Richmond, VA

To whom it may concern,

We are writing to inform you that we intend to apply for BEAD funding in the near future.

iwisp llc is a full service Internet Service Provider based in Spotsylvania County. We have been providing Wireless broadband for the last 15 years to parts of Spotsylvania, Louisa, Orange and Caroline County. In early 2020 we introduced a fiber to the home service.

As a small local company, building an affordable and reliable service has been important. Our practice is to limit as much overhead as possible by doing all the work ourselves. In the last nearly 5 years we have installed a full Fiber infrastructure (underground) on over 50 miles in the Louisa County area. We are able to reach about 2500 units with the infrastructure. Our model is 'To the last foot' - We think innovatively and efficiently to provide internet to every home or business we pass.

As a local company that is focused on its local area, we are able to serve in a higher capacity. We provide neighbors with a sense of security and comfort knowing that we are nearby at all times to help.

We provide 2 fiber service packages:

Basic Fiber - \$60 a month - 150 up/down Mbps

Elite Fiber - \$120 a month - 1gig up/down Mbps

All equipment already installed is able to provide up to 2.5gig service when our industry needs that,

We intend to apply for BEAD funding for the following areas;

---

Spotsylvania County - Berkeley and Livingston Areas

Louisa County - Mineral and Bumpass Area

We would be honored to share more about our company, our goals and our intentions to help bring high-speed internet to our community.

Sincerely,

Amber M Johnson, Project Manager
