Rockbridge County - BrightSpeed - VATI 2024

Application ID: 107411062023160212

Application Status: Pending

Program Name: Virginia Telecommunication Initiative 2024

Organization Name: Rockbridge County

Organization Address: 150 S. Main Street
Lexington, VA 24450

Profile Manager Name: Brandy Flint

Profile Manager Phone: (540) 463-1473

Profile Manager Email: bflint@rockbridgecountyva.gov

Project Name: Rockbridge County - BrightSpeed - VATI 2024

Project Contact Name: Spencer Suter

Project Contact Phone: (540) 463-1460

Project Contact Email: ssuter@rockbridgecountyva.gov

Project Location: 150 S MAIN ST
LEXINGTON, VA 24450-2359

Project Service Area: Rockbridge County

Total Requested Amount: \$975,865.00

Required Annual Audit Status: Accepted

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

Budget Information:

Cost/Activity Category	DHCD Request	Other Funding	Total
Telecommunications	\$975,865.00	\$4,938,467.00	\$5,914,332.00
Administration	\$8,250.00	\$41,750.00	\$50,000.00
Construction	\$967,615.00	\$4,896,717.00	\$5,864,332.00
Total:	\$975,865.00	\$4,938,467.00	\$5,914,332.00

Budget Narrative:

The total estimate for the project is \$5,914,332. The amount of subsidy requested is \$975,865 and total match on the project from Brightspeed and Rockbridge County is \$4,938,467. The project includes the following: Labor Costs (\$5,435,074): The Labor category includes all projected funds needed to cover labor costs of the project. Brightspeed engages with expert outside construction vendors, with oversight from our Virginia-based and regionally based network and engineering teams, to build the fiber-to-the-premise proposed project. We include in our costing tool the average costs based on prior projects by the same or similar contractors. This includes invoices for work that includes all construction labor including punch-list items and other final construction repairs. Materials Costs (\$429,258): The Materials category includes all materials used to construct the proposed network. Materials we will use for our XGSPN deployment with our DTAP architecture include (but is not limited to) the purchase of small, medium and large handholes, the DTAP, Optical Network Terminals, Splice Closures, Wall Boxes, and Fiber Cable and Fiber Cable Jumpers of various sizes. Administrative (\$50,000): These will be used by the Central Shenandoah Planning District Commission (CSPDC), who have agreed to perform administrative and compliance duties related to the grant.

Questions and Responses:

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

1. Project Description and Need

Describe why and how the project area(s) was selected. Describe the proposed geographic area including specific boundaries of the project area (e.g. street names, local and regional boundaries, etc.). Attach a copy of the map of your project area(s). Label map: Attachment 1 – Project Area Map.

Answer:

Access to high-speed internet is the foundation for nearly every aspect of the future – commerce, entertainment, healthcare, and education, yet rural Virginia lacks sufficient broadband access, limiting opportunities for economic growth. In 2021, the Commonwealth announced a \$750M grant program, the Virginia Telecommunications Initiative (VATI), to expand internet access across the state. Upon receiving notice for the available 2023 VATI grants, Rockbridge County (Rockbridge) began the process of securing a portion of these funds to deploy broadband infrastructure that fully connects unserved residents and businesses under its jurisdiction. Rockbridge recognized the value and economies of scale possible in working with the Central Shenandoah Planning District Commission (CSPDC), Brightspeed (broadband provider), BARC Connects (electric co-op) and Verizon (broadband provider) to submit multiple grant applications to this round of VATI to fully connect residents and businesses in the region.

Rockbridge proposes to build on over ten years of intense focus on rural broadband expansion by concentrating on locations that are partially served, or are adjacent to areas served, by Rural Digital Opportunity Fund awards and Connect America funds, as well as locations that are already within Brightspeed's footprint. This will allow for the deployment of broadband in an efficient, cost-effective manner that increases service availability to some of the most remote and hard-to-reach regions in Rockbridge County.

This application consists of one project providing high-speed internet to 1,734 premises located in remote areas with difficult topography in central, northwestern, and southeastern Rockbridge County. The project area will further expand the County's fiber-to-the-premise (FTTP) network access across difficult-to-reach areas where broadband access is needed. This effort and application is in concert with simultaneous applications being submitted by the County with BARC Connects and Verizon as co-applicants. Based on all available information, Rockbridge County believes that the three applications will position the County to achieve universal broadband coverage in concert with the upcoming Broadband, Equity, Access and Deployment (BEAD) grant program expected to launch next year. If awarded, the buildout of high-speed broadband networks to the proposed locations in these applications will provide economies of scale to efficiently serve any unserved or underserved areas remaining in the County after award of the FY 2024 VATI grants, which Brightspeed and BARC Connects will apply for under the upcoming BEAD program to provide true universal service in Rockbridge County. All applicants have worked together to identify areas unserved by 100/20 internet speeds for this proposed project area utilizing the most current version of the FCC's Broadband Map, the Center for Innovative Technology (CIT) map, and speaking with residents in the proposed project areas to identify areas with mapping inaccuracies.

Please see **attachment 1**, for a map of the project area.

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

2. List existing providers in the proposed project area and the speeds offered. Describe your outreach efforts to identify existing providers and how this information was compiled with source(s).

Answer:

While Rockbridge conducted extensive research on the unserved areas under its jurisdiction, the County was unable to gather enough data from attempted outreach to ISPs to ensure a “challenge-free” proposal. To limit the probability of challenges, Rockbridge eliminated areas already served at a level of at least 100/20 Mbps. In doing so, Rockbridge removed the BARC Connects, RANA and Virginia Technology Services (VTS) areas which are either built or are planned to be built via other funding sources. Rockbridge also reached out to Comcast, achieving some success in identifying and eliminating a portion of the areas served by Comcast.

Based on resident feedback and the data the County did obtain, the County asserts that these project areas are unserved unless/until an ISP currently operating in Rockbridge can prove otherwise. ISPs currently operating in Rockbridge County other than Brightspeed include BARC Connects, VTS, Comcast, ShenTel, Lumos, Verizon, and Ting.

Rockbridge does not have complete data on existing coverage levels or areas of coverage as other broadband providers currently operating in the county are privately-held companies and have been unwilling to share location specific speed data on areas they cover. As a result, the County along with Brightspeed, used publicly available data, such as the FCC National Broadband Map and FCC Broadband Serviceable Location Data supplied by Cost Quest Associates, supplemented by community input, to identify the unserved and underserved nature of the project area. In addition, the County took the best-possible advantage of the Commonwealth’s recently published map and speed testing tool to help ascertain and challenge reported internet speed inaccuracies.

3. Describe if any areas near the project have received funding from federal grant programs, including but not limited to Connect America Funds II (CAF II), ACAM, ReConnect, Community Connect, and Rural Digital Opportunity Funds (RDOF). If there have been federal funds awarded near the project area(s), provide a map showing these areas, verifying the proposed project area does not conflict with these areas. Label Map: Attachment 2 – Documentation on Federal Funding Area.

Answer:

Accompanying the existing provider map is **Attachment 2**, showing the CAF and RDOF funded areas in Rockbridge County. As shown, Brightspeed (via its predecessor, CenturyLink) was awarded RDOF funding in certain areas that are included in this application. Also included are RDOF funded areas of the Co-op Connections Consortium, as shown in Attachments 2 and 3 in VATI areas.

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

4. **Overlap:** To be eligible for VATI, applicants must demonstrate that the proposed project area(s) is unserved. An unserved area is defined as an area with speeds below 100/20 Mbps and with less than 25% service overlap within the project area for wireless projects and 20% for wireline projects. Describe any anticipated service overlap with current providers within the project area. Provide a detailed explanation as to how you determined the percentage overlap. Label Attachment: Attachment 3 – Documentation Unserved Area VATI Criteria.

Answer:

As discussed above, Rockbridge County conducted extensive research and has knowledge of the unserved areas and used the recently published state mapping and speed test tool to confirm the unserved nature of the area. The County attempted outreach to known ISPs offering broadband service but was unable to obtain complete county-wide data. Based on resident feedback and the data the County did obtain, the County asserts that these project areas are unserved unless/until an ISP can prove otherwise.

Prior to putting this grant application together, Rockbridge used the sum of information gathered during prior VATI grant rounds, as well as all published mapping, to discern areas already served with at least 100/20Mbps service. In doing so, Rockbridge removed the BARC Connects, RANA and VTS areas which are either built or are planned to be built using other funding sources. In the last VATI round, Rockbridge reached out to Comcast via phone and email conversations. The County executed a non-disclosure agreement with Comcast and received some limited information from which to work, but detail such as specific address points and speeds was not provided. Due to the lack of additional responses, Rockbridge does not have complete data on existing coverage levels or area of coverage as Comcast is a private company that does not make this information public. The County then referenced maps that are publicly available from the FCC to further determine the types of coverage and areas and supplemented the map information with local knowledge. Finally, in November 2023, Rockbridge made significant efforts to take advantage of the BEAD challenge mapping/speed testing tool provided by the Office of Broadband, to further enhance the accuracy of available, published broadband mapping.

5. **Total Passings:** Provide the number of total serviceable units in the project area. Applicants are encouraged to prioritize areas lacking 25 Megabits per second download and 3 Megabits per second upload speeds, as they will receive priority in application scoring. For projects with more than one service area, each service area must have delineated passing information. Label Attachment: Attachment 4 – Passings Form.
- Of the total number of VATI passings, provide the number of residential, business, non-residential, and community anchors in the proposed project area.
 - If applicable, of the total number of RDOF passings, provide the number of residential, business, non-residential, and community anchors in the proposed project area.
 - If applicable, provide the number of passings that will require special construction costs, defined as a one-time fee above normal service connection fees required to provide broadband access to a premise. Describe the methodology used for these projections.
 - If applicable, provide the number of passings included in the application that will receive broadband access because special construction costs have been budgeted in the VATI application. Describe the methodology used for determining which passings with special construction costs were budgeted in the application.
 - Provide the number of passings in the project area that have 25/3 Mbps or less. Describe the methodology used for these projections. (up to 15 points)

Answer:

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

1. Of the total number of VATI passings, provide the number of residential, business, non-residential, and community anchors in the proposed project area.

Residential: 1,527

Business: 207

Community Anchors: 2

2. If applicable, of the total number of RDOF passings, provide the number of residential, business, non-residential, and community anchors in the proposed project area.

There are approximately 486 RDOF passings included in the proposed project area. Of these RDOF passings, 393 are residential and 93 are businesses. No CAI locations were identified in the RDOF passings.

3. If applicable, provide the number of passings that will require special construction costs, defined as a one-time fee above normal service connection fees required to provide broadband access to a premise. Describe the methodology used for these projections.

Brightspeed will not be charging customers in this area for special construction costs, such as charges for drops, and as such has not identified any locations in the area that require special construction costs.

4. If applicable, provide the number of passings included in the application that will receive broadband access because special construction costs have been budgeted in the VATI application. Describe the methodology used for determining which passings with special construction costs were budgeted in the application.

Brightspeed will not be charging customers in this area for special construction costs, such as drops, and has not identified any locations in the area that require special construction costs.

5. Provide the number of passings in the project area that have 25/3 Mbps or less. Describe the methodology used for these projections. (up to 15 points)

1,301 passings in the project area are not served by at least 25/3 Mbps, based on resident feedback as well as by available data from the FCC National Broadband Serviceable Locations fabric provided to Brightspeed by Cost Quest Associates.

6. Describe if any blocks awarded in Rural Digital Opportunity Fund (RDOF) are included in the VATI application area. If RDOF areas are included in the VATI application, provide a map of these areas and include information on number of passings in RDOF awarded areas within the VATI application area, and Census Block Group ID number for each block group in the project area. Label Attachment: Attachment 5 – RDOF Awarded Areas Form in VATI Area

Answer:

There are approximately 346 locations that were awarded RDOF funding to CenturyLink ILECs (subsequently acquired in a transfer of ownership to Brightspeed) that are included in the application to be connected. There are also approximately 140 locations that were awarded RDOF funding for Co-op Connections Consortium that are included in this application that are considered unserved. Attachment 5 provides a breakdown of the locations by Census Block ID as well as by type of passing.

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

7. **For wireless projects only:** Please explain the ownership of the proposed wireless infrastructure. Please describe if the private co-applicant will own or lease the radio mast, tower, or other vertical structure onto which the wireless infrastructure will be installed.

Answer:

N/A

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

8. Network Design: Provide a description of the network system design used to deliver broadband service from the network's primary internet point(s) of presence to end users, including the network components that already exist and the ones that would be added by the proposed project. Provide a detailed explanation of how this information was determined with sources. Provide information on how capacity for scalability, or expansion, of how the network can adapt to future needs. If using a technology with shared bandwidth, describe how the equipment will handle capacity during peak intervals. For wireless projects, provide a propagation map for the proposed project area with a clearly defined legend for scale of map. Label Map: Attachment 6 – Propagation Map Wireless Project.

Answer:

The proposal includes the deployment of state-of-the-art 10G symmetrical network equipment (XGSPON), and the fiber necessary to deliver FTTP service directly to customers' homes and businesses. XGSPON is a state-of-the-art Passive Optical Network (PON) technology that could scale up to 10 Gbps for both upload and download (i.e., symmetrical) data speeds. The base speed fiber offering provides 200 Mbps/200 Mbps (download/upload) speeds, and the top-end service will be at least a 1 Gbps symmetrical (i.e., 1Gbps upstream and 1 Gbps downstream) speed service (or higher).

XGSPON is a 10 gigabit per second (Gbps) symmetrical Passive Optical Network delivered via a distributed tap fiber architecture to the customer's premises. For high density areas, the distributed tap fiber distribution network will be deployed using a fully connectorized technology that will significantly reduce the construction timeline as well as the restoral timeframe should damage occur in the future. In lower density areas, the distributed tap fiber distribution network will be deployed using a fiber spliced technology which is more economical for low density builds. This grant award will allow Brightspeed to provide high-speed data transfer rates up to 1 Gbps transported on a single fiber from the ILEC central office (CO) to the customer's home or business. In addition to having super-fast data throughput speeds, the network Brightspeed is deploying allows for symmetrical data transfer rates (the upload and download speeds are the same), which is the state-of-the-art for network design. The XGSPON and distributed tap architecture eliminate the need for active electronics (and the associated power and real estate needs and maintenance costs) in the distribution plant. The capabilities of a fiber or Optical Distribution Network (ODN) are essentially limitless, offering customers an extremely reliable technology medium that is resilient in the face of bad weather -there is no service fade as may be the case with other technologies.

Brightspeed will provide XGSPON via a dedicated fiber loop to the customer's premises. This will require construction of approximately 173 miles of fiber throughout the grant area, plus the necessary electronics and terminals. Brightspeed will upgrade, as needed, the core fiber routers that connect to the remainder of the Brightspeed network and to the internet.

The capabilities of a fiber or Optical Distribution Network (ODN) are essentially limitless, offering customers an extremely reliable medium that is resilient in the face of bad weather - there is no service fade. XGSPON is a state-of-the-art Passive Optical Network (PON) technology that could scale up to 10 gigabits per second (GBPS) for both upload and download (i.e., symmetrical) data speeds. Together these products will easily serve customers' needs for decades to come.

The proposed network and technology solution will have the ability to be upgraded to faster speeds in the future. The useful life of fiber is approximately 20 years, giving the project a long lifespan during which it can continue to better the community. The maximum speed that can be marketed in 10 years will be at least 1G/1G, with opportunities to scale to faster speeds.

Middle mile facilities for transporting information from the originating central offices to internet servers may also require equipment upgrade for project execution and will be considered in project design. Brightspeed will upgrade existing backhaul network infrastructure as required, using state-of-the-art transport and routing technologies, substantially increasing the bandwidth capacity with a fault tolerant design, fully supporting the XGSPON broadband services.

Please see attachments 18 and 19 source material from manufacturers Calix and Corning regarding XGSPON architecture DTAP technology.

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

9. Speeds: Describe the internet service offerings, including download and upload speeds, to be provided after completion of the proposed project. Detail whether that speed is based on dedicated or shared bandwidth, and detail the technology that will be used. This description can be illustrated by a map or schematic diagram, as appropriate. List the private co-applicant's tiered price structure for all speed offerings in the proposed project area, including the lowest tiered speed offering at or above 100/20 Mbps. (up to 10 points)

Answer:

Brightspeed will offer the following speed tiers and corresponding pricing under this proposed project, using the XGSPON network described above:

Service Name

Technology Type

Upload/Download Speeds

Data Cap

Price

200 Mbps

Fiber

200 Mbps/200 Mbps

None - Unlimited

\$59.00

500 Mbps

Fiber

500 Mbps/500 Mbps

None - Unlimited

\$69.00

1 Gbps

Fiber

1Gbps/1Gbps

None - Unlimited

\$79.00

These prices represent maximum initial prices currently offered.

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

10. Explain how the proposed project achieves universal broadband coverage for the locality or fits into a larger plan to achieve universal broadband coverage for the locality. If applicable, explain the remaining areas of need in the locality and a brief description of the plan to achieve universal broadband coverage. (up to 50 points)

Answer:

Access to high-speed Internet is the foundation for nearly every aspect of the future – commerce, entertainment, healthcare, education, and sustainability, yet for many parts of rural Virginia broadband is lacking, negatively impacting economic growth, education, and quality of life. This project will create a brighter future for all rural residents in Rockbridge County. It has the potential to create economic growth opportunities; drive new housing starts and sales of existing homes; create telecommuting opportunities; and stimulate economic growth in the creation of new small and home-based businesses. It will attract new business to the area and enable the expansion of existing businesses. High-speed broadband will help the county to retain a trained, competitive workforce better able to compete with more densely populated regions that currently have broadband infrastructure in place to meet residential and business needs. With Brightspeed's broadband expansion supported by VATI, this region of Virginia is poised to experience long-term sustainable economic growth.

Although Rockbridge has placed intense focus on building more access to high-speed Internet service over the past 10 years, there are still low-density areas in the county that lack this access. Due to high costs for construction, larger carriers have not invested the dollars needed to reach these areas. In response, Rockbridge has partnered with Brightspeed, BARC Connects, and Verizon to expand the availability of highspeed Internet service through this round of VATI broadband grants. The unified goal of these applications is to connect all remaining unserved residences and businesses in Rockbridge County as comprehensively as possible by leveraging Brightspeed's and BARC's planned RDOF builds to propose a project that is more cost effective to the community. Between the three providers, Rockbridge County is confident that nearly all locations will be served across the County. Awarded locations in the proposed area will facilitate cost savings for any remaining locations in the County by extending Brightspeed's network into the most rural parts of the County. Any remaining unserved locations, including those in extremely rural locations that would result in very high costs will be applied for under the upcoming Broadband Equity, Access and Deployment (BEAD) grant program. Upon award of subsequent BEAD projects, Rockbridge County will have achieved universal coverage and any citizen who wants high speed broadband will be able to have it.

Rockbridge's project with Brightspeed will leverage Brightspeed's existing wire centers to expand Brightspeed's broadband service network to deploy 173 total miles of last mile fiber infrastructure providing Fiber-To-The-Premise (FTTP) service to unserved residents and businesses. This fiber project expansion will pass 1,527 residences, 207 businesses, and 2 community anchor institutions in Rockbridge. A total of 1,734 residences/businesses will be served through this project (which includes approx. 486 RDOF awarded locations). The VATI-requested funding will be allocated solely to connecting homes and businesses in the unserved areas of Rockbridge as identified in our mapped attachments. The matches provided by Brightspeed and Rockbridge County will be used for fiber construction to build to the unserved areas, as well as inside the unserved areas, making FTTP service available to all customers along the routes. Grant funding is required to help offset the high capital costs associated with bringing reliable broadband service to these unserved and low-density rural residences and businesses.

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

11. Project Readiness

Describe the current state of project development, including but not limited to: planning, preliminary engineering, identifying easements/permits, status of MOU or MOA, and final design. Prepare a detailed project timeline or construction schedule, identifying specific tasks, staff, contractor(s) responsible, collection of data, etc., and estimated start and completion dates. Applicants are encouraged to extensively discuss, where applicable, easements relating to railroad crossings, federally-owned lands and parks, partnerships with the Virginia Department of Transportation, and mobile home parks. Applicants must include Memorandums of Understanding (MOUs) or Memorandums of Agreement (MOAs) between applicants (drafts are allowable). Label Attachments: Attachment 7 – Timeline/Project Management Plan; Attachment 8 – MOU/MOA between Applicant/Co-Applicant; (up to 10 points)

Answer:

Brightspeed will undertake commercial best efforts to complete the project within 24 months of the execution of the Grant Agreement, given the size of the project. Upon award and execution of the grant contract, Brightspeed's network planning team will complete construction drawings and related final design for the Company's network implementation teams, including field review by our outside construction contractors. Once the project design is finalized and released to the outside construction contractor, we will order materials, submit permits and complete any necessary make-ready work for aerial installations. Our build does include instances of crossing a railroad track near Buena Vista and comes very close to federally-owned lands in one instance. Brightspeed has the relationships and expertise to obtain easements in these locations in a timely manner if it is necessary.

Thereafter, Brightspeed will begin project construction. As construction takes place it is our intent to market and launch portions of the project as they are completed, and to have construction completed in all project areas within twenty-four months of executing the Grant Agreement, tentatively completing the project in the third quarter of 2026. We expect this project to take longer than the suggested 18-months given the rural nature, challenging rock terrain, and extensiveness of the project with 173 miles of fiber construction planned. Please find attached Attachment 7, which is the estimated quarterly project timeline. While we fully expect to achieve the timeline as presented, we note that like any major construction project, the schedule is subject to change due to various factors, including delays due to weather or Act of God events, obtaining necessary permits in a timely manner, and difficulty in obtaining and deploying necessary fiber, equipment, labor, and other resources needed to complete the project as scheduled.

12. Has the applicant or co-applicant received any VATI grants? If so, provide a list of these grants, with a detailed summary of the status of each.

Answer:

The CSPDC submitted a VATI application on behalf of Rockbridge County with co-applicant BARC Electric Cooperative in 2019 and was awarded a \$2.2 million grant. The project brought broadband access to 470 unserved homes and businesses in Rockbridge County resulting in approximately 118 miles of gigabit last mile fiber infrastructure and a total cost of \$4.4 million dollars. The CSPDC served as the grant administrator and worked with Rockbridge County and BARC through the completion of the project. This project was completed in April 2022.

In 2021, Brightspeed's predecessor, CenturyLink, in partnership with Albemarle County, was awarded a \$2.2 million grant to provide connectivity to 1,675 locations with construction of approximately 100 miles of fiber-optic cable. This build was completed, with a mutual agreement to build to an additional 10 locations. The build to those additional locations is currently in progress.

13. Matching funds: Complete the funding sources table indicating the cash match and in-kind resources from the applicant, co-applicant, and any other partners investing in the proposed project (VATI funding cannot exceed 80 percent of total project cost). In-kind resources include, but are not limited to: grant management, acquisition of rights of way or easements, waiving permit fees, force account labor, etc. Please note that a minimum 20% match is required to be eligible for VATI, the private sector provider must provide 10% of the required match. If the private co-applicant cash match is below 10% of total project cost, applicants must provide financial details demonstrating appropriate private investment. If applicants and co-applicants are seeking to include prior expended funds as matching funds, Attachment 11 must be completed. Label Attachments: Attachment 9 - Funding Sources Table; Attachment 10 – Documentation of Match Funding; Attachment 11 - Prior Expended Match Form

Answer:

Brightspeed is committing 53.5% (\$3,166,739.28) and Rockbridge County is committing 30% (\$1,774,300) of the overall project cost in matching funds, resulting in a total match of 83.5% of total project costs.

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

14. **Leverage:** Describe any leverage being provided by the applicant, co-applicant, and partner(s) in support of the proposed project. (up to 10 points)

Answer:

This project is part of a joint effort by Rockbridge County, CSPDC, Brightspeed, BARC Connects, and Verizon to bring reliable, affordable highspeed internet service to the residents and businesses that are unserved in the defined project areas of Rockbridge County. All parties are committed to working independently with Rockbridge County, which will submit three separate applications (one for each co-applicant) to connect the rural areas in Rockbridge County to reliable high-speed internet. Rockbridge County and the CSPDC have provided support to the regional planning process and in identifying unserved areas included in the scope of the project areas within the application. Brightspeed's project includes 5 main identified areas, separated by Brightspeed wire center, that are unserved in Rockbridge County. If funded, this project will leverage Brightspeed's existing wire centers to expand the fiber network, making FTTP service available to low-density areas including almost 1,734 homes and businesses in Rockbridge County. To accomplish this, Brightspeed plans to expand its fiber-optic internet network throughout Rockbridge, utilizing 16.5% VATI funding, 30% county funding, and 53.5% Brightspeed matching funds for the fiber build. In leveraging partnerships with all three applicants and the CSPDC, broadband service in the County will create potential economic growth opportunities; telecommuting opportunities and improve the rural quality of life; it will provide opportunities for new business attraction and expansion; it will retain a trained, competitive workforce; and it will compete with more densely populated regions that currently have broadband infrastructure in place to meet residential and business needs. This project will position Rockbridge to take advantage of recent trends of outmigration from urban environments for those seeking a better quality of life while still retaining access to modern, digital needs.

15. **Communications Plan:** Describe efforts to keep the public informed of project progress and the broadband adoption plan.

a. Explain how you plan on communicating the project status to stakeholders, including but not limited to County leadership, project areas residents, etc. (Up to 10 points)

b. Explain how you plan to promote customer take rate, including marketing activities, outreach plan, and other actions to reach the identified serviceable units within the project area. Provide the anticipated take rate and describe the basis for the estimate. (up to 10 points)

c. Describe any digital literacy efforts to ensure residents and businesses in the proposed project area sufficiently utilize broadband. Please list any partnering organizations for digital literacy, such as the local library or cooperative extension office.

Answer:

a.

Both Rockbridge and the CSPDC will provide significant local assistance to assist with this project to ensure its success in the region. Through grant admin services, the CSPDC will hold monthly project management team meetings, distribute monthly meeting summaries to all team members, and share the monthly reports submitted to DHCD. The County can use this information to update the board. The CSPDC can share any project news through their newsletter, and/or social media platforms. These activities will include organizing meaningful community meetings with leaders, residents, and businesses in the County to discuss the project; mobilizing GIS resources and provide assistance to Brightspeed staff to respond to residents' questions or concerns related to the project. Additionally, the county will assist with the distribution of information including marketing materials; pricing for available services; guidance to sign-up for selected services. If needed, Rockbridge agrees to assist in areas related to permits, rights of way, easements and any other issues that may hinder or delay the proposed project. However, Brightspeed anticipates few issues, as it has existing ROW to customers previously served through Century Link.

For its part, Brightspeed commits to scheduled public meetings, coinciding with project milestones and coordinated with the County, to keep the public and other stakeholders informed on the status of the build. The Rockbridge County Public School System has agreed to provide school space and technology in the area of projects, to allow for these meetings and the County will arrange for both in-person attendance as well as the option to join remotely via video conferencing to all interested parties. Brightspeed will 'turn up' portions of the proposed network to accommodate customers as soon as the network is capable of providing service to an area. Approximately one month before a segment of the network is able to provide service to customers, Brightspeed and Rockbridge County would hold a meeting to inform the public when and where service would be available, the pricing of services,

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

and any action that needed to be taken on prospective customers' part, such as scheduling locates for drops on private property. These meetings would happen as each segment of the proposed network was completed until the project was fully complete.

b.

Brightspeed intends to meet the challenges of customer adoption by utilizing strong outreach tactics with clear messaging and wide reach – to promote customer acquisition and drive adoption in the area.

Brightspeed's local teams will determine, based on the geography of the impacted households, the best method of marketing the launch to ensure the highest degree of efficacy within the targeted communities for telehealth, smart farming, e-entrepreneurship, and distance learning. We expect to implement a marketing strategy similar to that used where we have completed builds using grant dollars in other communities, which include: Planned Marketing Campaigns that include multiple touches as groups of addresses within a wire center are completed using a Pre-launch Awareness "Coming soon!" message, supported by local teams issuing news releases; and placing yard signs and banners. Then we conduct a pre-sale sign-up as part of our launch awareness, conducting a direct message and email outreach, using geofencing. We plan to hang doorhangers and participate in in-person events as described elsewhere in the application.

Once the area is officially launched, we continue with post-launch awareness programs with our traditional type marketing, including "Open For Sale" Campaigns/Touchpoints while leveraging our existing legacy fiber advertising and point of sale materials. We continually monitor the responses and augment with In-Flight campaigns to increase awareness and take rates. Where possible, Brightspeed will consider additional technology strategies to enable adoption by the general public. Brightspeed is committed to undertaking programs necessary to meet the needs of the local community, including, but not limited to, educational forums, technology demonstrations, or other individual outreach. We will ensure that the necessary staff is available to current and prospective customers to ensure the most seamless possible adoption of Brightspeed's technology.

Brightspeed looks forward to working with Rockbridge County and its residents to improve our existing network to offer high speed internet, to offer fiber broadband services to new customers, to educate customers about how to use the service and how to protect themselves on-line, and to furthering opportunities for the communities in our legacy footprint.

Brightspeed anticipates a take rate between 55% and 65%. This would be consistent with historical experience in rural areas with a single provider.

c.

Brightspeed is in the process of developing a digital literacy training module for their website and has dedicated staff that actively looks for partnerships with organizations that provide outreach and educational programs that facilitate digital literacy, such as libraries, workforce development and governmental agencies.

Locally, the Rockbridge Regional Library System hosts events called the Tech Power Hour every Thursday and Friday. This program provides one-on-one "technical assistance on everything technology" from "setting up a phone, tablet or laptop" to "internet safety awareness, how to use Libby, social media, and much more!" This digital literacy instruction is provided free of charge to residents and can be used to understand e-mail, web surfing, and any other digital general knowledge topics interested patrons would like to ask about. This service is provided in all four library locations servicing County residents. In addition, the Rockbridge County Public School System intentionally and separately teaches digital literacy in elementary school classrooms.

Community education forums may also be conducted through launch events where customers can ask questions and register for service. Customized joint marketing programs could be evaluated for applicability and mutual benefit. In addition, the local Chamber of Commerce supports this application and provides a mechanism for reaching the business sector. Similarly, the Rockbridge County Public School Division is a supporter and will assist in reaching families of the student population.

Project Management: Identify key individuals who will be responsible for the management of the project and provide a brief description of their role and responsibilities for the project. Present this information in table format. Provide a brief description of the applicant and co applicant's history and experience with managing grants and constructing broadband communication facilities.

Answer:

Individual

Position

Experience

Tom Maguire

Chief Executive Officer

Tom's telecommunications experience spans four decades, from an early career as a field technician to subsequently leading many facets of the business. This experience brings a unique perspective to Brightspeed's business model and influences Tom's belief that operations is most effective when it works with other parts of the organization to provide the best customer experience. Tom previously served as Chief Operating Officer until he became CEO in November of 2023.

Manuel Sampedro

Chief Operating Officer

Prior to becoming Brightspeed's COO in November 2023, Manuel served as a leader at Verizon for more than 26 years, ultimately becoming Senior Vice President of Global Business Transformation before making the switch to Brightspeed. Manny brings with him decades of experience managing thousands of employees to effectively deliver telecom solutions to millions of customers.

Ashok Kumar

Chief Information Officer

As a visionary at Verizon and its predecessor company for over two decades, Ashok built systems that ran the first large scale deployment of Fiber to The Home Network (Verizon Fios) and spent a decade helping Verizon scale Fios into the most reliable broadband in America. Most recently, he enabled its brick-and-mortar business into digital first engagement for over 100+ million wireless and Fios customers.

Colon McLean

Chief Human Resources Officer

Colon's HR leadership experience is rooted in the Carolinas where he served Duke Energy for twenty-two years. Colon has led large human resources organizations within public and private equity-backed companies in the greater Chicago area since 2008.

Steve Tugentman

Chief Legal Officer

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

Steve is excited to join Brightspeed's mission to bridge the digital divide and connect the most underserved areas. In multiple leadership positions in Legal over a 30-year career at Verizon, Steve's teams helped transform the telecommunications business, from sales and marketing, to technology, centralized services, policy and operations.

Monty Garrett

Chief Financial Officer

Monty Garrett has worked in telecom finance since he began at Verizon in 1994, ultimately becoming Senior Vice President of Finance in 2017, a position he held until March of 2023 before joining the Brightspeed team as CFO. Monty is well-versed in GAAP as it relates to telecommunications and has the expertise to budget, forecast and manage large capital expenditure builds such as the one applied for in this application.

Courtland Madock

Chief Marketing Officer

Courtland brings more than 13 years of experience at US Cellular, where she led the transformation of the company's high-speed internet product line and grew market share in a fiercely competitive and predominantly rural consumer footprint. At Brightspeed, she will focus on growing sales, marketing, creating a customer experience second to none, and building recognition of the Brightspeed brand.

Tom Dailey

Vice President: Compliance, Regulatory and Policy

Tom is a senior global technology and business leader and former chief legal officer with more than 25 years of telecommunications, media and technology (TMT) leadership experience at Fortune Top 20 company, Verizon. An advisor to C-suite executives on legal, strategy, policy and regulatory matters, Tom heads up the company's public policy and government relations, regulatory, privacy and compliance functions. Tom also leads Brightspeed's Public Policy and Government Affairs organization.

Spencer Suter

Rockbridge County Administrator

Responsible for overseeing Rockbridge County VATI grant and matching contributions for grant. Executes contracts, MOUs, and agreements.

Steve Bolster

CSPDC Regional Planner

Grant administration and coordination with localities, DHCD and ISP providers. Prepares progress reports and assists with mapping and GIS.

Rockbridge County manages many grants each year, both large and small. Most are State grants, though they have significant experience with federal grants as well, including successful implementation of a \$10M 2012 NTIA Broadband grant which provided a jump start for rural broadband in Rockbridge County and the Cities of Lexington and Buena Vista. The CSPDC has been a partner in

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

many of these grants including successful implementation of a prior VATI grant.

Brightspeed has experience with managing broadband grant programs and the compliance reporting requirements. We are completing several grant project-builds under prior CenturyLink grants and have complied with all reporting and program requirements associated with the Treasury Uniform Grant Guidelines – Part 200, and compliance reporting associated with Coronavirus State and Local Fiscal Recovery Funds (SLFRF) requirements associated with ARPA and state specific grant requirements in Virginia, South Carolina, North Carolina, and Wisconsin. In addition, we have been awarded broadband grants and are executing builds associated with:

\$92.2 million in North Carolina that will fund 37 projects to connect 39,000 premises.

\$1.5 million in Wisconsin to connect 6,120 premises.

\$300,000 for two projects in Louisiana that will connect 400 premises.

\$939,000 in South Carolina to connect 1,348 premises.

\$2.3M in Texas to connect nearly 5000 premises.

And we have contingent awards in North Carolina, Michigan and Arkansas.

17. **Project Budget and Cost Appropriateness**

Budget: Applicants must provide a detailed budget that outlines how the grant funds will be utilized, including an itemization of equipment, construction costs, and a justification of proposed expenses. If designating more than one service area in a single application, each service area must have delineated budget information. For wireless projects, please include delineated budget information by each tower. Expenses should be substantiated by clear cost estimates. Include copies of vendor quotes or documented cost estimates supporting the proposed budget. Label Attachments: Attachment 12 – Derivation of Costs; Attachment 13 - Documentation of Supporting Cost Estimates. (up to 10 points)

Answer:

The total construction costs are \$5,864,332 to construct the proposed network including 173 miles of fiber and \$50,000 of administrative costs for grant administration and compliance performed by the Central Shenandoah Planning District Commission, for a total cost of \$5,914,332. Brightspeed and Rockbridge County are seeking a grant of \$975,865, or 16.5% of the total costs, with Brightspeed providing funding of \$3,164,168 (53.5%) and Rockbridge County providing the remaining funds of \$1,774,300 (30%). The funding received will not subsidize Brightspeed operating expenses or the monthly bills of its customers and will not contribute to Brightspeed operating costs or profits. The funding will be solely used to offset the high capital expense costs associated with network deployment. Absent receipt of the broadband expansion grant, Brightspeed will not undertake the project to the extent proposed.

The total construction costs includes Outside Plant (OSP) (Fiber, Material & Equipment) along with Inside Plant (Install, Contract, Labor). Brightspeed will own and operate the facilities as part of its telecommunications network. The construction costs are related to project planning, obtaining construction permits, construction of facilities, and installation and testing of the broadband service being constructed. For more information on the anticipated distribution of the project budget, including across the categories of Labor and Materials, please see Attachments 12 & 13.

To achieve efficiencies in expenditures, Brightspeed intends to leverage existing construction plans in the project area from various planned fiber builds that the organization has planned in the state already. This project will also be able to leverage five existing Brightspeed central offices within the project area. These existing resources will allow the project to be designed and constructed as economically as possible, and their existence offers Brightspeed greater budget flexibility in executing this project. Brightspeed consistently engages in selecting competitive vendors and materials for its capital expenditure projects through RFPs for all major purchases.

Rockbridge County - BrightSpeed - VATI 2024

18. The cost benefit index is comprised of state cost per unit passed. Individual cost benefit scores are calculated and averaged together to create a point scale for a composite score. Provide the following:

- a. Total VATI funding request

- b. Number of serviceable units
(up to 125 points)

Answer:

1. Total VATI funding request: \$973,293
2. Number of serviceable units: 1,734

19. **Commonwealth Priorities (Up to 50 points)**

Additional points will be awarded to proposed projects that reflect Commonwealth priorities. If applicable, describe the following:

- a. Businesses, community anchors, or other passings in the proposed project area that will have a significant impact on the locality or region because of access to broadband.

- b. Unique partnerships involved in the proposed project. Examples include electric utilities, universities, and federal/state agencies.

- c. Digital equity efforts to ensure low to moderate income households in the proposed project area will have affordable access to speeds at or above 100/20 mbps, include information regarding the internet service provider's participation in the Affordable Connectivity Program

- d. The co-applicant's efforts to mitigate supply chain constraints, including labor shortages and order-to-delivery delays on telecommunications materials required to construct broadband networks.

- e. The applicant's and co-applicant's efforts to promote broadband adoption, including, but not limited to: telehealth, smart farming, e-entrepreneurship, and distance learning.

Answer:

Application to DHCD Submitted through CAMS

Rockbridge County

Rockbridge County - BrightSpeed - VATI 2024

a.

Please see Attachment 20 for a list of community anchors and businesses in the project area.

b.

As noted elsewhere in this application, Rockbridge County is partnering with three internet service providers for this round of VATI funding; Brightspeed, BARC Connects (an electric co-op), and Verizon. Rockbridge will submit a separate application in conjunction with each of these providers, who will work independently with the County to build out the needed infrastructure in their respective project areas to achieve universal broadband coverage in the County in conjunction with VATI and BEAD opportunities. In addition, the County and Brightspeed will partner with the Lexington/Rockbridge Chamber of Commerce and the Rockbridge County Public Schools to market the Brightspeed offering.

In addition, while there are no universities directly in the proposed project area, local universities fully support of this grant project due to the fact that many of their employees live in the proposed area, as evidenced by the attached letters of support. If awarded, those employees would be able to realize work from home and research opportunities that do not currently exist, which will benefit the university system. In addition, many students, especially those in the critically important Mountain Gateway Community College system, live off campus and require quality broadband access to be successfully trained to enter the local workforce.

c.

Brightspeed participates in both ACP and federal Lifeline, which offer a \$30 and a \$9.25 monthly discount, respectively, to qualifying customers. In addition, Brightspeed offers an additional \$30 per month discount to residents that qualify for these programs, bringing the total maximum monthly discount to \$69.25 per month. As our 200/200 Mbps service is priced at \$59, this means customers that qualify for ACP will receive 200 Mbps symmetrical broadband service from Brightspeed at no out-of-pocket cost. In the event the FCC's ACP does not receive continued funding, Brightspeed is committed to continuing to provide its \$30 monthly discount to those low-income customers that would have qualified for Lifeline or ACP, and in doing so is committing to continue to offer its 200/200 Mbps service for \$29 (\$59 price - \$30 Brightspeed discount).

d.

Brightspeed is aware of the current and likely ongoing supply chain constraints as well as labor shortages. To address both issues, we have proactively entered into an agreement with a national material distributor, KGPCo, to facilitate timely procurement, stocking and distribution to our infrastructure services providers that we will be partnering with to complete any awarded fiber deployment. Additionally, we have entered into long term contracts with key material suppliers, i.e. Corning, Calix, Prysmian, to secure future manufacturing capacity and provide forecast of anticipated needs. From a labor perspective, Brightspeed has already secured capacity under contract from multiple national infrastructure service providers that are experienced with fiber deployment and have additional labor capacity secured via line extension agreements which are being assigned to Brightspeed from Lumen for contractor build capacity.

e.

Brightspeed will utilize effective marketing campaigns and informational resources to drive adoption in the area as described in detail above in 15b. Brightspeed and Rockbridge County will also implement the public informational meetings outlined in question 15a of this application. Brightspeed believes that the identified marketing strategies combined with the public meetings will drive adoption by letting consumers know exactly where and when the network will be available to them, the pricing of services, and what they need to do to prepare to be connected. Brightspeed personnel will be available at the public meetings for questions about how area residents can leverage the proposed network for smart farming, e-entrepreneurship, distance learning, and any other questions they may have. The County will work with the active membership Rockbridge Farm Bureau to ensure that the significant number of farm businesses contained in the project area are apprised of the benefit of broadband connection. Additionally, the County will coordinate with our local hospital, institutes of higher education, public school division and libraries (see attached letters of support).

20. Additional Information

Please attach any letters of support from stakeholders. If the applicant is not a locality(s) in which the project will occur, please provide a letter of support from that locality.

Attachment 14 – Letters of Support.

Provide the two most recent Form 477 submitted to the FCC, or equivalent, as well as point, polygon, and, for wireless providers, RSSI shapefiles for the project area **in .zip file form**. With attachments 17 through 20, attach any other information that the applicant desires to include. Applicants are limited to four additional attachments.

Label Additional Attachments as:

- a. Attachment 15 – Two most recent Form 477 submitted to the FCC or equivalent
- b. Attachment 16 - Point and Polygon shapefiles, in.zip file form, showing proposed passings and project area
- c. Attachment 17 - For wireless applicants: shapefiles, in .zip file form, indicating RSSI projections in the application area
- d. Attachment 18 – XXXXXXXX

Supplemental Application Question

Applicant: Rockbridge County - Brightspeed 2024 VATI

Project Name (s): 2024 VATI Rockbridge County -Brightspeed

The question below is question e. from the Commonwealth Priorities section of the 2024 Virginia Telecommunication Initiative (VATI) Guidelines. Please answer the question using this form and email to VATI@dhcd.virginia.gov.

Commonwealth Priorities

20. Additional points will be awarded to proposed projects that reflect Commonwealth priorities. If applicable, describe the following:

e. The co-applicant’s effort to mitigate costs and delays that may be associated with make-ready and other permitting requirements anticipated for network deployment.

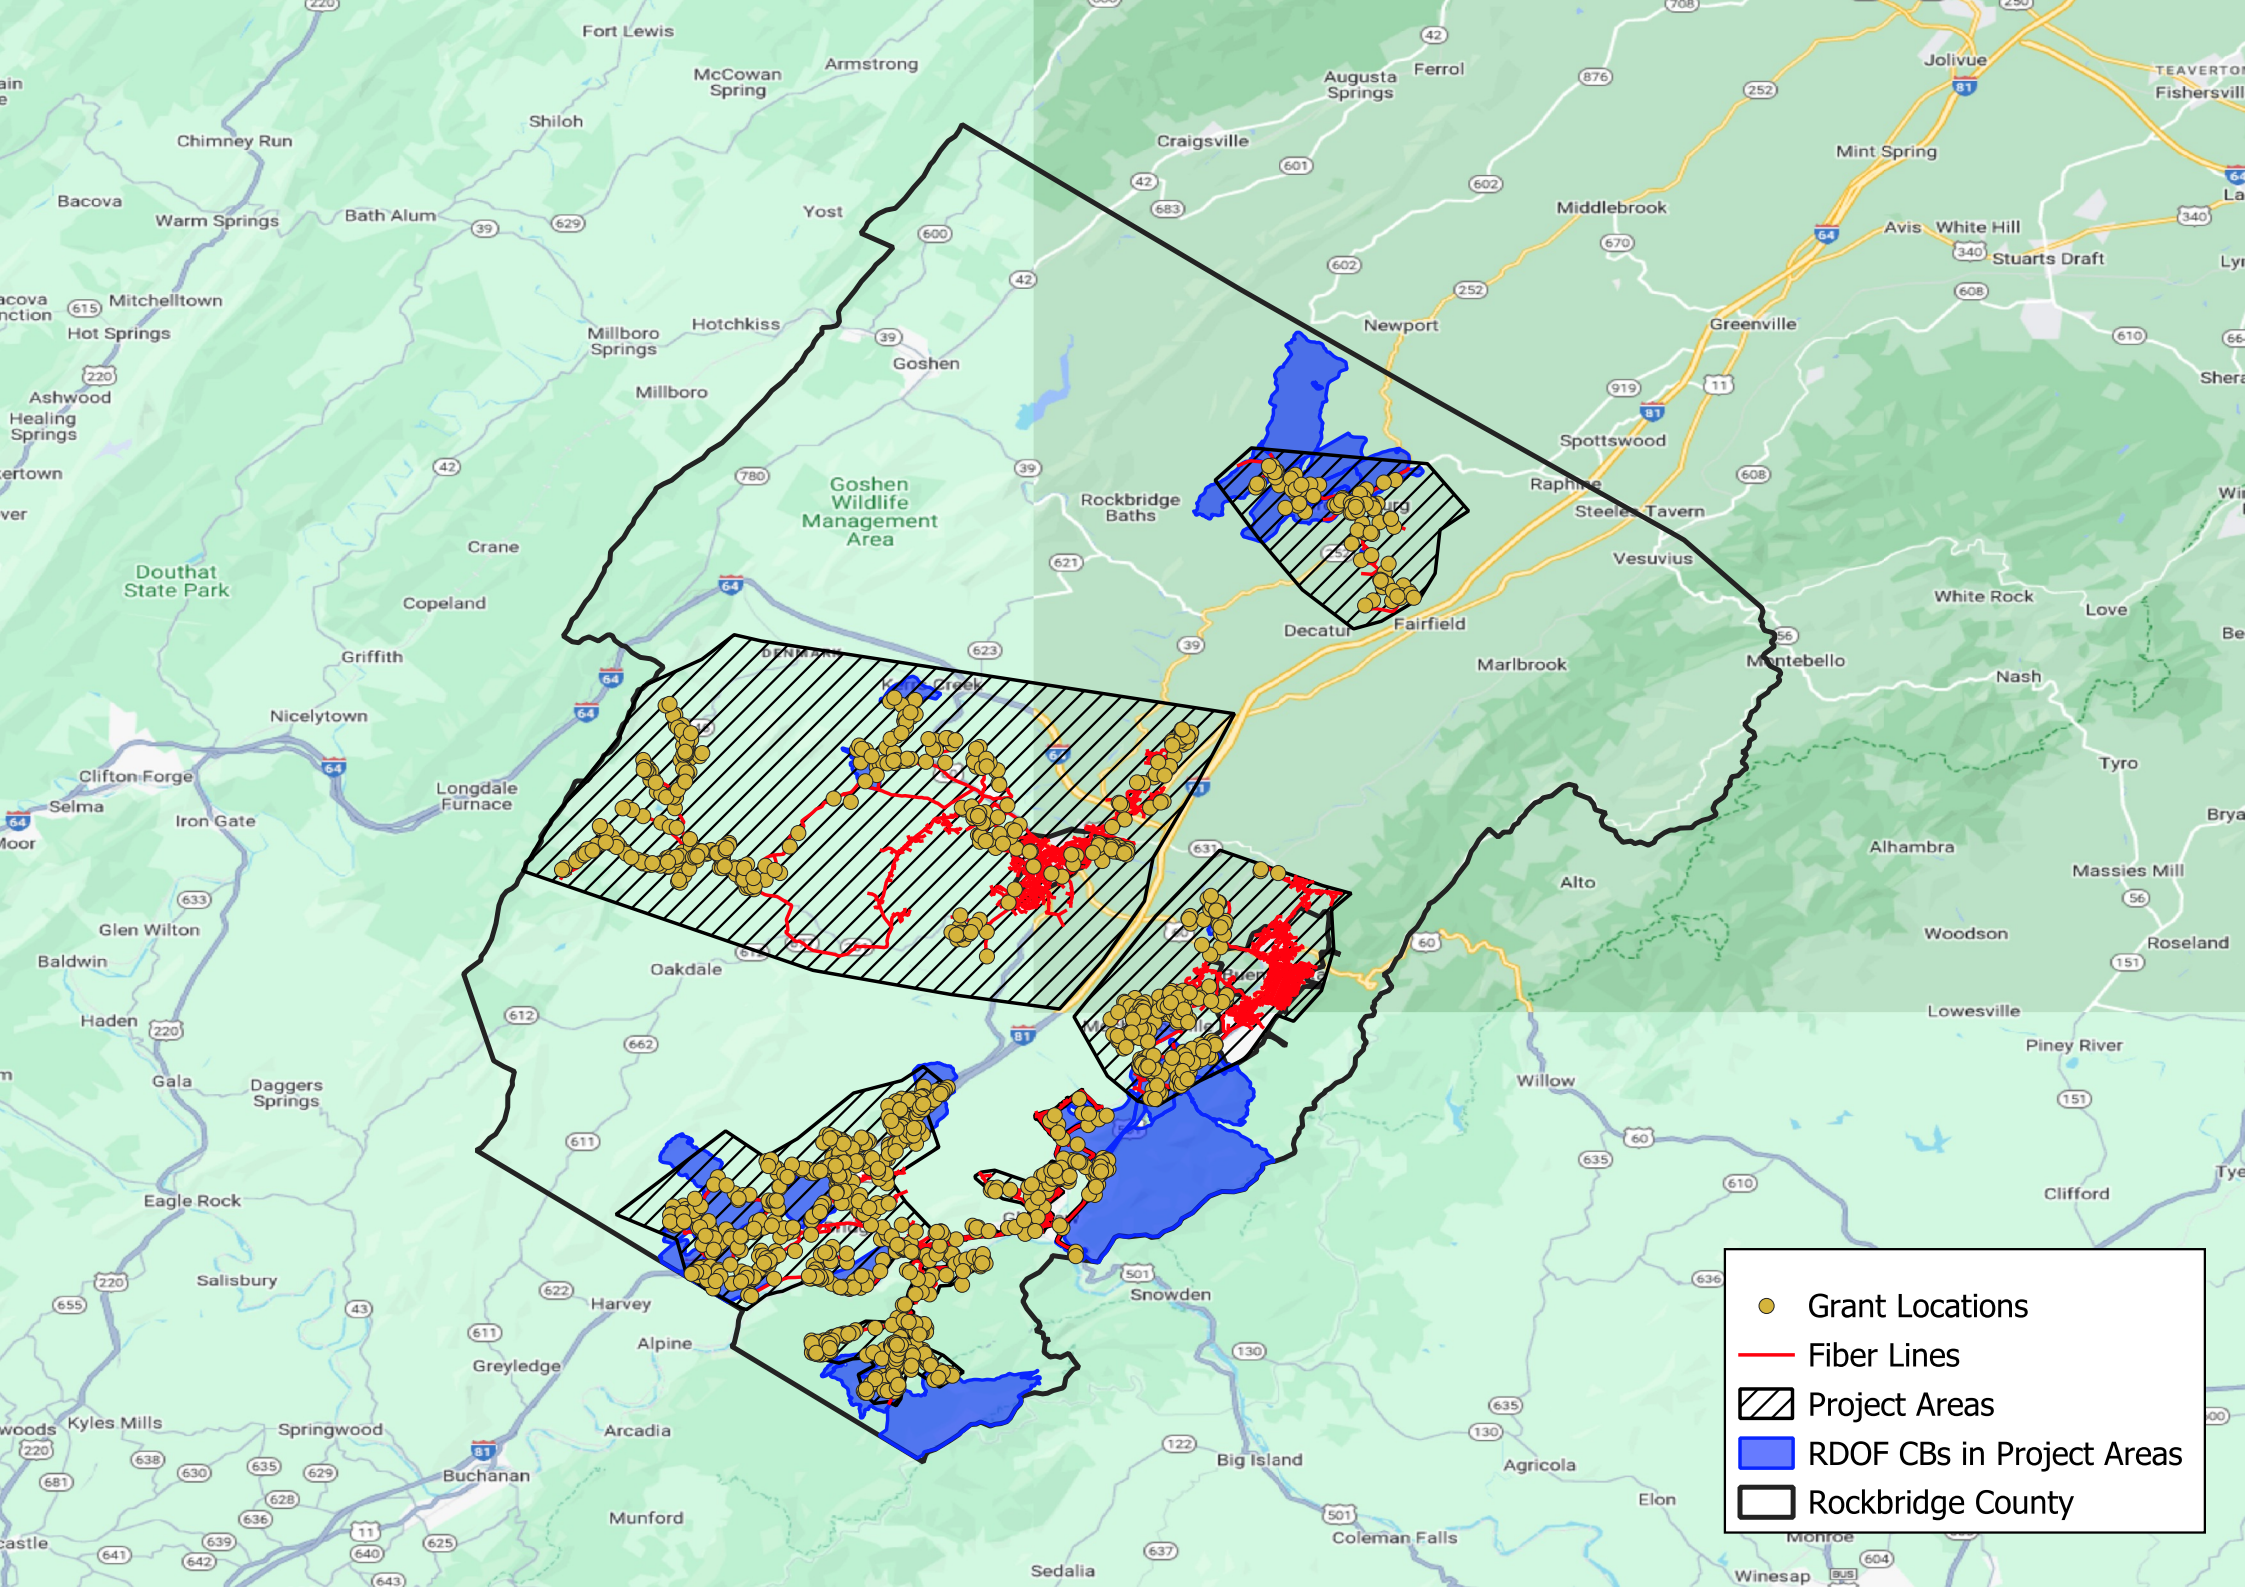

Brightspeed’s employees have decades of experience with permitting and make-ready costs and requirements across Virginia. Brightspeed will leverage that knowledge and existing relationships with local, state, and county officials to ensure make-ready and other permits are applied for and approved to ensure alignment with the project timeline included as Attachment 7.

2023 Virginia Telecommunication Initiative (VATI) Passing Form Natural Bridge Service Area

Type of Passings	Total Number of Passings in the Project Area ¹	Passings in the Project Area, without Special Construction Costs Required ²	Passings with Special Construction Costs budgeted in the Application ³	Number of Passings with Speeds at 25/3 or below in Project Area ⁴
Residential	619	619	0	401
Businesses (non-home based)	107	107	0	78
Businesses (home-based)	0	0	0	0
Community Anchors	0	0	0	0
Non-residential	0	0	0	0
Total	726	726	0	479

Note: The Total Number of Passings **MUST** be equal to the Residential, Business (non-home based), Non-residential and Community Anchors sum.

Note: Do not include passings in RDOF awarded areas that were awarded to the co-applicant; these passings should be included in the RDOF Passings Form. Passings included in this application in RDOF awarded areas that were not awarded to the co-applicant, unless successfully challenged, are considered unserved and should be counted as passings in this form.

¹The total number of structures in the project area that can receive service. See definition of passing below for more detail.

²The number of structures in the project area that will not require special construction costs to provide service to. These passings fall within the broadband provider's standard service connection drop length and do not require nonstandard equipment or any additional fees above normal service connection fees required to provide broadband access to a premise.

³The number of structures in the project area with all construction costs budgeted in the application. These passings will not require any additional special construction costs beyond those budgeted for in the VATI application.

⁴The number of structures in the project area that do not have access to internet at speeds of at least 25 mbps download and 3 mbps upload.

Definitions

Passing – any structure that can receive service. Multi-unit structures may be counted as more than 1 passing, provided individual connections and account are planned at that structure.

Business – An organization or entity that provides goods or services in order to generate profit. Businesses based in residential homes can count if they are a registered business (BPOL, LLC, etc.).

Community Anchor - schools, libraries, medical and health care providers, public safety entities, community colleges and other institutions of higher education, and other community support organizations and agencies that provide outreach, access, equipment, and support services to facilitate greater use of broadband service by vulnerable populations, including low-income, unemployed, and the aged.

Non-Residential Passing – places of worship, federal, state, or local facilities or other potential customers that are neither a residence, business or a community anchor as defined above.

2023 Virginia Telecommunication Initiative (VATI) Passing Form Lexington Service Area

Note: The Total Number of Passings **MUST** be equal to the Residential, Business (non-home based), Non-residential and Community Anchors sum.

Note: Do not include passings in RDOF awarded areas that were awarded to the co-applicant; these passings should be included in the RDOF Passings Form. Passings included in this application in RDOF awarded areas that were not awarded to the co-applicant, unless successfully challenged, are considered unserved and should be counted as passings in this form.

¹The total number of structures in the project area that can receive service. See definition of passing below for more detail.

²The number of structures in the project area that will not require special construction costs to provide service to. These passings fall within the broadband provider's standard service connection drop length and do not require nonstandard equipment or any additional fees above normal service connection fees required to provide broadband access to a premise.

³The number of structures in the project area with all construction costs budgeted in the application. These passings will not require any additional special construction costs beyond those budgeted for in the VATI application.

⁴The number of structures in the project area that do not have access to internet at speeds of at least 25 mbps download and 3 mbps upload.

Definitions

Passing – any structure that can receive service. Multi-unit structures may be counted as more than 1 passing, provided individual connections and account are planned at that structure.

Business – An organization or entity that provides goods or services in order to generate profit. Businesses based in residential homes can count if they are a registered business (BPOL, LLC, etc.).

Community Anchor - schools, libraries, medical and health care providers, public safety entities, community colleges and other institutions of higher education, and other community support organizations and agencies that provide outreach, access, equipment, and support services to facilitate greater use of broadband service by vulnerable populations, including low-income, unemployed, and the aged.

Non-Residential Passing – places of worship, federal, state, or local facilities or other potential customers that are neither a residence, business or a community anchor as defined above.

VATI Applicant and Co-Applicant Memorandum of Agreement

This agreement is made on December 12, 2023 between the Rockbridge County Board of Supervisors, 150 South Main Street, Lexington, Virginia 24450, and Connect Holding II d/b/a/ Brightspeed ("Brightspeed"), 1120 South Tryon Street, Ste. 700, Charlotte, NC 28203.

RECITALS:

- A. Whereas, the Department of Housing and Community Development (DHCD) will be implementing the 2023 Virginia Telecommunications Initiative (VATI) grant program; and
- B. Whereas, the primary objective of the VATI program is to provide financial assistance to supplement construction costs by private sector broadband service providers, in partnership with local units of government to extend service to areas that presently are unserved by any broadband provider; and
- C. Whereas, applications must be submitted by a unit of government (Towns, Cities, Counties, EDA/IDA, Broadband/Wireless Authorities, Planning District Commissions, etc.) with a private sector provider(s) as a co-applicant; and
- D. Whereas, Rockbridge County, as the Applicant, has designated Brightspeed as a co-applicant; and
- E. Whereas, Rockbridge County and Brightspeed will partner for a grant application for the VATI grant program to serve areas in Rockbridge County.

NOW, therefore, the parties agree that they will uphold the following responsibilities:

Rockbridge County:

1. Rockbridge County, through an agreement with the Central Shenandoah Planning District Commission (CSPDC) will act as fiscal agent for the project and maintain accurate records of the financial expenditures of the VATI monies, including but not limited to financial reports, monthly funding draws, approval of Brightspeed expenditures and invoices, documentation of matching funds, distribution of funds; and
2. Through an agreement with Rockbridge County, the CSPDC will provide overall grant management of the VATI project and provide coordination and administration of the project by working as a liaison between the County, Brightspeed and DHCD; and
3. Through an agreement with Rockbridge County, the CSPDC will provide assistance with GIS mapping and project performance reporting.

Brightspeed:

1. Will provide the required information for the management of the VATI grant, including but not limited to progress reports and monthly invoices; and
2. Will provide the required documents to the County for zoning and permit applications; and
3. Will design, engineer, construct and implement broadband services as designated in the VATI application by the grant deadline, and;

4. Will guarantee that the standard bandwidth offerings for the projects will be a minimum of 200 Mbps download and 200 Mbps upload, with fiber offerings, depending on the service selected by the potential subscriber, to be up to 1G symmetrical speeds.

This agreement will terminate when DHCD notifies Rockbridge County that all grant requirements have been satisfied.

RE: Letter of Support for Rockbridge County FY2024 VATI
Application and Match Certification

Dear Dr. Holmes:

Connect Holding II LLC d/b/a Brightspeed is pleased to support and partner on Rockbridge County's FY 2024 Virginia Telecommunication Initiative ("VATI") application as a co-applicant and Internet Service Provider for the project. Brightspeed is the entity created through the acquisition of the Incumbent Local Exchange Company ("ILEC") assets of Lumen, Inc. On August 3, 2021, Apollo Global Management, Inc. and Lumen Technologies, Inc. announced a definitive agreement for Apollo to acquire the assets of Lumen's ILECs currently operating under the CenturyLink brands, among others. This transaction closed on October 3, 2022 and the new company, Connect Holding II LLC, operates under the name Brightspeed, which has taken over all CenturyLink ILEC operations in Virginia (and 19 other states).

At Brightspeed, a core part of our mission is to promote digital inclusion and developing solutions that increase connectivity is something that we intend to actively pursue, both in Virginia and beyond. Brightspeed's motto is "Internet equals opportunity," which is the foundational idea on which the company is run. Virginia has a need to provide broadband to underserved areas to stimulate educational and entrepreneurial growth, as well as improve local workforce opportunities. Brightspeed will utilize its extensive broadband background and partnership with Virginia Counties like Rockbridge to bring maximum broadband coverage allowing homes and businesses within the community to compete globally, pursue educational opportunities, and provide access to healthcare.

In line with the Governor's universal broadband initiative in the Commonwealth of Virginia, Rockbridge County proposes to partner with Brightspeed to develop and implement last mile fiber to approximately 1,734 homes and businesses in the unserved and underserved areas of the County. This project will provide critical broadband services that will enhance the quality of life and help stimulate the economy in this rural region.

Furthermore, this letter confirms that if VATI funding requested in this application is awarded, Brightspeed is committing to make investments (matching funds) up to \$3,166,739 depending on the match provided through the engineering, design and construction of the Brightspeed construction portion of certain project areas. These matching funds have been allocated in Brightspeed's current budget and any unspent funds will be carried forward into future fiscal years as necessary. Our matching funds represent 53.5% of the total project cost.

Activities that will be paid for with these funds include equipment purchases, contractual services, outside plant materials, and fiber construction, among other things.

Please be assured of Brightspeed's complete support of this application and of our appreciation for your consideration.

Sincerely,

A handwritten signature in blue ink, appearing to read "P. Sherwood".

Re: Letter of Commitment for RockbridgeCounty 2024 VATI Application - **Brightspeed**

Dear Dr. Holmes:

On behalf of the Rockbridge County Board of Supervisors, I am happy to submit a 2024 Virginia Telecommunication Initiative ("VATI") application to achieve universal broadband coverage in Rockbridge County. This is one of three applications being submitted by the County with our partners, Brightspeed, BARC Connects and Verizon.

In line with the Governor's universal broadband initiative in the Commonwealth of Virginia, Rockbridge County proposes to partner with Brightspeed to develop and implement last mile fiber to approximately 1734 homes and businesses in the unserved areas of the County. This project will provide critical broadband services that will enhance the quality of life and help stimulate the economy in this rural region.

Let this letter confirm that the Rockbridge County Board of Supervisors has approved \$1,774,300 in local American Rescue Program Funds to match the VATI funds in this application. Furthermore, if VATI funding requested in this application is awarded, co-applicants Brightspeed is committing to make investments representing no less than 53.54% of the total cost of this project.

Please be assured of Rockbridge County's complete support of this application and our appreciation for your consideration of this request. We appreciate your consideration of this effort, which is critical for so many of our residents.

Spencer H Suter

RE: Freedom of Information Act ("FOIA") Exemption Request

Dear Dr. Holmes:

Connect Holding II LLC d/b/a Brightspeed is planning to support and partner on Rockbridge County's 2022 Virginia Telecommunication Initiative ("VATI") application as a co-applicant and Internet Service Provider for the project. Brightspeed is the entity created through the acquisition of the Incumbent Local Exchange Company ("ILEC") assets of Lumen, Inc. On August 3, 2021, Apollo Global Management, Inc. and Lumen Technologies, Inc. announced a definitive agreement for Apollo to acquire the assets of Lumen's ILECs currently operating under the CenturyLink brands, among others. The new company, Connect Holding II LLC, will operate under the name, Brightspeed. After the transaction closes, which we expect will be on or about October 3, 2022, Brightspeed will take over all CenturyLink ILEC operations in Virginia (and 19 other states).

Prior to submitting financial information with the VATI application, Brightspeed submits this FOIA Exemption Request to the Virginia Department of Housing & Community Development ("DHCD") pursuant to Section 2.2-3705.6-32 of the Code of Virginia ("Va. Code"). That VA Code section provides that DHCD has the legal authority to exempt from the mandatory disclosure provisions of the Virginia Freedom of Information Act the following types of information contained in a public record:

Information related to a grant application, or accompanying a grant application, submitted to the Department of Housing and Community Development that would (i) reveal (a) trade secrets, (b) financial information of a grant applicant that is not a public body, including balance sheets and financial statements, that are not generally available to the public through regulatory disclosure or otherwise, or (c) research-related information produced or collected by the applicant in the conduct of or as a result of study or research on medical, rehabilitative, scientific, technical, technological, or scholarly issues, when such information has not been publicly released, published, copyrighted, or patented, and (ii) be harmful to the competitive position of the applicant.

To ensure this type of information is exempted from a FOIA request, and protected from disclosure, VATI requires applicants seeking a FOIA exemption to make a written request to the Department:

1. Invoking such exclusion upon submission of the data or other materials for which protection from disclosure is sought;
2. Identifying with specificity the data, information, or other materials for which protection is sought; and
3. Stating the reasons why protection is necessary.

Brightspeed will submit the confidential version of financial information pursuant to its request for exemption. Those portions of documents marked confidential contain the confidential financial data, assumptions about costs underlying various build plans, and information about anticipated partners where confidential negotiations are on-going. This type of information, if disclosed, would be harmful to Brightspeed's competitive position and its business interests. This information is not otherwise publicly available.

Brightspeed requests that the information marked confidential be granted an exemption from FOIA obligations and treated as confidential in accordance with the VATI guidelines.

Ms. Sherwood:

This letter is in response to your August 25, 2022 request for Freedom of Information (FOIA) exemption for information provided in regards to Rockbridge County's FY23 Virginia Telecommunication Initiative applications in partnership with Brightspeed. Pursuant to 2.2-3705.6-32 of the Code of Virginia, the Department of Housing and Community Development (DHCD) must make a written determination within ten (10) days of the request as to whether a FOIA exemption will be afforded as well the nature and scope of the protection. Upon receipt of the written determination from DHCD, documents must be submitted to vati@dhcd.virginia.gov and signified as exempted materials in the file name of each document(s). All exempted information will be securely maintained and accessed by Office of Broadband staff only. After careful review, DHCD has determined the following:

- The request for an exemption pursuant to § 2.2-3705.6-32 of the Code of Virginia for the “confidential financial data, assumptions about costs underlying various build plans, and information about anticipated partners where confidential negotiations are on-going.” as defined in Brightspeed's request of August 25, 2022 is granted. The Exempt Materials have been deemed to include trade secrets and financial information, the release of which would be harmful to the competitive position of Brightspeed and its affiliates.

Please contact vati@dhcd.virginia.gov if you have any questions regarding the determination of your FOIA exemption request. Thank you again for your interest in the VATI program.

Sincerely,

Tamarah Holmes, Ph.D.
Director, Office of Broadband

RE: Rockbridge County 2024 VATI / BEAD Applications

Dear Dr. Holmes,

The City of Buena Vista fully supports Rockbridge County's 2024 VATI and BEAD applications to provide universal broadband to the many unserved homes and businesses throughout Rockbridge County.

Access to quality broadband is a priority for Buena Vista. While our city enjoys quality broadband connectivity, many of our staff, students, and employers live outside our city limits in Rockbridge County and it is vitally important that they have access at home as well. Further, the City of Buena Vista is committed to the betterment of the larger community and believes that access to broadband is critical for health, education and commerce.

We urge you to consider awarding Rockbridge County and its partners the grant funding required to achieve universal broadband access for all in our community.

Respectfully submitted,

RE: Rockbridge County 2024 VATI/BEAD Applications

Dear Dr. Holmes,

The City of Lexington offers our full support of Rockbridge County's 2024 VATI and BEAD applications to provide universal broadband to the many unserved homes and businesses throughout Rockbridge County.

Access to quality broadband is a priority for the City of Lexington. Many of our staff, students, and employers live outside of the city in Rockbridge County and it is essential that they have access at home as well. Access to quality broadband is also essential to our economic development, attracting better jobs and new residents. Many facets of our community, such as healthcare, education, retail, tourism, local government, and public safety, heavily rely on internet access. Further, the City of Lexington is committed to the advancement of the community as a whole and believes that access to broadband is critical for health, education, and commerce.

We urge you to consider awarding Rockbridge County, and its partners, the grant funding required to achieve universal broadband access for all in our community.

RE: Rockbridge County 2024 VATI / BEAD Applications

Dear Dr. Holmes,

The Town of Glasgow fully supports Rockbridge County's 2024 VATI and BEAD applications to provide universal broadband to the many unserved homes and businesses throughout Rockbridge County. We are thrilled that Glasgow is included in the Rockbridge/Brightspeed application.

Residents and businesses in and around the Town of Glasgow would benefit greatly from the support of the Commonwealth, as we collectively seek to provide quality broadband services to all. Our citizens deserve access to distance learning, telehealth services, business assistance and all other benefits which broadband provides.

We thank you in advance for your consideration of the County's 2024 VATI applications and urge you to award them for the benefit of our community.

RE: Rockbridge County 2024 VATI Applications

Dear Dr. Holmes,

Without reservation, please accept this letter as endorsement of Rockbridge County's VATI applications to increase internet availability to currently unserved homes throughout Rockbridge County.

Online access for students, teachers, and parents has never been more critical for Rockbridge County. As the pandemic introduces wider-scale distance learning for students and work-from-home for teachers, our rural, dispersed population in Rockbridge County continues to struggle with spotty and unreliable internet coverage, especially in far reaches of the county. The universal broadband plan outlined in the County's 2024 applications would have a tremendous positive impact in our ability to educate children in the Rockbridge County Public School System.

Please be assured of Rockbridge County Public School's complete support of this application, and, on behalf of the students, teachers, and parents, of our appreciation for your consideration.

Sincerely,

A handwritten signature in cursive script that reads 'Phillip Thompson'.

RE: Rockbridge County 2024 VATI / BEAD Applications

Dear Dr. Holmes,

Virginia Military Institute (VMI) fully supports Rockbridge County's 2024 VATI and BEAD applications to provide universal broadband to the many unserved homes and businesses throughout Rockbridge County.

VMI's Post (campus) has benefitted from previous efforts undertaken by Rockbridge County and the City of Lexington, to bring quality broadband service to our area. However, as an active participant in our larger community, VMI leadership recognizes that many areas of Rockbridge County remain unserved, including areas where VMI faculty and staff reside and their families. Further, the addition of broadband throughout the community facilitates recruitment of new faculty and staff with expanded real estate opportunities to purchase a home that can be served by quality broadband services.

We have and will continue to support Rockbridge County in many collaborative efforts and wish to see broadband connectivity extended to every home and business in our community.

Please consider awarding Rockbridge County and its partners the grant funding required to achieve universal broadband access.

Sincerely,

Dallas B. Clark

Brigadier General

Deputy Superintendent for Finance and Support

RE: Rockbridge County 2024 VATI / BEAD Applications

Dear Dr. Holmes,

Washington and Lee University (W&L) fully supports Rockbridge County's 2024 VATI and BEAD applications to provide universal broadband to the many unserved homes and businesses throughout Rockbridge County.

Access to quality broadband has been a priority for W&L for many years. In fact, in 2011, we partnered with Rockbridge County, the City of Buena Vista and the City of Lexington to create the Rockbridge Network Authority (RANA). With assistance of an NTIA grant, RANA extended middle mile to many community anchor institutions throughout the three localities, and served as a catalyst to spur last mile connectivity in many parts of the County.

While the W&L campus has been well-served by this initiative, many of our faculty and staff live in areas of the County with no or poor access to broadband. As such, we urge you to help leverage prior efforts, and consider awarding Rockbridge County and its partners the grant funding required to achieve universal broadband access.

Sincerely,

Steve McAllister
Vice President for Finance
and Treasurer

RE: Rockbridge County 2024 VATI/BEAD Applications

Dear Dr. Holmes,

Mountain Gateway Community College (MGCC) fully supports Rockbridge County's 2024 VATI and BEAD applications to provide universal broadband to the many unserved homes and businesses throughout Rockbridge County.

As with most Virginia Community Colleges, MGCC students do not live on campus. Thus, quality broadband in the home is critical for students to complete their course of study. Further, MGCC is committed to the larger community that we serve and access to quality broadband is essential for the health and wellbeing of our citizens and to promote education and commerce. Broadband has become a basic necessity for all citizens.

We urge you to consider awarding Rockbridge County and its partners the grant funding required to achieve universal broadband access for all in our community.

Thank you for your support and please do not hesitate to contact me with any questions.

Sincerely,

A handwritten signature in cursive script that reads "John J. Rainone".

RE: Rockbridge County 2024 VATI / BEAD Applications

Dear Dr. Holmes,

Southern Virginia University (SVU) is in full support of Rockbridge County's 2024 VATI and BEAD applications to provide universal broadband to the many unserved homes and businesses throughout Rockbridge County.

Access to reliable high-speed internet is a necessity for the success of our students, but for our faculty and staff as well. Southern Virginia University is an Apple Distinguished School that provides a consistent technology bundle to all students, faculty and staff including an iPad pro, keyboard and Apple pencil. We are actively working to close the digital divide in our community by leveling the playing field for students of all backgrounds through equitable access to technology. While we provide equitable hardware, providing equitable internet access is outside of our control with students, and faculty and staff living in rural areas of the county without access to high-speed internet.

Universal access to broadband access across all of Rockbridge County would truly leverage the entire community. We hope you will join with us by giving Rockbridge County the opportunity to obtain universal access to high-speed broadband internet while we continue to lift our university community through equitable access to technology.

Thank you for considering Rockbridge County for this life-changing opportunity.

Sincerely,

A handwritten signature in cursive script that reads "William D. Braddy".

RE: Support of Rockbridge County 2024 VATI Applications

Dear Dr. Holmes,

The Rockbridge County Farm Bureau fully supports Rockbridge County's 2024 VATI applications to provide universal broadband to the many unserved homes, farms and other businesses throughout Rockbridge County.

In a rapidly changing business environment, farmer and their families rely on a fast, consistent broadband connection, which is not yet available to many of our members. Farming is a cornerstone of Rockbridge County's economy, providing an economic engine while also feeding families both within and outside our borders and providing employment opportunities at home.

Via our meetings and frequent communications, we will gladly commit to actively market and promote broadband opportunities to our membership and all in the Rockbridge farming community, upon award of these greatly needed funds to expand services. We thank you in advance for your consideration of our needs in Rockbridge County.

Sincerely,

A handwritten signature in blue ink that reads "Mack Smith".

RE: Rockbridge County 2024 VATI / BEAD Applications

Dear Dr. Holmes,

Carilion Rockbridge Community Hospital (CRBH) fully supports Rockbridge County's 2024 VATI and BEAD applications to provide universal broadband to the many unserved homes and businesses throughout Rockbridge County.

Tele-Health is increasingly critical in the provision of medical services in rural areas such as Rockbridge. CRBH works closely with Rockbridge County to ensure access to health services. Unfortunately, many residents and businesses still do not have adequate connectivity and speeds to support telehealth and provide readily accessible access to medical service providers and pharmaceutical resources. It is critical that we work together to extend quality broadband access to every corner of Rockbridge County. This is especially important for children, seniors and the economically disadvantaged.

Please consider awarding Rockbridge County and its partners the grant funding to achieve universal broadband access, making access to medical resources available to all.

Sincerely,

A handwritten signature in black ink, appearing to read "G. Madsen", with a long horizontal line extending to the right.

RE: Rockbridge County 2024 VATI Application s

Dear Dr. Holmes,

The economic prosperity of Rockbridge is intricately tied to the imperative need for broadband access. The Rockbridge County Economic Development Authority wholeheartedly endorses Rockbridge County's 2024 VATI applications aimed at providing ubiquitous broadband connectivity to the numerous underserved homes and businesses scattered across the county.

The growth and success of businesses in this region are inextricably linked to the availability of dependable and universally accessible internet services, which regrettably remain insufficient across Rockbridge County. Numerous businesses within the county operate from the confines of their homes, specifically in areas deemed "last-mile" locations targeted for coverage in this application. In this context, broadband connectivity plays an indispensable role in fortifying our small businesses, fostering economic diversification, and facilitating job creation and retention within the areas of Rockbridge, Lexington, and Buena Vista.

The Rockbridge County Economic Development Authority fervently endorses these applications with the firm belief that their realization will serve as a catalyst for business expansion, while concurrently nurturing community and economic development within the heart of Rockbridge County.

Sincerely,

Boyd Brown
Chair
Rockbridge County Economic Development Authority

This project will not implement wireless infrastructure, so shapefiles indicating RSSI projections are not applicable.

Drive Down Costs and Accelerate Service Innovation with Next Generation PON

EXECUTIVE SUMMARY

To meet the surging consumer demand for bandwidth-heavy data services, two new next-generation passive optical network (PON) technologies have been standardized and are now being deployed by broadband service providers (BSPs): XGS-PON and NG-PON2.

Like previous PON technologies, both transmit data through fiber-optic cables, offering very high-capacity connections to multiple subscribers. However, because they are intentionally designed to use different wavelengths than GPON, XGS-PON and NG-PON2 can co-exist on the same fiber, allowing for the re-use of many portions of the optical distribution network (ODN).

XGS-PON, which was officially standardized by the ITU in 2016 (ITU G.9807.1), can deliver up to 10 Gbps of symmetrical bandwidth. NG-PON2 (ITU-T G.989), standardized a year earlier, utilizes multiple wavelengths, and can deliver 40 Gbps—with 80 Gbps possible in the future—on a single fiber. The move to even higher-speed PONs is already underway, notably via 25G/50G-EPON (IEEE 802.3ca) and 50G-PON, the former being officially standardized in 2020.

MEET THE 10G PONS

According to the latest market forecasts¹, by 2023, nearly two-thirds of the global population (around 5.3 billion people) will have internet access, up from 3.9 billion (51 percent) in 2018. Meanwhile, the number of connected devices is expected to be more than three times the global population by 2023. This means there will be 29.3 billion networked devices by 2023—or 3.6 devices for every person on the planet, up from 2.4 devices per person in 2018. Globally, the consumer segment's share of total devices and connections will be 74 percent, with the business segment claiming the remaining 26 percent.

These new subscribers and devices are coming online as data traffic is surging. Video viewing is the main driver, accounting today for about 80 percent of all global internet traffic. These trends have been further accelerated by the impact of the COVID-19 pandemic, fueled by millions of people relying on bandwidth-consuming applications while working and schooling from home and accessing latency-sensitive online entertainment such as streaming and gaming. Zoom, a leading video conferencing platform, reported an astounding 535% rise in daily traffic in 2020. Work from anywhere and advanced home entertainment will continue to drive utilization as the world settles into the new normal—these social changes are not expected to decline. Network reliability, bandwidth capacity, and security have come under pressure as a result.

In response, BSPs are deploying next-generation PON networks to make the move from single gigabit to 10G services. Developed as successors to GPON—which for most of the past decade enabled BSPs to offer 2.5 Gbps downstream and 1.25 Gbps upstream—the two next-generation PON standards being deployed today are XGS-PON (ITU G.9807.1) and NG-PON2 (ITU-T G.989).

Like previous PON technologies, both transmit data through fiber-optic cables, offering very high-capacity connections to multiple subscribers. However, as they are intentionally designed to use different wavelengths other than GPON, XGS-PON and NG-PON2 can co-exist on the same fiber, allowing for the re-use of many portions of the ODN.

As the consumer appetite for bandwidth continues to rise, the ability to deliver 10 Gbps speeds to both businesses and households will be critical for fiber-based BSPs to deliver the subscriber experience and next-generation services required to compete—and win—in an increasingly crowded marketplace.

A CATALYST FOR TRANSFORMATION

By deploying XGS-PON or NG-PON2, BSPs now have technology options that provide more than just significantly enhanced speeds. Both technologies offer extensive improvements over previous generations of PON that make them ideal for delivering new, advanced services to multi-dwelling units (MDUs), supporting mission-critical business applications, and readying for the widespread adoption of 5G mobile technologies.

Their most valuable application, however, is as a catalyst for access network transformation. More than 225 BSPs are deploying 10G-PON from Calix today, including both XGS-PON and NG-PON2. The key technical difference between the two technologies is the fixed wavelength supported on XGS-PON versus the multiple wavelengths supported on NG-PON2. There are also costs, hardware development and availability, and speed-to-market considerations when choosing between the two.

An overview of the two standards is shown in Table 1.

Standard	Nomenclature	Bandwidth Options	Wavelengths	Primary Focus
XGS-PON (ITU G.9807.1)	10G GPON	10G Down 10G Up	1577nm Down 1270nm Up	Residential/ Business/MDU
NG-PON2 (ITU G.989)	NG-PON2	4 to 8 X 10G TDM Down 4 to 8 X 2.5G or 10G TDM up 8 P2P Up and Down @100GHz	1596-1603nm 1532-1539nm 1610-1625nm	Residential/ Business/ MDU 5G Transport

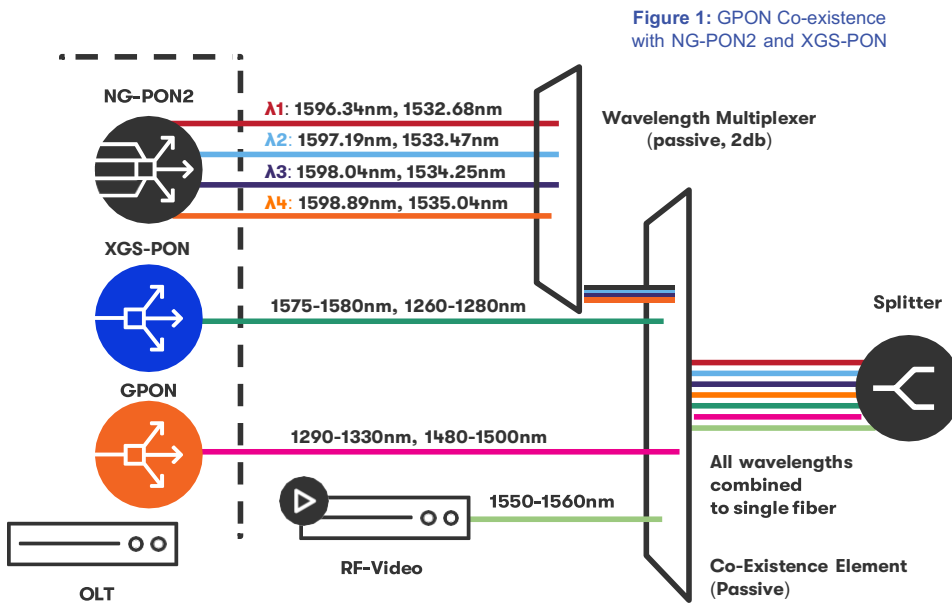

Table 1: Next-generation ITU PON standards, comparing NG-PON2 with XGS-PON

XGS-PON: THE PATH OF LEAST RESISTANCE TO 10G

XGS-PON (X=10, G=Gigabit, S=symmetrical) is the most recent standard and is similar to previous-generation GPON technology, except that it can deliver up to 10 Gbps of symmetrical bandwidth. It is therefore considered a simplified version of NG-PON2, because the technology uses a fixed wavelength. This means that it cannot harness multiple wavelengths in a single fiber to deliver more than 10 Gbps like NG-PON2 but provides more than enough bandwidth for the average needs of BSPs today and into the future.

WHY CHOOSE XGS-PON OVER OTHER PON TECHNOLOGIES:

- **XGS-PON simplifies deployment and upgrades**, you'll save time and money, and your subscribers get their new services in days, not weeks.
- Because XGS-PON uses wavelengths outside of the spectrum allocated to NG-PON2 or GPON, the three technologies can co-exist on the same fiber. This positions BSPs to deploy XGS-PON in a shortened timeframe, helping them to **immediately capture the benefits of offering a 10 Gbps service**. But it will not inhibit them from future network enhancements.

- NG-PON2 can be introduced later, without requiring a major upgrade to the network and without disrupting existing XGS-PON or GPON services. Alternatively, NG-PON2 can be introduced wavelength by wavelength, allowing for a **gradual investment strategy that can be set according to customer demand**.

With the ability to deliver 10 Gbps to an individual subscriber, new business opportunities are now possible, including:

- **MDUs and mission-critical business services:** Many existing structures lack in-building fiber optic cabling. When it is not possible to run fiber to each individual unit, existing “last mile” technologies—such as G.fast over copper—or newer Wi-Fi technologies are used to deliver connectivity. With the continued growth in MDU populations, and as the capacity of Wi-Fi continues to increase, it becomes increasingly important to have a technology like XGS-PON to deliver 10 Gbps to the building demarcation point. With NG-PON2 and the use of channel bonding, you can go even further with throughput increased to 40 Gbps and 80 Gbps in the future.
- **Marketing competition, and brand perception:** Let’s be real, the average user does not need a 10 Gbps connection. But we live in a bigger is better society, so you must take that brand perception into account as you design your network and service offerings. Your network design impacts your marketing messaging and competitive advantage. Not to mention that you do not want to build an access network that will no longer be suitable in less than 10 years. Planning today for the bandwidth consumptions of tomorrow is smart business.

NG-PON2: COMBINING THE POWER OF FOUR WAVELENGTHS

The first of the two next-generation PONs to have approved standards, NG-PON2, allows for the convergence of multiple services networks onto a single ODN, resulting in a significant reduction in the total cost of ownership (TCO), while enabling the introduction of new, efficient architectures that are highly tuned to meet emerging subscriber demands.

Previous generation GPON transmits data using a single wavelength on each fiber. By contrast, NG-PON2 utilizes time and wavelength division multiplexing (TWDM) and supports a minimum of four wavelengths on each fiber, making it the industry's first multi-wavelength access standard. Each wavelength within a single fiber can deliver 10 Gbps symmetrical speed (upstream and downstream). When four wavelengths are combined, throughput can reach 40 Gbps and, in the future, it will be possible to combine eight wavelengths to deliver 80 Gbps. For this reason, NG-PON2 is often referred to as 40G (or 80G) PON.

Figure 2: Multi-Wavelength NG-PON2 OLT, connected to ONUs with tunable lasers and receivers

As the industry continues its rapid migration to 5G cellular technology, wireless data rates may reach as high as 10 Gbps. To backhaul traffic from the mobile base station, connections exceeding 10 Gbps will be required. With NG-PON2, as the demand for bandwidth to a mobile base station increases, adding capacity is simply a matter of utilizing another wavelength over the existing fiber to the tower.

In addition to increased capacity, NG-PON2 has three advantages over other PON technologies:

- On-demand capacity management enables new service delivery opportunities and load balancing improvements. Provide operational protection by moving customers to another wavelength while fixing/resetting a card.
- Multiple wavelengths can be used to manage PON capacity. As utilization grows, PON capacity can be easily redistributed, with new channels turned on and ONUs switched over to different wavelengths without impacting the delivery of existing services.
- Support of eight point-to-point overlay wavelengths that can be used for dedicated services such as enterprise businesses, fronthaul, etc.

These changes can be done instantly, shifting and allocating capacity on-demand, enabling new time-of-day services, and maintaining load balancing. Physical resources within the access network will be able to meet the dynamic needs of subscribers, without human intervention.

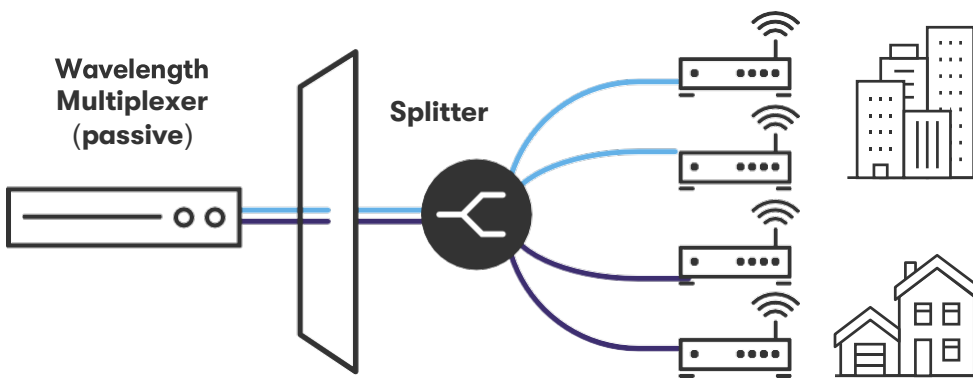

Figure 3: On-demand capacity management allows wavelengths to be redistributed, without impacting existing services

When migrating from GPON to NG-PON2, two primary investments need to be made:

- New ONUs with tunable lasers (that can be programmed to different channels or wavelengths), filters, and receivers are required to support compliant wavelength plans. Some existing ONUs are already equipped with tunable lasers, as well as filters that allow for the co-existence of GPON and NG-PON2.
- New OLT line cards are required to support compliant wavelength plans (as with the ONUs). In some cases, new OLTs are also required to ensure non-blocking support of NG-PON2 and to enable the desired density in the central office (CO).

WHAT'S NEXT FOR PON

The standards bodies IEEE and ITU are always substantially in front of the actual market need. The IEEE, which focuses on Ethernet-based PON standards mostly used in Asian service providers and by cable operators, released the 25G / 50G EPON standards in 2020. The ITU, which focuses on the traditional time division multiplexed (TDM) PON like GPON, is expected to complete its 50G PON standard in 2021. Both standards bodies are already looking at 100G PON and beyond. While there is some identified need for PON beyond 10G, mostly in the areas of business services and mobile backhaul and fronthaul, the need for bandwidth greater than 10G is not likely to drive volume deployments for several years. Even with the need being limited there is still quite a bit of noise in the industry around these higher bandwidth PONs. This noise is mostly around a version of 25G PON that is not an actual standard. This 25G PON utilizes a combination of capabilities between the IEEE and ITU to enable the deployment of 25G PON that co-exists with GPON and XGS-PON networks. The benefit claimed by the 25G PON MSA (multi-source agreement), an agreement between multiple vendors, is to enable service providers to deploy true 10G services over PON. While this can be a benefit for business services and some 5G backhaul applications, it is important to note that non-standard technologies have the challenge of gaining market momentum over time. There is a risk that while it is deployable today, it may not be technically or commercially viable over the long term.

DRIVING ACCESS NETWORK TRANSFORMATION

10G-PON is gaining momentum around the world. More than 225 BSPs around the world are building Calix-powered fiber access networks with XGS-PON and NG-PON2 technology to deliver high-speed 10G services to both residences and businesses. With this infrastructure, BSPs can easily support high-bandwidth applications such as HD and 4K content streaming, video surveillance services, and cloud-enabled interactive gaming. The Calix Intelligent Access EDGE systems, powered by the Network Innovation Platform (AXOS®), supports the deployment of both XGS-PON and NG-PON2 in a single line card or GPON and XGS-PON in a single line card.

Examples include North Dakota-based BSPs MLGC² and ReadITech³, which are both upgrading to 10G PON from Calix to deploy exciting new services and ensure their networks are sufficiently future-proofed. Both are using the Calix Intelligent Access EDGE solution, built on the award-winning Calix Network Innovation Platform (AXOS) software platform. All Calix solutions support both XGS-PON and NG-PON2 via a simple change of the optical transceiver, giving BSPs the opportunity to choose the technology that is right for them at the time they are ready to deploy.

While there are varying rates of adoption between XGS-PON and NG-PON2, XGS-PON is expected to dominate the market through 2026. There are pros and cons to each. Through the use of NG-PON2 technology, and the ability to converge the services networks onto a single ODN, BSPs can significantly reduce TCO. XGS-PON technology provides substantially more bandwidth than GPON—without a forklift upgrade. This allows for the fastest deployment and lowest cost per bit per mile.

The ability to offer ultra-high-speed broadband is set to become a key differentiator for BSPs in an era that has seen bandwidth demands rise rapidly because of the increase in remote working and greater use of high-bandwidth home entertainment services. In a recent Calix survey, approximately half of the respondents said that the COVID-19 pandemic had prompted them to accelerate plans to deploy 10G PON⁴. The move to next-generation 10G-PON will therefore be a key strategy for innovative BSPs to simplify their networks and accelerate the rollout of new-generation technologies and services.

Optical distributed taps, known also as uneven-split or asymmetric terminals, are most appropriate for short length, dense environments or low dense applications where lean distribution runs are desired. Each run supports 32 or 64 subscriber ONTs with cascaded multiport terminals utilizing preconnectorized single-fiber assemblies in the distribution. The fully preconnectorized system reduces installation costs while increasing the speed of deployment.

This solution is comprised of an array of power-split ratios to customize each run for optimal signal reach. Tap splits of 90/10, 85/15, 80/20, 70/30, and 60/40 split ratios can be cascaded, or daisy-chained, to accommodate a wide variety of deployment scenarios.

The BPEO CT Multiport 10 ports terminal includes one 1x2 uneven, asymmetric splitter and one 1x8 splitter to support customer connections, as well as a pass-through port feeding subsequent terminals in the run in a single form factor.

The BPEO CT Multiport 9 ports terminal has one standard 1x8 splitter to support customer connections, designed to be used as the last terminal of the chain.

The number of terminals in an individual run and the variation of split ratios used is dependent upon the distances between terminals and subscribers to maintain an acceptable link loss budget. By limiting the number of terminal options and utilizing preconnectorized OptiTap® drop cables, FTTx designs and material inventories can be simplified.

Features	Benefits
OptiTap® Connector Ports for Drop Termination	Lower installation cost and increased speed of interconnection
Stubless Multiport Terminal System	Reduces distribution cable fiber count; allows full plug and play distribution deployment, without requiring splicing
Full Preconnectorized Single-Fiber Architecture	A cost-effective solution that diverts a portion of power to support a typical run of 32 to 64 ONTs
Factory-Installed and Tested Connectors	Connector design provides stability, reliability, and durability
Supports Various Power Split Ratios	Solutions available to accommodate numerous combinations of power split ratio designs
Rapid Repair/Restoration	Damaged single-fiber preconnectorized drops can be repaired quickly with low-skill technicians to restore subscriber services
Dual-Ended 5 mm round drop; Fig.8 compact or ROC™ Drop Assembly	5 mm round drop; Fig.8 compact or ROC™ drop assemblies terminated with OptiTap connectors on both ends provide quick and efficient connectivity between terminals

The distributed tap architecture leverages a cascaded network of uneven-split, or asymmetric split, multiport terminals to ensure sufficient signal reaches subscribers along the route. As the first terminal is closest to the signal source (OLT), a lower amount of signal is needed to feed the subscribers served from 1x8 splitter.

In many cases, the first multiport terminal will utilize a 90/10 power split where the 10% feeds the subscriber ports and the 90% passes on to feed subsequent terminals downstream. Subsequent terminals in the chain either maintain a similar uneven-split ratio or a higher ratio of local power depending upon the distances between terminals and the total link budget.

In higher density environments with short distances between terminals, operators may serve more than the standard 32 or 64 subscribers. However, in low-density runs spanning long distances, operators may serve fewer subscribers per route as this is heavily dependent upon the link budget.

LSZH™ 5 mm Round Dielectric Drop Cable Assembly, 1F Single Tube

Corning indoor/outdoor 5 mm round drop assembly is a robust and flexible cable that provides durability and reliability in terminal-to-terminal connections for distributed tap architectures. The cable is designed for short-span, self-supporting aerial installations as well as to be installed on facades, poles, and ducts in FTTH deployments. An LSZH flame retardant and UV protected jacket allows for both indoor and outdoor use.

Figure-8 Low Friction Compact Drop Cable Assembly

As an industry leader in optical connectivity products, Corning designs and manufactures the low-friction figure-8 drop cable assembly with factory-terminated, environmentally sealed and hardened connectors to reduce the cost and time of drop cable deployment. Corning OptiTap® connector design provides superior durability and reliability in the drop segment of the network. This new assembly also offers significant improvements in cable management.

ROC™ Drop Cable Assembly with FastAccess® Technology, 900 μm

As an industry leader in optical connectivity products, Corning designs and manufactures the ROC™ drop cable assembly with factory-terminated, environmentally sealed and hardened connectors to reduce the cost and time of drop cable deployment. Corning OptiTap® connector design provides superior durability and reliability in the drop segment of the network. This new assembly also offers significant improvements in cable management.
