to "meet" through ZOOM meetings and cell phone based conference calls. This opportunity prevented social isolation from being an overriding health issue. Studies have shown that extended social isolation is the equivalent of smoking 15 cigarettes per day. Our nation has been combatting a smoking epidemic for years, other health deterrents such as isolation need to be combatted as well. While high-density population areas often have multiple internet service providers that drive competition resulting in lowered pricing and increased service delivery, rural communities or those that have significant special construction costs associated with them are coping with no, or limited internet service options further compounding the digital divide.

Funding of Spotsylvania County's proposed project will simultaneously further VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing those communities to build, utilize, and capitalize on telecommunications infrastructure while also significantly advancing the County's goal of extending broadband internet service access to every resident in Spotsylvania County. RE: Letter of Support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) Grant Application to Achieve Functional Universal Coverage

Dear Dr. Holmes,

Please accept this letter as my strong support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) grant application to achieve functional universal coverage within the County. If awarded funding, the County will partner with Port 80 Internet Services, LLC (Port 80) as the private sector broadband service provider, to deploy a fiber broadband system that will offer internet service to those areas that are currently unserved and underserved within the County. Port 80 will offer customers a variety of symmetrical internet service packages ranging from 100 Mbps up to 1 Gbps.

If the Covid-19 pandemic has taught us anything, it is that access to and use of high-speed internet is critical for education, employment, economic development, governmental services, entrepreneurship, telehealth, and other essential services. Rural communities and those that have significant special construction costs are coping with limited internet service options, compounding the digital divide.

High-speed internet service is critical for students at Germanna Community College. Students use internet connectivity to reach their academic goals and obtain the knowledge and skills they need to enter the workforce in Spotsylvania County. Functional universal coverage will increase student success and enhance the talent pipeline for our community.

Funding of Spotsylvania County's proposed project will simultaneously further VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing those communities to build and capitalize on telecommunications infrastructure and significantly advance the County's goal of extending broadband internet service access to every resident in Spotsylvania County. Thank you for your consideration of this request.

Sincerely,

Dr. Janet Gullickson

RE: Letter of Support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) Grant Application to Achieve Functional Universal Coverage

Dear Dr. Holmes,

Please accept this letter as our strong support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) grant application to achieve functional universal coverage within the County. If awarded funding, the County will partner with Port 80 Internet Services, LLC (Port 80) as the private sector broadband service provider to deploy a fiber broadband system that will offer internet service to areas currently unserved and underserved within the County. Port 80 will offer customers a variety of symmetrical internet service packages ranging from 100 Mbps up to 1 Gbps.

The Fredericksburg Area Builders Association understands the importance of broadband to rural areas. It's imperative to our members' customers that they have reliable access to the internet. Access to high-speed internet is a critical decision our customers make when deciding to build a home and in what area. Expanded broadband coverage in Spotsylvania provides more business opportunities for our members.

Funding of Spotsylvania County's proposed project will simultaneously further VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing those communities to build, utilize, and capitalize on telecommunications infrastructure while also significantly advancing the County's goal of extending broadband internet service access to every resident in Spotsylvania County. The Fredericksburg Area Builders Association fully supports Spotsylvania County's 2024 VATI Grant application, and we respectfully urge you to accept their request.

Sincerely,

RE: Letter of Support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) Grant Application to Achieve Functional Universal Coverage

Dear Dr. Holmes,

Please accept this letter as my strong support for Spotsylvania County's FY 2024 Virginia Telecommunication Initiative (VATI) grant application to achieve functional universal coverage within the County. If awarded funding, the County will partner with Port 80 Internet Services, LLC (Port 80) as the private sector broadband service provider, to deploy a fiber broadband system that will offer internet service to those areas that are currently unserved and underserved within the County. Port 80 will offer customers a variety of symmetrical internet service packages ranging from 100 Mbps up to 1 Gbps.

The pandemic pushed the world to move a great deal of tools and services to web-based and/or internet based. Given our communities challenges with access to high-speed internet, our citizens have been limited to the benefits and services they can received, especially since the pandemic. Our locality is growing and so are the needs of our community. At the Department of Social Services, we run into challenges of assisting families in become self-sufficient and gainfully employed when they are unable to adequately access job search websites and email accounts to manage communications and application processes. Citizens are limited in accessing the on-line options that would afford them faster and more efficient access to our services and applications. Our staff are limited in the types of communication they can use with our citizens when communicating. There are times when a video conference is more appropriate than a phone call, yet the citizen is unable to participate due to a lack of access to high-speed internet that can handle that type of service. There are times that we find a suitable employment for a citizen that can be done from home, but they are unable to accept the position because they lack the appropriate high-speed internet to function in that role properly. There are times when family members want to be a part of solution meetings for children, but are unable to, due to their limited access to conference capabilities on-line and they are unable to physically attend.

Funding of Spotsylvania County's proposed project will simultaneously further VATI's goal of creating strong, competitive communities throughout the Commonwealth by preparing those communities to build, utilize, and capitalize on telecommunications infrastructure while also significantly advancing the County's goal of extending broadband internet service access to every resident in Spotsylvania County. Thank you for your consideration of this request.

Sincerely,
