Department of Housing and Community Development's Office of Broadband

Dear Office of Broadband,

I am writing this letter on behalf of Wave2Net, LLC to indicate our interest in applying for BEAD funding. Wave2Net provides Fixed Wireless and Fiber To The Home Internet Services and is based in Winchester, Virginia. We provide residential and business high speed Internet access to both served, unserved and underserved areas. Wave2Net is the Shenandoah Valley's first [WISP](#) and remains the area leader in residential and commercial Fixed Wireless Internet access since 2003. We are driven by the desire to bring Internet connectivity to customers near and far utilizing the latest technologies.

Our goal and mission is to provide quality services to improve our customers way of life. Traditionally, Wave2Net employed the use of multiple wireless technologies capable of delivering variable speeds exceeding 100Mbps to dedicated subscribers. These wireless technologies allowed us to rapidly deploy our services at affordable rates. We have taken this same approach as we began deploying Fiber To The Home services.

BEAD funding will be instrumental in helping us to rapidly reach new customers who desperately need higher broadband capacity to meet their professional and social needs. Wave2Net is well-gearred to expand its FTTH network, and BEAD funding will further enhance our ability to achieve this objective in a more expeditious manner. We believe our relationships with the rural communities we serve, our qualified and skilled staff, the extensive network of contractors to assist in designing, building our networks, make us a prime candidate to compliment the objectives behind the BEAD funding.

Regards,
Rudy Worrell
